

## Chapter: 1862

However, this is obviously impossible! There is only one military god in the entire Chinese nation.

Even a master like Xiaowushen can not turn things around when he arrives, because Shengjiao is really terrifying. Its strength is comparable to that of a small country, and the masters in it are like clouds. They are not comparable to the dozen or so agents. of!

Furthermore, they all knew that Xuanyuan had already fallen in three places, and apart from Peng Zhuo himself, there were no good masters.

And Peng Zhuo himself couldn't come, even if he came, it wouldn't be useful.

So they all agreed that this should be Peng Zhuo's abandoning this mission and abandoning these scientists.

"Oh! Poor these outstanding scientists, it is the hope of our country, now it has been intercepted by the holy teachings, it is a huge loss for our country!"

"Yes, the value of these scientists is much higher than our agents."

"Especially that Mr. Long, he is a super scientist who wants to win the Nobel Prize. What a pity, what a pity..."

All of them looked ugly, lamenting in all manners, believing that the Chinese side had already given up on these scientists.

The middle-aged man sitting on the main seat knocked on the table again and said, "Stop complaining. The new agent will be here soon. I have sent him the coordinates. When he comes, I will see what it is. The situation."

They all nodded, and now they have nothing more to do.

They talked for a while. At this moment, they heard footsteps from outside, and they were shocked!

You know, their position is very secret, and it is impossible for outsiders to know it except their own people.

But now, someone came in unexpectedly.

They looked at each other and saw the horror and worry in each other's eyes.

"Could it be that new agent?" Someone thought of this possibility immediately and said in a deep voice.

"Impossible. Our base is very secret. Even if he knows the coordinates, he cannot find it all at once. The most important thing is that we have set up alarms everywhere, let alone people, even if a fly comes in, Call the police!"

"A foreign enemy invaded!!"

They realized this in an instant, and their muscles became tense.

At this moment, the sound of footsteps had already reached the door of their meeting room, and the next moment, there was a knock on the door.

咚咚咚...

They looked at each other, one by one, they concentrated their spirits to the extreme, and put their guns around their waists, as they were about to take

out their guns to attack.

But they also didn't act rashly right away, and the middle-aged man sitting in the main seat spoke first, "Come in."

Next, I heard the sound of twisting the doorknob, and immediately, a figure appeared.

It is a young face.

Besides Lin Ziming, who else is there?

Huh, everyone's guns were pointed at him, as long as he made any rash moves, he would shoot immediately.

But when Lin Ziming faced this situation, he didn't have the slightest panic or the slightest surprise. He just smiled faintly, "My name is Lin Ziming, I'm here to support you."
