

Chapter: 2139

Lin Ziming was relieved to put his career in the hands of the three of them. Then, Lin Ziming got to know their business one after another, knowing that under their joint efforts, the Lin Group was well managed and thriving.

When approaching the airport, Lin Ziming said directly: “Next, put the company’s focus on high-tech weapons, and make the most lethal weapons in the fastest time, the kind that can be used against ordinary people. .”

When the three of them heard Lin Ziming’s words, they couldn’t help but froze for a while, and there would be no reaction for a while. It’s a good idea. Does Lin Ziming want to develop in the military?

In the end, Jiang Liqun said, “Chairman, do you want to develop in the military? But as far as I know, this aspect is monopolized by the state. We can’t do this, right?”

It is true that China, unlike other Western countries, almost firmly holds the military in its hands.

Lin Ziming waved his hand and said, “As far as the country is concerned, you don’t have to worry, I will take care of it. As long as you control the quality well, it is enough to avoid accidents.”

Since Lin Ziming has packed the votes like this, they also have nothing to say. With their understanding of Lin Ziming, Lin Ziming dared to say that they would definitely do it. They never doubted this, but they didn’t understand. The thing is, well, why did Lin Ziming go to military development?

Besides, this industry currently has a small domestic market. Even if you research it out by yourself, who can you sell it to?

Wang Shougui asked this question, and soon he got Lin Ziming’s answer: “There will be a market, and it will be a big market. You have to hurry up, otherwise you will not be able to keep up with the east wind.”

Now they are even more confused, “Chairman, I have no intention of questioning you, but based on our understanding of the domestic market, now in the country, Guotai Minan, we have manufactured a large number of weapons, to whom do we sell?”

“If I tell you, will war break out next? Will there be a market then?”

Hearing Lin Ziming’s words shocked them.

“What? War will break out?!”

“Chairman, are you kidding me!”

“Yes, Chairman, our country has been at peace for so long, how could war break out, and the current international situation is also very good, which country dares to go to war with us!”

They all talked excitedly.

Lin Ziming understands their reaction well. After all, war is an extremely terrifying and fearful thing for anyone. Even he, when he first learned about

it, felt uneasy.

That is to say, he accepted this fact and started planning to prepare for the next war.

Fortunately, he has a Lin group, able to do more in the coming war.

Lin Ziming looked at them and said, “You don’t need to think about it for the time being. The war is bound to break out. Now we have to prepare first. Also, you should know this message in your heart. Don’t tell anyone, including you. My family, you know, everything is waiting for the state’s instructions. Now you only need to target the company’s high-tech weapons and defenses. This one is enough. I will take care of the rest.”

After listening, they couldn’t help but feel heavy. Since Lin Ziming has talked about this, it means that war will definitely break out!
