

Chapter: 2145

In fact, although he himself is a practitioner, he also believes that this world, as scientists say, is made up of atoms and has only four basic forces...

And now Huangpudao tells him that the world may not be like this, because if according to the scientific theory, then there can be no practitioners.

It is even more unlikely that there will be such a powerful person as the power of the gods.

After careful analysis, this is indeed the truth.

After Lin Ziming digested it himself, he asked a key doubt, "Since there are two schools, which one is correct?"

Huangpudao shook his head and said, "I don't know yet."

Lin Ziming expressed doubts, and Huangpudao continued: "Scientific school cannot explain the existence of gravity, and spiritual practice cannot explain the existence of soul. It is also possible that both schools are correct, just two different paths, just like light. , With wave-particle duality."

Hearing this, Lin Ziming was even more confused, what was all this, it was too different from his previous cognition.

But then, a sentence from Huangpu Road surprised him even more.

"It is worth mentioning that the Scientology believes that if humans on the earth want to survive for a long time, they must explode in technology, develop interstellar civilization, go out of the solar system, and even the Milky Way. The spiritualists believe that humans must surpass themselves* The bondage of *, reaching a higher level, reaching a level similar to cultivating immortals, can the human race survive for a long time. These are two completely different paths, but in fact the purpose is the same."

When Lin Ziming heard this, he actually understood it very well. Then he asked Huangpu, "Senior Huangpu, what school are you from?"

"Me?" Huangpudao smiled, and said: "I have both. As long as I can get out of the solar system and live for a long time, it's okay. But I think at the moment, the chances of the Scientology are relatively large. After all, the Scientology is this. On the other hand, as long as controllable nuclear fusion is developed, the great nautical era can almost be carried out. However, as for the cultivators, human beings want to break through the bondage of the physical body through the way of practice. It is too difficult and too difficult for the primordial spirit to emerge. No one like this has ever appeared!"

After Lin Ziming listened, he was actually very heavy.

Indeed, the remarks made by Whampo Road are actually very reasonable, heavy, and realistic.

There are too many people on the earth now, and the resources consumed are too great, and now the earth is a bit overwhelmed. It can be imagined that if humans cannot get rid of the earth, then it is very likely that they will be extinct!

No, it will be extinct, it's just a matter of time!

Lin Ziming actually didn't think about this problem before, but now, when Huangpu Dao talked about it, he realized the seriousness of the matter.

Then he remembered something and said: "Senior Huangpu, the martial world, is it because of this that he wants to invade the world on a large scale? The earth's resources will one day be exhausted. If science and technology cannot break through to the era of great navigation, go out In the solar system, the cultivators cannot achieve the primordial spirit out of the body, and human beings will become extinct sooner or later! Therefore, they plan to kill many people on the earth so that the resources can be redistributed."

Hearing this sentence, Huangpudao's eyes lit up, and he looked at Lin Ziming again with admiration, and said, "Ziming, you are really smart. Yes, they did make such an idea, and besides they thought it would wipe out a lot In addition to human beings who have not contributed to society, it is a solution that can maintain the long-term development of mankind. They also believe that war can greatly improve both the science and technology school and the spiritual school!"
