

Chapter: 2178

Lin Ziming has always been a cautious person. In this unknown world, although he has absolute confidence in his own strength, he does not need to take risks easily. Therefore, after he roasts the wolf meat, he does not have the right time. Instead of eating, he used a toxin detection device and simply tested it. It was found that the meat had no toxins, and he could eat with confidence before he started eating.

I have to say that the meat of this giant wolf is still very delicious, the meat is very good, and it does not know how to burn firewood.

Moreover, the nutrient content is very high. Lin Ziming just ate a few pieces and immediately felt that his stomach was full.

Physical strength also quickly recovered a lot.

Most importantly, he felt that these wolf meat had the effect of enhancing skill, which was amazing!

I don't know if this type of animal meat has this effect, or the animals in this world generally have this effect?

After a quick meal and filling his stomach, Lin Ziming began to continue on the road.

The area of this forest is still very large, and it took him almost two hours to get out.

You know, his speed is not slow, even in this dense forest, his speed has reached more than a hundred yards.

Moreover, he still found many peculiar animals on the way. Almost all the animals were much larger than those on the earth, even those insects.

There are even strange-looking creatures, such as a tiger with two heads, a big spider with a human face, and an elephant the size of a house.

Lin Ziming can be sure that this is another world, and it is not simulated. However, why is there such a secret realm on Earth? According to his cognition, the entrance of that secret realm should be a wormhole-like existence, with the ability to travel through time and space.

What I just don't know is how far this world is from the earth, and whether the entrance to that secret realm is one-way... No, it's definitely not one-way, it's two-way! People on the earth can enter, and at the same time, people here can also enter the earth.

Because after they came to the secret realm, they still have to go back to the earth.

And like Adam, Huangpu Dao and other masters of the God-passing realm, they had come to the secret realm in the first place, and they broke through to the realm of God-passing spirit in the secret realm!

After walking out of the forest, there was a desert. Fortunately, the desert was not big. Lin Ziming only walked for an hour before going out.

After going out, Lin Ziming suddenly enlightened, and finally saw the city

and the footprints of other people!

What made Lin Ziming even more miraculous was that there were actually three suns in the sky.

Moreover, there are two suns, which are relatively far away from this planet, and are relatively close at the moment in between.

Is this a three-body world?

Lin Ziming also joked.

However, he knew that this planet is still in a relatively low-level civilization, which can be seen from the city, and it has not developed high-tech, even the simplest electrical appliances, which are similar to those on earth. Feudal society.

This is very interesting.

What I just don't know is, are the aborigines of this planet good at martial arts?
