

Chapter: 2363

It's just that it is too difficult to break through from the God-passing realm to the next realm, and it is so difficult that many powerful people think that there is already a way ahead.

But Lin Ziming knew that there must be a way ahead.

It's just this road, it's hard to go, it's hard to go...

The martial world has begun to attack the secular world on a large scale, and more and more countries have begun to be attacked by the martial world.

In many of these countries, many high-level officials have been killed in a short period of time.

Yes, this time the Martial World invaded, not directly launching a war first, but based on their advantages, first launching a beheading operation.

Originally, the martial art world believed in the existence of spiritual practice. There were not many of them, but every one of them was a master. The beheading action was simply a catch, and the high-level people in many countries couldn't stand it at all.

After this successful beheading, they began to attack further in the local country.

In fact, the martial art world is more than just the four martial sects. In addition, there are more than a dozen large and small sects, including Xiang Nuwazong and Shengjiao.

Because of Lin Ziming's seat in the State of China, no one dared to make trouble on the ground of the State of China for a while.

However, Lin Ziming knew that this calm would not last long.

This time, the sect world was too turbulent, and many relatively small countries simply couldn't stand it, and began to ask for support from China.

Under such circumstances, China naturally cannot fail to save it, and gradually dispatched troops to support it.

With the help of this country of China, these weak countries immediately got a respite.

Among them, Tuoba Liang personally dispatched, and went to a small neighboring country to behead two and a half-step masters of the God Realm, and stand up in one fell swoop!

Greatly eased the pressure on that small country.

However, with Hua Guo's move, the martial art world is no longer silent at last, and they are also starting to attack China!

Among them, the first city to erupt came from the north, and several high-rise buildings were directly beheaded!

This move directly caused anger from the people in China.

At the moment, there are many masters in China going north, and we must keep these masters from the martial world in China!

This time, it was the little Martial God who came from Yandu. He is now

half-step through the Divine Realm. His strength is only the last step away from the Divine Realm. Moreover, Yandu is in the north. It is best to let him go.

And sure enough, the little Valkyrie did not humiliate his life, as soon as he shot, he directly left the masters of the martial arts world in China!

Because of the action of the Little Valkyrie, the war escalated, and it was also announced that China had officially joined the battlefield!

At this moment, countless civilians began to know that this world is not what was reported on TV, but something extraordinary.

It also caused panic for a while.

Fortunately, China has prepared for this moment long ago, and has done a good job of appeasement, and it has quickly suppressed this panic trend.

However, even so, the fundamental problem cannot be solved.

Because the war is getting fiercer and fiercer, the martial world is not just carrying out beheading operations, they have officially begun to attack ordinary people.
