

## Chapter: 2368

Returning to Lin Ziming's side, it has become increasingly difficult for him to enter a state of meditation recently.

Because his mind is no longer pure, he has always been anxious. This anxiety does not come from himself, but from Chu Fei!

It has been a month since Chu Fei was taken away.

However, he still had no information at all, and he couldn't find out at all, who was robbed of Chu Fei, and where did he go.

During this period of time, he hasn't ever asked Tao Sanniang, or Nishang, or his mother, but the three of them stayed the same, they kept silent and refused to tell him!

The more so, the more disturbed his heart is.

Their actions like this can only explain one thing. The person who robbed Chu Fei was very powerful. It was really so powerful that there was no hope for them. That's why they did it.

Therefore, after thoroughly understanding this point, Lin Ziming stopped asking, because he knew that no matter how he asked, they wouldn't tell himself.

Because, in their eyes, telling him is tantamount to pushing him into the fire. At first Lin Ziming was quite angry, but now, he wants to understand and understands.

In this world, the person who loves him is not just Chu Fei alone. Whether it is his mother, Tao Sanniang, or the neon clothes, they are all people who love him, and naturally they will not watch him die.

However, understanding does not mean approval, nor does it mean obedience!

One night husband and wife Bai Yeen, Chu Fei, he had to save it anyway.

Now the war between the martial world and the secular world is becoming more frequent and larger.

Even China began to be involved in the war.

Because of this war, ordinary people all over the world know the truth about this world.

In particular, in the chaos of war, many ordinary people began to seek martial arts to strengthen themselves against foreign enemies and defend their country.

For a time, many geniuses appeared, and within a short period of time, they entered the hall and even broke through to the innate realm.

This is the beginning of a new era.

Lin Ziming saw that under this situation, it was actually a victory for the martial world.

Because the reason why they attacked the secular world is not to radiate the idea of practice to the whole world and assimilate all mankind.

Now, under the engulfing war, more and more people have seen that the hot weapons, firearms, rockets, missiles, and tanks they rely on for their beliefs can't beat these extraordinary masters.

They think that the incomparable state machine is so vulnerable to these extraordinary powerhouses.

And they discovered that, in fact, in their country, there are also many high-level people who have practiced this kind of martial arts! Including some big people in society, big bosses, they are all martial arts, not mortals like them...

Under such circumstances, their beliefs have changed even more.
