

Chapter: 2374

Today, Libu Jingyun is broadcasting live in front of people all over the world, after inciting deceit, it is already a week.

In this week, all parts of the world can be said to have ushered in tremendous changes!

First of all, almost everyone in the world has seen this live broadcast and also knows things that ordinary people can also practice.

Among them are the benefits of practice. These benefits are not just as simple as strength enhancement. The main reason is that after ordinary people pass the practice, in addition to the greatly enhanced strength, the life span will also increase. And this is the most attractive.

Especially those young people who think that they are also martial arts geniuses, they can definitely cultivate to the highest peak.

Of course, the matter of practice is simple to say, but there is a very important reason why so many people have no practice, that is, most ordinary people, even if they want to practice, don't get the method of practice.

It's like a person wants to drive a car, but there is no car, how can I drive it?

In the martial art world, after bewitching people all over the world, what they did was to give everyone a car. The specific method was that they began to spread the methods of practice.

The result of this is that in just one week, a lot of changes have taken place in the world's structure.

Many industries and many countries have been directly paralyzed by more than half. Many people are not thinking about a certain livelihood, not thinking about going to work, and wanting to practice spiritually.

This result is the biggest blow to the power of the country. For a time, the economy of many countries has plummeted!

In addition, the crime rate has also increased linearly.

This is a terrible thing.

This is just a week, and it's already like this. It is conceivable that if there is more time, what kind of situation will it be like?

At that time, it will definitely be a scene of disastrous life!

These are things that no one wants to do.

In this week, it can be said that China and a few countries have done the best. Although many people in their country have begun to agitate, there is no big storm after all.

In this battle, the power of the country can be said to have no ability to resist in front of the sect.

At the same time, many people gathered in a luxurious manor.

And these people, without exception, are some masters, the weakest among them are the innate realm masters, among them, the strong after the fourth

stage of the innate realm, countless, other than that, like the innate realm of great perfection, There are even a lot of half-step masters in the gods, there are more than a dozen.

What's terrifying is that in this manor, there are three masters in the realm of Gods!

It can be said that the power here can sweep all small countries.

Even if it is a powerful country, it must be extremely jealous in front of this force!

Now they are singing and dancing, and there is a joyous scene, because they are all celebrating, celebrating that they have achieved such great results in just two months.

They are all people from the martial world.

Of course, besides that, there are also many women, most of them are women captured from the power of the country, one by one they are beautiful and lively.
