

Chapter: 2375

However, here, they have become the playthings of men here.

They are begging for someone to come and rescue them, but they all know that such a desire is completely extravagant, because they have all seen how powerful the strong here are!

They also know that these people are extraordinary powerhouses, and any person can cause great harm in society.

They hate why their country can't protect them.

Let them fall into this painful abyss and suffer the bullying of these beasts.

“Hahahaha, Bu Jingyun, your strategy is really beautiful! Since your live broadcast, these mortals in the world have become eager to practice and don't want to make a living. No need for it. How long does it take us to take action at all, these countries in the world will collapse directly! And then, it will be the powerhouse of our martial world, it is time to rule the world, haha!”

There was a person laughing loudly, he was a half-step master of the gods, now standing in front of Bu Jingyun, and said flatly.

In addition to him, someone immediately followed and said: “Yes, yeah! Bu Jingyun's hand is indeed beautiful. We don't need to take it at all, and they will not attack and break. This week, watching those so-called I feel funny when the power of the country is running around and embarrassed!”

“It's vulnerable, I said, their way is not working. We humans, if we want to live for a long time, only practice is the kingly way.”

“However, the earth's resources are only those. By allowing them to practice and kill each other, most of the waste on the earth is destroyed. This is a once-and-for-all method.”

“Yes, there are too many wastes on this earth. These wastes should be dead and clean, which seriously hinders the development of our elites.”

They were talking happily, and at the same time they showed their contempt and disdain for ordinary people in the world. For them, these ordinary people in the world are simply rubbish and waste, and they should have been eliminated long ago.

Therefore, their actions are just acts.

However, they had no idea that the ordinary people whom they despised were actually human beings, and they were also their kind.

This kind of behavior is already a beast, there is no difference.

Bu Jingyun became the protagonist tonight, and the method of bewitching ordinary people in the world to practice was actually not thought of by him, but by the high-level people on the side of the sect.

However, as an executor, he would naturally not give this credit out.

Over the past week, he has continuously used live broadcasts to confuse people all over the world and let them practice.

From the perspective of this, the effect is very good.

Now he is particularly triumphant.

Since he came out of the secret realm, he is now also a master of the god-passing realm. Although his current strength is not as good as that of the top-notch realm of God-passing power, his strength is also not to be underestimated.

Now he, in terms of strength, is more than a few times higher than when he was able to pass the gods in half a step?

At this time, someone said: "By the way, with so many of our masters gathered here, is there any risk?"

Hearing this person's words, someone immediately said, "What can be the risk?"

The man said again: "In case the secular side, send a master. Come to carry out the beheading operation on us, we are caught in a nest, what should be done?"
