

## Chapter: 832

Everyone present was shocked, and all were dumbfounded!

Nearly three thousand pounds of fist strength, they have never heard of it before. If this is an elephant, it can be beaten to death.

Connor's face is full of arrogance and pride. Since he accepted the baptism of the water of life, his strength has been greatly improved. Now he feels endless energy. If Lin Ziming is still here, he can easily punch him. Can be killed!

As the champion of Great Britain, he was actually defeated by a Chinese man, which is a shame to him!

With his arrogant character, it is simply suffering, so during this time, he exercised frantically.

Of course, within a period of time, he had such a big breakthrough, not by himself for training, but by accepting the baptism of the water of life.

This made him even more in awe and admiration for his boss Jax!

The water of life is the most advanced scientific and technological achievement in the contemporary era. It can transform human physique and achieve a terrible existence!

And the most amazing thing about the water of life is that it has no side effects and no stimulant ingredients. It can't be detected at all, so you can still go to the game as usual.

The only drawback is that the water of life is too expensive, and the baptism costs one billion at a time. If it were not for the support of the boss, it would be impossible to afford the baptism only with his financial resources!

And he learned from the boss that the water of life he used for this baptism is still very ordinary. If the effect is really amazing, the value of one baptism will be tens of billions!

What a terrible thing this is.

As far as he knows, his boss reached his current state only after baptizing the water of life worth tens of billions.

So he is heartfelt to disdain the so-called Chinese Kungfu. What era is it now? In the 21st century, the era of the explosion of science and technology, Chinese people still practice the practice of ancient times? Too outdated!

Now it is about science and technology. No matter how mortals practice, they cannot break the limit. Only by relying on the power of science and technology, through the baptism of the water of life, can they pursue a higher realm!

Smith stepped out, squeezed Connor's muscles, and exclaimed: "Oh my God, Connor, your physique is so strong, it's terrible, presumably that Chinese monkey is definitely not your opponent, haha."

Connor said with disdain: "That is inevitable, I can easily screw off his head now."

“That’s great!!” Smith was extremely excited. When he thought of Lin Ziming’s neck being broken by Connor, he was so excited that his face flushed.

At this moment, a tall figure came out and said lightly: “Connor is not yet the opponent of that Chinese.”

Hearing this voice, Connor’s face suddenly tightened, turned back hurriedly, bowed deeply at the other party, and yelled respectfully, “Boss!”

When Smith and the others saw each other, they also showed expressions of awe and admiration. The white man in front of him was Connor’s boss and a supernatural power!

The boss is tall, but the muscles are particularly strong, he looks like an ordinary white man, but everyone present knows his horror!

He is the boss and Connor’s coach.

After the boss walked over, looking at the numbers displayed on the force measuring machine, he nodded in satisfaction and said, “Not bad. It seems that you have absorbed the water of life very well.”

Connor was very excited by the praise from the boss, but he immediately asked: “Boss, with my current strength, the Chinese monkey is not my opponent, right?”

He was obviously unconvinced when he said this.
