

## Chapter: 916

No words for a night.

Lin Ziming got up in the morning, feeling nervous.

Now his cultivation base has reached the pinnacle level in the third stage of the innate realm. Only one opportunity is needed to successfully break through to the fourth stage. Once he reaches the fourth stage, then he can wrestle with Ye Xingchen. Even if he played well, it was impossible to suppress Ye Xingchen.

In fact, Lin Ziming has a strong hunch, once he breaks through to the fourth stage, then Ye Xingchen will not be his opponent!

Of course, this opportunity is not so easy to find, and even if Lin Ziming has been unable to find this opportunity, then he will not be able to break through the fourth stage in the next ten years, and it may happen.

After all, the congenital realm is too difficult, and when it comes to the congenital realm, it is even more difficult to take a step forward.

The reason why Lin Ziming was able to reach the third stage of the Innate Realm in so much time was due to a lot of luck.

At the beginning, he broke through to the innate realm by swallowing the best cleansing pill. The best cleansing pill is much more precious than the first cleansing pill, and its medicinal effect is much stronger, causing Lin Ziming to break through the innate realm. , Is directly the pinnacle of the first stage. After he defeated Gu Xuan, he felt through the battle. After returning, after a period of meditation, tonic, and consolidation, he successfully entered the second stage and slowly reached the top level in the second stage.

Then, through a battle with Wu Meizi, he was a leapfrog challenge. At the beginning, Wu Meizi was too strong, an absolute upper-level master in the innate realm!

Lin Ziming had already made plans to fall. Therefore, he defeated Wu Meizi, which brought him tremendous benefits.

Directly from the second stage, a breakthrough to the third stage.

Now, the appearance of Ye Xingchen has once again brought him pressure and motivation. Through the tempering on the cliff last time, he consolidated the third stage.

Lin Ziming got up at 5:30 in the morning. With his current physique, he can regain his energy as long as he sleeps for two hours a day.

Chu Fei was still asleep, Lin Ziming got up lightly, cooked breakfast for the family, and then he went out for morning exercises.

The air in the morning was particularly good. Lin Ziming took a deep breath, refreshed, and then exhaled a long suffocating breath, vomiting out all the filth of the whole night last night, and his body became more relaxed and comfortable.

At his level, the structure of the human body is actually different from ordinary people.

Some time ago, he actually started a second development. The most obvious is that some organs of the body have undergone some development and become healthier.

And his teeth, also rose a few more.

A normal person has 32 teeth, of which 4 are wisdom teeth, which not everyone can grow. Lin Ziming originally had 32 teeth, which was considered relatively healthy, but after he entered the congenital realm, he began to change his gums and grew four more teeth.

Moreover, his teeth were not good-looking, not very neat, and even had two cavities. But now, his teeth became neat and white, and even the two cavities began to fall off automatically, and then new teeth grew.

His change is even more obvious than doing orthodontic surgery!

This is very abnormal behavior. If the dentist knows about it, he will definitely exclaim that it is impossible, because it is impossible for a normal adult to have such a thing!

In fact, this situation is just relatively ordinary, and the most incredible thing is that his brain can secrete hormones autonomously to continuously strengthen his physique, and his vitality is slowly growing every day.

To some extent, this is considered genetic modification.

“It is rumored that the Buddha has 40 teeth, and his cultivation has reached the level of unpredictable ghosts and ghosts. After a reed crosses the river and passes away, his body can be stored at room temperature without decay for a hundred years. This should be the legendary King Kong. Not bad. Now I have 36 teeth. When the King Kong is not bad, I should be able to grow 40 teeth? The most important time, when that time, should be able to develop 50% of the brain’s capacity!”

Lin Ziming’s tongue rolled his teeth, no more, no less, just 36 teeth. He felt that he was already very strong now. If he were a criminal, he could bring huge damage to society!
