

ARMIPOTENT Chapter 355

The discussion was over with a decision to upgrade Guard to Elite Guard. Zaneos, Zhang Mengyao, and Zowen felt that it was necessary to have a long-range force to support the front line.

However, Tang Shaoyang had a different idea from them. He decided to choose to upgrade Guard to Elite Guard. The reason for this was because they needed Elite Guard more than the archer.

Their current mission was not to fight with the other force but focused on clearing the mini-game. Most of the mini-game was inside the building, Archer was not effective in the limited space such as inside the building.

When he expressed his thoughts on this, the other three did not disagree with his choice. Indeed, they did not face the threat from the other factions. They still had more time to raise their armies.

"Alright, Mengyao! You and Wei Xi will be in charge to recruit more Tarrriors. Please prioritize the experienced, the fake guard looks decent. Nah, I will trust you for the rest," He smiled at Zhang Mengyao.

The latter nodded her head solemnly. She did not want to break his trust in her and would do the best.

"I will help Kang Xue, Selena, and Arina to elect the healer group to form the Healer Corps," Tang Shaoyang ended the discussion with that.

After finishing their discussion, Zowen and Zaneos returned to their space. Zhang Mengyao and Tang Shaoyang went to the elevator side by side.

"What about the trial?" She asked about the trial he talked about earlier.

"We will create a team for this matter..." Tang Shaoyang massaged the spaces between his eyes, "I will lead the team for the trial," they did not give a division to enforce the rules in the base so he had to do this by himself.

The more he thought about it, the more he felt that his base was incomplete, still, disorder. He felt the need to create a division similar to police to regulate the base too. Tarrriors were trained to fight against the beast and zombies. They were not the right people to enforce the rules since they did not go through the training for doing that.

Zhang Mengyao nodded, "I will help too. We will screen people together to make the team. We can ask Kang Xue's father too, he's more experienced in this regard than us."

"Yeah, let's do that later. I want my coffee first and get something to eat..." He pressed the number 2 on the elevator. He was going to the cafeteria for food

Ding!

The elevator opened and he saw the crowded cafeteria. There was a long line that formed the S-line till the end of the line which was at the stairs.

Tang Shaoyang walked toward the kitchen directly. There was a quite ruckus within the line when the baldy walked past the line. Not all survivors could see Tang Shaoyang, so not all of them recognized him.

But as soon as the Warriors bowed their heads toward the baldy, the crowd went into silence. Without a doubt that the baldy was the higher-ups of the base. They noticed the beauty who followed the baldy, none of them dared to protest for the baldy to cut the line.

"Boss~" as he arrived at the food counter, he heard a delicate voice. He looked toward the voice and saw a little girl was smiling brightly at him.

Tang Shaoyang recognized the little girl. She was Li Yue, Li Na's little sister. In other words, she was his sister-in-law. He picked her up with a gentle smile plastered on his face.

Meanwhile, Li Yue's gaze fell onto his hair that just grew slightly. With a curious glint in her eyes, she asked, "What's wrong with your hair?" She wanted to touch his head but hesitated.

"Bad people tried to burn me, but because I am too strong they can only..." before he could finish his words, Zhang Mengyao elbowed his waist.

She could not believe that her man would talk about violence to the kids. It was clearly inappropriate to talk about the battlefield with the kids. It would influence them badly, at least she thought so.

"What happened to the bad people then? Have you punished them?" Li Yue asked as she looked upset that someone burned his hair.

"Yeah, I have punished them," Tang Shaoyang nodded and immediately changed the topic, "So Miss Li Yue, what do we have for the meal?"

After noticing the long line and the busy kitchen staff, he did not ask for coffee and decided to grab a quick meal for himself.

Being addressed like an adult, Li Yue giggled as she pointed at the food, "We have potato soup, soft bread, and steak, Boss!" She pointed at the food with his tiny finger.

The buttery aroma assaulted his nose. It was the smell from the bread, the bread even beat the steak in the aroma.

"Don't call me Boss. You can call me big brother, or Brother Shaoyang," he rubbed the little girl's hair and spoke to the staff, "Can you give me the bread with a few slices of meat on top?"

One staff member recognized him and immediately served him the bread with five slices of meat on top. He put Li Yue down and received the bread, "I have other matters, so can you watch the cafeteria for me?"

Li Yue clapped her chest a few times to assure him, "Leave that to me, Brother Shaoyang. I am quite influential on this floor."

He smiled, and just as he was about to leave, someone called him, "Boss, can I have your time for a moment?"

Tang Shaoyang turned around and found Elin in a white apron. The tight apron showed the beautiful curve of her body. She was sweating from working hard in the kitchen, but it added more charm to her.

'But why did she call me, Boss?' He nodded and followed her back into the kitchen as Zhang Mengyao followed them too.

Elinova brought them to the storage room where no one could hear their conversation. Inside the storage room, Elin told him about the notification and the second class she obtained just now.

Tang Shaoyang told her to get a blessing back then in the Arkania Continent. Her first class was Apprentice Herbalist. Thanks to this class that she could perfect her creation, the spice she used was one of the examples.

However, after serving out a certain amount of food, she suddenly got a notification in her head. The voice told her that she got second class and that class was Chef. She was someone new with the system, so she was a bit clueless about sudden notification.

"That's actually good, but it will take time to explain everything to you. What about you finishing your work first and we will talk tonight?" Tang Shaoyang smiled at Elin, "You don't need to worry about it, it's a good thing!"

After saying that, he kissed her on the lips, "Origin will help to get to your room, just follow his words," then Tang Shaoyang left the cafeteria with the bread and a few slices of meat on top.

"More things to be investigated" Tang Shaoyang was also curious about how Elin could get the second class naturally. However, it was not the right time to find out about that. There was a long line waiting for her food and he had a matter in his hand too.

"Second class, is that possible?" Zhang Mengyao could not help but ask.

"Oh, I haven't told you yet?" He turned toward the girl.

"About what?"

"The second class, I have my second class too," he told her how he got his second class as they went to the lobby.

A bigger crowd gathered in the lobby, they had to do registration before they could get their lodging. It was a process to identify the people and got them to work in their expertise field.

"What's the progress?" He met with Wei Xi and asked about the progress.

"Around thirty percent have finished their registration, and around fifteen percent get their lodging. We will finish the registration in a few hours to get everyone and maybe everyone will get the lodging by the evening," Wei Xi reported the progress.

"Then we can start the trial tomorrow..." Tang Shaoyang muttered in a low voice before he tapped Wei Xi's shoulder, "Good work, keep it up!"

"I want to check the General Shop Level 3, but let's look for my father-in-law first," He agreed with Zhang Mengyao's advice to include Kang Jiayi into the trial team.

There were so many things he wanted to check. The new facility, the new buildings in the control room, the Farm Project, and the General Shop. But his base was in a mess, he had to organize the mess before he could check everything leisurely.

It took him a couple of minutes to find Kang Jiayi. The old man was helping him to put the survivors in order.
