

ARMIPOTENT Chapter 448

Li Shuang was leaning her back against City Steele while opening her status screen. She was not just the weak level 1 Li Shuang, but she was now level 37. Of course, all of this was given to her.

She was in deep thought while looking at the screen. She got 72 Attribute Points to be allocated. Tang Shaoyang had explained to her each use of the attribute.

He advised her to add more to Stamina and Vitality. Li Shuang could understand Stamina based on its name, but not with Vitality. He explained what Vitality did.

Vitality was enforcing your body to be stronger and tougher. There was a possibility that Vitality could prolong her life as well, the main reason he advised her to focus on Vitality. She got to know why the knife and ax did not work on him, that was the effect of Vitality.

"How much Vitality does he have to be able to do that feat?" Li Shuang wondered.

Strength, she understood what Strength represented even without his explanation. Agility, he said she could run faster and also have a quick reaction with high Agility. Sense, this one was simple yet complex stats. Sense was basically the human's five senses but the apparent change would happen on her sight, hearing, and also instinct. That was what he told her.

The last one was Magic Power. Tang Shaoyang had shown her what magic was. It was powerful, she wanted to have that kind of ability. She could kill the zombies from a distance to protect her daughter. She expressed her thoughts that she wanted to be a Mage to her man. Tang Shaoyang supported her decision but he still advised her to focus on Stamina and Vitality first.

He had told her that they were in a war. They would actively move, Stamina and Vitality might save her life later. Aside from that, he told her about Talent and Class as well. She could raise her attributes not just from leveling up.

Li Shuang was contemplating for a while before she agreed to allocate 30 points to Stamina and 10 points to Vitality. She had 32 attribute points left. She allocated 10 points to Agility and the remaining 22 points to Magic Power.

After finishing allocating the attribute points, she was about to get up until a hand offered her a leather scroll. She looked up to see it was her man who offered the scroll.

'What is this? My first gift? I thought he was not the romantic type...' curious with the scroll, her hand reached the gift and the information about the scroll appeared in his eyes.

[Skill Scroll]

Skill: Mana Mastery (Passive)

[Do you want to learn the skill, [Mana Mastery (Passive)]? Yes. No.]

Li Shuang did not make her decision but looked up. She did not even understand what mana was, seeking an explanation from someone more knowledgeable than her.

"That skill will help you if you want to be a Mage. I will teach you meditation tonight, the skill can increase your Magic Power," Tang Shaoyang explained.

He supported her idea to be a mage. As long as she was willing to fight alongside him, he would support and provide the things she needed to be a mage. One more powerful aide would be great, of course, she had to pass the training first. If her cowardly nature remained even after battles, he would rather let her stay and manage the territory instead of joining the battle.

After hearing the explanation, Li Shuang nodded. She chose yes and learned the skill.

[You have learned a new skill, [Mana Mastery (Passive)]!]

She smiled when she heard the notification. This was her first skill, she was happy to obtain her first skill. Just like a kid who got a new toy.

Swoosh!

Suddenly, Wen flew into the building. Yes, he did not walk but directly flew into the building. The strong gush hit Li Shuang. She looked up only to see the eagle beastmen. This was her first meeting with Wen so she did not know Wen was an ally.

She opened her mouth, wanting to scream, but she lost her voice. She closed her mouth again and did not know what to do in this situation.

"There is a group of enemies coming toward us, My Lord! They are strong, and I can't defeat them," Wen knelt with his right knee and reported the situation.

Tang Shaoyang's expression grew pensive. A group of enemies that Wen could not defeat. He was surprised to hear that. But then a frown formed on his forehead, he noticed Wen's jade feather tainted with blood. Wen was wounded, for the first time since the Jade Eagle arrived on Earth. This was the first time he was injured.

Tang Shaoyang came closer and checked the wound. There were three slashes on his back. While the injuries were not dangerous, the Jade Eagle was forced to retreat.

"I am fine, My Lord. This is nothing, but we should evacuate..." Wen did not finish his words when a loud male voice boomed from outside.

"Eagle! Come here and become my slave! You should be grateful to be this Prince's mount!" The arrogant voice echoed into the building.

Zowen who was carrying Jiaying came closer, "I will evacuate Li Shuang and Jiaying with me," the Lightning Magus took the initiative to speak.

"Mnn," Tang Shaoyang nodded.

Receiving the affirmation, Zowen brought Li Shuang and Jiaying to the top floor to avoid the two being swept into the battle later.

"If I am not wrong, then these people should be the Lionax Kingdom's force. If Wen could not defeat them then these people are also from another world," Tang Shaoyang came to such a conclusion in this short time.

"How many of them? Surely you are not defeated by one person, right?" He asked the Jade Eagle.

"201 people, but I was defeated by one person," Wen reported and admitted his defeat. He was indeed lost to one man.

"This is getting interesting. Are you okay, Wen? You can stay here to recover, I will greet our rude guests," licking his lips, Tang Shaoyang headed out.
