

ARMIPOTENT Chapter 602

'What's this?' Suvan looked at the shadow hovered above him. It had the same size as him, but it looked like the projection of the angel. He tested the shadow with his physical strength, and he was at a disadvantage in terms of physical strength.

The Green Sky Serpent was about to do some experimental attacks on the shadow to find its weakness, but he heard a scream from below. He looked down. The force summoned by the human started the clash against the Dark Tribe. The vanguard of the Dark Tribe was crumbling, but he did not care about those lowly beings.

'I need Igor to stall this angel so I can kill Kalliyan. As for that thing...' The Green Sky Serpent looked at the energy sphere. He started to worry about the black energy sphere that was getting bigger. It was now around ten meters in diameter.

Things did not go as he expected since this human appeared out of nowhere... "Igor, come here and fight the angel! I will kill The Kirin!" The Green Sky Serpent was called the Abyss Sabre. He would not waste his energy in fighting the angel.

Zaneos overheard the shout. He passed over the vanguard of the Dark Tribe and directly faced Igor. He did a quick calculation. Grade SSS Spirit could hold the Legend Rank Serpent, and he might fight equally against the Primordial Rank Beastmen.

Igor squinted his eyes at the demon. He felt the demon's aura, and he was sure that the demon in front of him was not weak at all. "I don't think I can help you, Master Suvan. I have someone to fight too." The Abyss Sabre did not think that he could ignore the demon to help Suvan.

The Abyss Sabre the dark energy gathered in his hand, forming a long claw. It was dark, but Igor's dark energy was lighter than Tang Shaoyang's dark energy.

In response, The Green Sky Serpent glanced in Igor's direction. He did a quick scan of the demon and made a noise as if someone clicked his tongue. It sounded similar, but louder. 'In the end, the Dark Tribe is useless.'

"Playtime is over. Let's see if you can block this one." As Suvan said that, he flapped his wings and flew upward. The Serpent was too fast that it left a green streak behind.

The giant shadow returned to Zara's side as she followed the Green Sky Serpent's movement. At the same time, she gathered the dark mana on her shield. The shadow did the same thing as her. After what Suvan said just now, it was for sure the serpent would launch a big attack.

Suvan's figure became a green dot in the night, but then the dot became bigger and bigger again. Suvan launched himself toward Zara at an extreme speed. Zara flew above the energy sphere as she raised the shield toward Suvan. It was fast, but she could see everything clearly.

The shadow followed Zara's movement and raised the shield toward the incoming Suvan. The green beam hit the shield and produced a booming sound that shook the ground.

Boom!

Zara furrowed her brow as soon as Suvan hit the shield. The figure shattered into green particles. She quickly realized that the green beam was not Suvan, but the energy in the same shape as Suvan. 'Where is he?' When those thoughts crossed her mind, she immediately turned around toward The Kirin in the distance.

Sure enough, Suvan was above The Kirin, and Kalliyān seemed to not notice The Green Sky Serpent's presence. It was understandable, since she could not detect Suvan's presence as well. The sly serpent hid his aura and sneaked toward Kalliyān.

Fwoosh!

Zara absorbed the big shadow into her body, and her figure disappeared. In the next second, she came out of Kalliyān's shadow. She thrust her sword toward Suvan, who was right above Kalliyān. To her surprise, her sword and her body passed through Suvan's figure.

Suvan, who was above Kalliyān, was just a mirage. It was not real. Zara opened her eyes wide. She was struck in confusion by Suvan's trick. Her mind raced quickly and thought about where the real Suvan was.

'I could not feel Suvan's presence from here, but I could feel a fragment of his presence there...' The Angel of Death turned toward her head toward the energy sphere, which had reached thirty meters tall. It was the spot where she blocked Suvan's attack.

"Gotcha!" Suvan grinned at the Angel of Death. The Green Sky Serpent opened his mouth as green energy gathered in its mouth. Yes, it was not green liquid, but green-colored mana. The Green Sky Serpent directed his next attack to the energy sphere.

After some thought, the Green Sky Serpent decided to get rid of the variable that could not be predicted. He was curious about what was inside the energy sphere, but he would not bet his life to see what was inside the energy sphere.

"NO!" Sara tried to rush over and screamed. The same for Kalliyān, The Kirin tried to rush over. Her Master was inside the energy sphere. If he died, then she would die too. However, they were too late as Suvan shot the green energy in his mouth toward the energy sphere.

Boom!

Green Energy exploded as soon as it hit the energy sphere. Even Suvan was swept away by his own attack and his body was blasted dozens of meters away. The giant explosion swept the area.

Kalliyān was alarmed by the explosion. She stopped midway and rushed toward the rock mountain, to her lair. She cast big protection around the mountain with all mana she had. Her newborns were in the lair. If the explosion reached the rock mountain, her newborns might die.

As the explosion subsided, her defenses cracked everywhere. Kalliyān looked up, and Suvan was right above her, two meters away from her cracked protection. "I have used sixty percent of all my mana on that attack. It's a miracle that your shield still manages to block that." A wide grin formed on Suvan as he tapped the cracked protection with his claw.

With a single tap from the Green Sky Serpent, the cracked shield disintegrated. "You used all your mana to protect your lair. Your time has come, Kalliyān."
