

ARMIPOTENT Chapter 761

Tang Shaoyang let himself indulge in the past nineteen days. He stayed in the castle, strolling with the girls around the city, and of course, in the night, he would have the girls accompany him as well. He allowed his body to relax and enjoy life.

Tang Shaoyang opened his eyes, looking at the well-decorated ceiling before looking to his side. Selena was sleeping soundly with her head on his arm while Sylvia literally slept above him. He could feel that little Shaoyang was resting inside Sylvia's body. 'It seems I just turned an innocent girl into a corrupted girl.'

Tang Shaoyang then lifted Sylvia slowly so as not to wake her up and put her to the side. He then put Selena's head on the pillow before getting up from the bed. Walking to the window, he pulled the curtain a little to look outside. The people in the Capital City were doing their activity, the shop owner opened their shops, the women went to the market to buy the daily necessities, and the guards patrolled.

Their kingdom just fell into a new ruler, but the people were not affected in the slightest. It was as if the war never happened as only the noble houses were affected by the new ruler. Tang Shaoyang looked away from the district and glanced at the castle entrance. He saw a guard was running toward the castle, bringing a round crystal glass.

'It seems there's an emergency.' He thought to himself as he picked up the linen clothes and went out of the bedroom by himself. 'It's almost three weeks since the main force left the Capital. I hope there's some result from them.'

When he reached the dining hall for breakfast, two maids led the armored guard into the dining hall. "Captain Guard Alfonso greets, Your Majesty." The guard knelt and greeted Tang Shaoyang.

"Rise." Tang Shaoyang responded and turned toward Captain Guard Alfonso. "Do you have something to report, Captain Guard Alfonso?"

"Yes, Your Majesty. Marshal Alton just contacted through the Miracle Crystal. He has something to report to you directly, Your Majesty." The Captain Guard replied with a firm voice.

"Miracle Crystal?" Tang Shaoyang looked at the crystal glass in Captain Guard Alonzo's hand. He never heard of an item with that kind of name.

Captain Guard Alfonso presented the Miracle Crystal. "Yes, Your Majesty. You can choose Line 2 to contact Marshal Alton."

Tang Shaoyang took the Miracle Crystal from Alfonso. When his palm touched the glass, a screen popped out in his eyes.

[Contact List]

Line 1

Line 2

Line 3

He was about to tap Line 2, but the Miracle Crystal glowed. The contact list disappeared, and a new notification popped out.

[Line 2 is requesting a connection to Line 0! (Accept) (Reject)]

Tang Shaoyang chose yes, and the glowing crystal dimmed down as an image appeared in the crystal. Alton's face appeared in the crystal, and he was about to bow, but Tang Shaoyang spoke first. "Skip the formality, Alton. I want to hear the report."

"Yes, Your Majesty." Alton still bowed his head as he replied respectfully. "I bring good news for the Empire, My Lord. We have defeated the Warmir Kingdom's armies and captured the Capital of Warmir."

Tang Shaoyang was surprised by the news and recalled the time when Alton left Rosalie City. "That's faster than your calculation. Take control over the kingdom and stabilize the territory," He rubbed his chin. "Also, tell Moonsong and Virion to return early. There's something I want to discuss with them."

"Yes, My Lord," Alton replied quickly. "Then I will close the Miracle Crystal." With a nod from Tang Shaoyang, Alton cut off the communication.

The image disappeared from the crystal and returned to an ordinary glass crystal. Tang Shaoyang looked at the Miracle Crystal with an interesting gaze before turning toward the Captain Guard Alfonso. "How many Miracle Crystals do we have, Captain Guard Alfonso?" If it were technology from the Lionax Kingdom, he would bring this to Earth.

System Communication was exclusive for the Empire's executives, and this communication crystal could be used for the lower ranks. Since the System erased phones and other communication tools from Earth. This communication crystal became handy for his people.

"We only have four Miracle Crystals, Your Majesty." The Captain Guard's reply surprised Tang Shaoyang. Four crystals were so little for a kingdom, meaning this crystal was not something that could be mass-produced.

"Is it complicated to make one of these things?" Tang Shaoyang asked.

After a few minutes explaining the Miracle Crystal, Captain Guard Alfonso left the dining hall with the crystal in his hand. That Miracle Crystal was not something the Lionax Kingdom created but something they found as a reward from clearing dungeons. The Lionax Kingdom named it Miracle Crystal because it could be used for long-distance communication.

As for what the dungeon was, it was something similar to a mini-game. Entering an exclusive space to defeat the monsters inside that space to obtain rewards. However, while the mini-game and dungeon had a similar concept, they had a different mechanism. The mini-game was generated through the abandoned building, but the dungeon would form a portal gate in a random place.

“Not only do we have a different start, but we have different mechanisms as well.” Tang Shaoyang compared the two worlds. He shrugged and started his breakfast, and after his breakfast, he came down to the castle’s underground.

Yes, there was something new in the castle’s underground after he occupied the castle. Through the secret passage, he entered huge spaces underground with tents lining up. Of course, this was much better than two weeks ago as he could see houses stood up now. The dwarves were working on the house, and the dwarf’s children were playing around.

Chief Engin, the Dwarf Chief rushed toward Tang Shaoyang from afar and immediately greeted him with great respect. “You should notify me if you want to visit, My Lord.”

“It’s fine.” Tang Shaoyang waved his hand and looked around. The dwarf had built over a hundred houses within two weeks. He was impressed by how fast the dwarves worked. “So, what about the Dimensional Gate? Have you made the new gate?”
