

ARMIPOTENT Chapter 765

"However, This Jasmine asks Your Majesty for your assistance for the capitulation. I am afraid some forces refused to listen to my decision." Jasmine was quick with her action and did not give the noble's representative to meddle with the surrender. She was tired of holding the same discussion as the threat loomed over her people. The nobles were seemingly not aware of the real danger as they dared to haggle.

The two old men looked at Queen Jasmine with their eyes widened open. They did not expect the Queen would throw them under the bus like this. However, the two old men were quick-witted as they stood up and bowed toward Arelion. "We wish for Your Majesty's assistance."

Meanwhile, back to the throne hall, Tang Shaoyang furrowed his brow. He scratched his forehead. "If they easily surrender like this, I should do this from the start." He muttered in a low voice before speaking to Arelion through the [Spirit Link]. "Tell Ava to proceed with the handover."

After saying that, he switched off the [Spirit Link] and sighed. "Hah, everything is over now." If the Malecia Kingdom did not try to fight back, that meant they did not have a secret force or plan to fight the Tang Empire. They possessed no threat to him and Earth, so he could safely open the Dimensional Gate between Earth and Lukan.

"Wait a minute. What about the Legend Rank of the Revolution Army?" Tang Shaoyang suddenly remembered the Legend Rank from the Revolution Army. "If I am not wrong, that person comes from another world too. Have we found that Dimensional Gate?" After they wiped out the Revolution Army, they ignored the reinforcement brought by Julius from another world.

The following morning, Tang Shaoyang held another meeting with Moonsong and Virion. It took them one night to give him an answer about the transmigration to Earth. The Elven Kingdom and the Moon Tribe agreed to move to Earth.

"Good choice." Tang Shaoyang responded with a nod. "Have you heard about the Dimensional Gate possessed by the Revolution Army from Marshal Alton?" The one who did clean-up for the Revolution Army was Alton. He started the Revolution Army, and he was also the one who ended it.

Moonsong and Virion exchanged glances before both looked at Tang Shaoyang. "I didn't hear anything about the Revolution Army from Sir Alton, Your Majesty," Moonsong replied and was followed by Virion. Both had the same answer.

"Alright, I will ask Alton myself later. You can go now, and I will tell you the date once I open the Dimensional Gate." With that being said, Moonsong and Virion left the throne hall. With the last Dimensional Gate from the Revolution Army, Tang Shaoyang hesitated to open the Dimensional Gate.

*** **

Two days later, Alton and Ashley returned with good news. They had taken over the whole Warmir Kingdom, leaving Allan to take care of the aftermath since he was familiar with the Warmir Kingdom. Back in the throne hall, Tang Shaoyang questioned the Dimensional Gate possessed by the Revolution Army.

"Ah, are you talking about this, Your Majesty?" Marshal Alton took out a dimensional sphere from his inventory. "I have destroyed the Dimensional Gate. However, the gate has been shut down from the other side. I destroyed the Dimensional Gate for precaution."

Tang Shaoyang was relieved after hearing that. On the same day, later in the night, Ava also returned to Rosalie Capital with good news. She brought the former Queen Jasmine to hold the oath ceremony and signed the System Contract. The System Contract was an assurance for Jasmine, who was not convinced by the oath.

Tang Shaoyang watched Jasmine leave the throne hall and let out a relieved sigh. "Hah, does that mean this Ortis Continent is mine?" He just still could not believe that he would have a whole continent under his ruling. That was surreal for Tang Shaoyang as he was just a street thug a few months ago.

"Then I am ready to open the Dimensional Gate." Tang Shaoyang stood up from the throne and stretched out. This continent was no longer a threat to Earth. "But we have to keep a watch on the main continent. I have to set up a team to oversee the Ortis Continent. Also, I need to send a big team to transform this continent."

Tang Shaoyang had so many things in his hands, but it was fortunate that he had capable people under his orders. He then headed toward the underground, where the dwarf lived.

Chief Engin and four Elders of the Dwarf Tribe sat across from him. "We are willing to follow you to Earth, Your Majesty. We also agree to teach our people the dwarf's knowledge, but we want to choose these people by ourselves. Can you agree with this condition, Your Majesty?"

"That's fine by me. I will leave everything under your care, and you guys know the people with the potential." Tang Shaoyang nodded his head. "Then I will leave the Development and Infrastructure Division under the Dwarf's command. I will send you a team of advisors to help you."

Everything went smoothly with no accident. After a short meeting with Chief Engin and the Dwarf's elders, Chief Engin led Tang Shaoyang to the biggest building in the underground. "We have installed the gate inside this building, Your Majesty." Chief Engin guided Tang Shaoyang into the building.

It was just a big building with one floor and one hall. The building served as a safekeeping place for the Dimensional Gate, nothing else. At the end of the hall, there was a ten meters wide stone gate. Chief Engin led him to the gate and pointed to the floor. There was a round hole about the size of the Dimensional Sphere. "Please put the Dimensional Sphere in this hole to activate the Dimensional Gate, Your Majesty."

Tang Shaoyang nodded as he took out the Dimensional Sphere from the inventory and put it inside the hole. The stone gate glowed brightly for thirty seconds before it dimmed down. When the glow disappeared, the Dimensional Gate was activated.

"Congratulations, Your Majesty! Lukan and Earth have connected again, and you may return to your home.." Chief Engin bowed toward Tang Shaoyang.
