

ARMIPOTENT Chapter 95

Jin Fan went to the next chest. The first chest from the right. He opened the chest without hesitation.

The chest did not immediately disappear, meaning he did not get the gear like before. With a curiosity about what his subordinate got from the chest, he walked over to see what Jun Fan got from the second chance.

It was the same brown leather scroll as Qin Shoushan's. The difference was Jin Fan's scroll tied with a blue band. He was surprised as this Jin Fan had divine luck. In the first chest, he got a top-tier weapon set, on the second one he got a Class Change Scroll.

His hand was itchy, he wanted to take the scroll to see what class his subordinate got. However, he refrained himself, letting his subordinate to pick his reward.

Jin Fan's face was as bright as the sun when he saw the scroll. His hand was as fast as lightning when he took the scroll out.

[Skill Scroll]

Advanced Skill: Stealth

It was not a Class Change Scroll, but a skill scroll. Nevertheless, Jin Fan was still happy even though it was a skill.

[Do you want to learn Advanced Skill: Stealth?]

Jin Fan's reaction was the same as Qin Shoushan's. He handed the scroll to the Boss to let him see what he got. It was as if that was a natural reaction for him.

"You actually don't have to show me what you got, it's yours, after all," even though he said so, he took the scroll from Jin Fan's hand. Looking at the screen popped out above the scroll, Tang Shaoyang was a little surprised, "Your hands truly have divine luck, not unlike a certain someone," he remarked as he handed back the scroll to Jin Fan, "You should learn the skill, and use it well!"

Certain someone in his mouth was Zhao Zhong. While everyone else got a valuable item, he got game coins that could be farmed by killing zombies. Zhao Zhong heard his Boss's words very clearly, but there was nothing he could do but scratched his head in embarrassment.

Jin Fan received the scroll while nodding his head. As soon as he got the scroll, he learned the skill. The scroll broke into blue light and engulfed Jin Fan's body. It disappeared as soon as it appeared.

After that, Jin Fang's body disappeared from sight. He was demonstrating the new skill for everyone to see. It caught them by surprise, but when Jin Fan tried to walk. His steps made a noise and Tang Shaoyang could see... Or more likely feel the movement for some reason.

After a quick demonstration, Jin Fan appeared again 5 meters away from his original spot. He appeared again with a big smile plastered on his face. He seemed so happy with his new skill while Zhao Zhong could only gaze at Jin Fan with envy.

"Good skill, but you have to work on your steps! Be sure to not make any noise while moving or the skill would be pretty useless!" He gave an honest remark for the boy. It was a good skill as it could be an element of surprise in the battle.

Tang Shaoyang glanced at the others and found out everyone seemed to be shocked when Jin Fan activated the stealth. None of them could see the movement just like he did so he concluded it was just him. So he left that out lest he ruined the guy's happy mood.

He then looked toward the chest, Zhao Zhong opened one, Qin Shoushan opened his, Cao Jingyi took hers, and Jin Fan opened two chests. Eight Treasure Chests left, he then looked toward the direction of Kang Xue, but he found out Fu Dandan and Dai Wenqian were gone.

"Where do they go?" He asked Li Na who currently stood next to Cao Jingyi. The girl was quick with the response and immediately replied hastily, "They went to the hospital to treat Cao Xun," Cao Xun was the man who suffered heavy injuries. They did not have the necessary tool here so they brought the man to the hospital for rescue.

Tang Shaoyang nodded his head and put his gaze to the girl, "Here for you!" He then gave the girl the Inventory Bag Crystal and instructed her on how to use the inventory. After that, he used his index finger to point in the direction of the treasure chests.

"Do you want to bring your chest home and open it privately or do you want to open your chest now? Your choice, so pick one!"

"I-I will open it now!" Li Na answered instantly. She had been looking at Tang Shaoyang for some time. He looked interested in what people got from the chest so she decided to open it now.

Li Na immediately walked closer to the treasure chests. With 8 chests left, she had a lesser choice, though it did not matter as the chests had the same outer appearance. She walked for one round, looking at the chests closely. It did not take that long for her to pick the chest she wanted. The chest in the middle, the fourth chest from the left.

She nervously stood in front of the treasure chest while secretly peeked toward Tang Shaoyang. To her dismay, the man she liked was more interested in the chest than her. His eyes were looking toward the chest.

With a small saddened sigh, she opened the treasure chest. The chest immediately disappeared which meant she got the equipment. Everyone's eyes locked toward the chest as it dissolved, and then a white cloth folded neatly replaced the treasure chest.

Li Na stared at the white cloth nervously while wondering if she got trash equipment. She picked the white cloth and the details appeared on top of the white cloth.

[Concealment Cloak]

Tier: D

Bonus skill: Conceal (Conceal effect will wear off if you moving)

[Upgrade]

She looked disappointed when she saw the text next to the skill. If the effect wore off if she was moving, then it did not have the point to have this. At least, that was what she felt at the item she got from the chest. She handed the cloak to Tang Shaoyang to see.

"So it's a cloak," remarked Tang Shaoyang while nodding his head. From his tone, she could tell he was uninterested, "This is a good cloak, it could save your life at the moment of danger," Li Na received the cloak and saved it to the inventory.

After that, he walked toward the chests. Everyone thought Tang Shaoyang was going to open his share of chests. But he did not, he saved the chests into his inventory instead of opening it.

"I thought you are going to open your share," Cao Jingyi commented when he walked back, "I already open my share, and I am going to have Fu Dandan, Yan Sheng, and Dai Wenqian to choose for the fairness," that was his answer as to why he did not open the remaining chest.

He then scanned his people, 20 people entered the hospital, 11 Warriors included him, and 9 slaves. 7 people died, 2 Warriors and 5 Slaves. So four out of seven remaining chests were supposed to be the reward of the four slaves.

'If only the two remaining groups entered the hospital area, we may get more free chests,' Tang Shaoyang regretted the fact that the two cars did not enter the hospital.

"Let's pack, we are going back to the base!" He shouted and walked toward the direction where he left Destroyer. He picked the battle-ax and put his weapon in the inventory. Thanks to the Inventory Bag, it was more convenient to bring things as big as his battle-ax. While picking up the battle-ax, he spotted the scythe used by Death Reaper next to the headless body. He walked over and picked the scythe.

[Soul Reaper]

Tier: C+

Bonus Attribute: +25 Strength, +25 Agility, +25 Stamina

[Upgrade]

"Huh, this is actually good!" He tossed the scythe to the air and caught it again. He repeated the action, weighting the scythe. It was lighter than his battle-ax, 'Should I change my weapon too?' He considered changing the weapon since he got a better one in his hand.

In the end, he shook his head. At this point, he was used to swinging the battle-ax. He did not want to change his weapon yet for the time being.

"This is an unexpected reward!" Tang Shaoyang muttered as he saved the Soul Reaper into the inventory. Then he checked the inventory, more than half of his inventory was filled with items. He was happy with that, "Ah, I forgot about this!" He took out the healing potion and put the potion into inventory as well. Afterward, everyone went out of the laboratory with a victory, they finished the mini-game, not with the perfect score as they lost seven people but both objectives achieved. He was satisfied with the result.
