

## The Amazing Son In Law Chapter 5074

“Okay.” charlie said, “See you later.”

“Okay, Mr. Wade, see you later.”

Fifteen minutes later, Fei Kexin’s helicopter landed on the top floor of the Shangri-La Hotel.

charlie took Xion, along with Isaac Cameron and Don Albert, and boarded the helicopter together.

Half an hour later, the helicopter flew over a remote building on the outskirts of New York City.

This is the medical technology center of the Fei family.

This building is the only building within a radius of two kilometers. It is twenty-five stories high, and the surrounding area is heavily guarded.

After getting off the helicopter, Fei Kexin took the initiative to walk in front, and while leading the way, he said to charlie, “Mr. Wade, this is a medical technology center funded by my grandfather, mainly to develop and test some high-end and advanced treatments. The means and drugs, including the most advanced proton therapy system and cellular immunotherapy in the field of cancer, are available here, and they are the best in the world.”

At this time, Fei Kexin remembered something and said again: “Oh, Mr. Wade, you should have heard of the Mayo Clinic, right? It is known as the top cancer hospital in the world.”

“I’ve heard of it.” charlie nodded and said, “Mayo has a long-standing reputation in the world, and few people should not know about it.”

Fei Kexin smiled slightly and said: “Our cancer team members here overlap with Mayo’s more than 60%, and their top experts also serve here, and even in cutting-edge scientific research, we are even better than Mayo. It is farther away, after all, Mayo himself has to consider profit, but profit is not considered here.”

After speaking, Fei Kexin added: “In addition, there are currently the top organ transplant centers in the United States, the top cancer diagnosis and treatment teams, the top cardiovascular and cerebrovascular and anti-aging research teams, and our freezing center is underground. The fifth floor is designed to operate for 300 years. Grandpa said before that if he leaves, he will be sent here to freeze immediately, leaving a ray of life for the future. Maybe the technology in two or three hundred years will bring him back to life. .”

charlie nodded and sighed: "It seems that maintaining such a medical research institution will cost the Fei family a lot every year."

Fei Kexin sighed: "Let's start with at least one billion US dollars a year. At the peak stage, there were times when two or three billion US dollars were burned in a year."

Having said this, Fei Kexin added: "However, although we do not pursue profitability here, it is indeed profitable, and some effective scientific research results can also be commercialized very well, and can create a lot of money. At present, more than 70% of the cost here can be recovered. This is the case in the medical industry. Although the investment cost is very high, once a top-level specific drug or a very good new treatment method is developed, it can earn 10 billion or 20 billion US dollars a year. It's not difficult, but betting on a single product may turn a loss into a profit."

charlie agreed: "In the medical industry, the most fearful thing is not willing to invest in research and development costs. Some pharmaceutical companies have been sitting on so many drugs for several years or even decades, and it is difficult to make any social contribution, or It takes a lot of money to invest in R&D to benefit society."

Fei Kexin nodded and said seriously: "Mr. Wade is right, for the medical industry, research and development is very important, so after I took over the Fei family, I did not reduce the budget here, but added another one to the original one. 30% to 50% flexible budget."

The two chatted and had already arrived at the elevator entrance on the top floor.

At this time, the elevator just came up, and when they opened, three men walked out. One of the men recognized charlie at a glance, and then said to charlie excitedly: "Mr. Wade! My God! Really! You, Mr. Wade!"

charlie frowned and looked at the man talking in front of him, only to find out that the man in front of him was actually James Smith, the head of the US FDA, whom he had contacted with before!

## **The Amazing Son In Law Chapter 5075**

When James Smith saw charlie, he was extremely pleasantly surprised, and at the same time he felt a kind of excitement as if he had grabbed a life-saving straw in a desperate situation.

charlie asked curiously, "Mr. Smith, why are you here?"

Smith subconsciously replied respectfully: "Mr. wade, the FDA has several clinical projects in cooperation with the Fairfield Medical Technology Center. I came here today to complete some routine work..."

After saying this, before Charlie could speak, he knelt on the ground with a plop and said with tears: "Mr. Wade, since this time, I have been hoping to meet you again, but I haven't had the chance. I have been to Aurous Hill a few times, but the people from Jiuxuan Pharmaceutical and the Fifth Master don't seem willing to help me match up... That Fifth Master even charged me several times for referral fees, but he kept dragging don't help me..."

Don Albert, who was behind Charlie, pouted and said, "You foreign devil who wants to see Mr. Wade is uneasy and kind, and I don't f\*cking know about you? Don't you just want to find Master Wade to buy Jiu Xuan Zaozuo Pills and bring them back to the United States. Reverse research and development? I will tell you plainly that I will not refund a cent of the introduction fee you give, just sue me if you have the ability!"

Smith was startled when he heard this, only to realize that Don Albert was following behind Charlie.

He hurriedly explained to Charlie: "Mr. Wade... I'm not looking for you for the purpose of reverse research and development of Jiuxuan Zaizao Pills. As the person in charge of the FDA, I sincerely want to introduce Jiuxuan Zaizai Pills into the United States. Market sales..."

After speaking, he added: "Besides, there is my son's illness... The twenty boxes of Jiu Xuan Zai Zai Pills that I bought from you before were all looted by the privileged class in the White House. There are very few Jiuxuan Zaizao Pills that can really be used for my son's treatment. His previous condition has finally improved a little, but because there has never been Jiuxuan Zaizao Pill... So... so things have gotten worse recently..."

Speaking of this, he couldn't help choking and said: "Mr. Wade, my son is only twelve years old this year, but he has been suffering from cancer for several years. If you don't save him, he may not survive this summer!"

Charlie looked at him, smiled slightly, and said, "Smith, Jiuxuan Pharmaceuticals very much hoped to bring Jiuxuan Zaizai Pills to the United States for listing, but what happened, I don't think anyone knows better than you.?"

"In the beginning, it was because of your personal arrogance and prejudice that you rejected our drug on the spot. At the same time, you also made a lot of nonsense about Manager of Jiuxuan Pharmaceutical. It was Manager who looked at the child and didn't want him to die because of your arrogance and arrogance. Stupid, that's why I left you a box of Jiuxuan Zaizao Pills!"

"Later, you bought our medicines and came back to do reverse R&D. Don't think that I know nothing about this matter. The United States has always been advertised as the country that pays the most attention to intellectual property and patent protection in the world, but the FDA actually cooperated with the US military. Fang took the lead to

reverse-engineer our drug, which is a shameless act with no professional ethics and no concept of intellectual property protection!”

After speaking, Charlie continued: “After that, Jiuxuan Pharmaceutical captured a large number of American agents, almost all of these American agents were sent to Huaxia by the US military and the US Central Intelligence Agency. What did they want to do when they infiltrated Jiuxuan Pharmaceutical? , I don’t need to tell you, you should be very clear, right?”

Smith was instantly ashamed.

As the head of the FDA, he couldn’t be more clear about this.

After proving that Jiuxuan Zaizao Pill has an excellent therapeutic effect on cancer, the White House very much hopes to master the core formula of this medicine.

In the United States, although everyone usually says to respect intellectual property rights, this kind of nonsense is completely a dishonest.

If it is Harry Potter written by JK Rollins, although it is very profitable, but it does not have any strategic value to the United States, then the White House will not be interested in this book, let alone do any infringements on it;

But if other countries and other companies discover any patents with strategic value, the White House will definitely be the first to find a way to acquire this patented technology.

The magic of Jiuxuan Zaizao Pill is that it does not matter what kind of cancer the patient has, or what stage the patient has reached, even if it has metastasized to the whole body, or even has caused organ failure and can die at any time. Patients, as long as they take this medicine, can see immediate improvement!

If this kind of medicine is only used to make money, it can definitely attract money all over the world. Whether it is rich or poor, once they get cancer, I am afraid they will do their best to hand over their life savings to Jiuxuan Pharmaceutical;

If this medicine is regarded as a strategic material, it can not only make money from other countries, but can even use it as a bargaining chip to force the other party to make more concessions.

Therefore, the first thought of the White House is such a good thing, they must get it!

Seeing Charlie’s dissatisfaction, Smith choked and said, “Mr. Wade, this matter you are talking about is beyond my control. After all, I am only the person in charge of the FDA, who is responsible for the approval and supervision of drugs. As for the military And whether the CIA sends agents, I really have no ability to interfere...”

With that said, Smith looked at charlie and begged bitterly: “Mr. Wade, now I just ask you to see that I am the father of a child with cancer, and then sell me some Jiuxuan Zaizao Pills so that my son can live. down...”

charlie smiled lightly and said, “I’m sorry, I didn’t tell you something, because the raw materials and production capacity of Jiuxuan Zaizao Pills are extremely limited, so after the careful decision of Jiuxuan Pharmaceutical, Jiuxuan Zaizao Pills will To give up overseas markets indefinitely, you hear it, is to give up all overseas markets, not just for the United States.”

## **The Amazing Son In Law Chapter 5076**

In fact, Jiuxuan Zaizao Pill was specially created by charlie to stimulate the FDA.

At that time, the FDA was very hostile to Chinese patent medicines, so it was difficult for Jiuxuan Pharmaceutical’s Jiuxuan Weisan, Jiuxuan Hupan Tablets, and Jiuxuan Gujin San to pass the FDA’s review.

Failure to pass the FDA review does not only mean that these three drugs cannot be marketed in the United States.

Because, throughout Europe and the United States, there are many countries in the pharmaceutical standards, which are very deep learning from the US FDA.

If a drug passes the review of the US FDA, many countries in Europe and the United States will open their doors to this drug.

But once this drug is rejected by the US FDA, other countries will have many times stricter review processes for this drug, and even refuse approval just like the FDA.

Therefore, charlie used the Sanxue Rescue Pill, combined with Jiuxuan Gujin Powder, to produce Jiuxuan Zaizao Pill, which was regarded by the FDA as the No. 1 specific medicine for cancer.

However, this Jiuxuan Zaizao Pill itself is not a drug that can be truly mass-produced.

Moreover, Jiuxuan Zaizao Pills has already made a name for Jiuxuan Pharmaceutical. Under this circumstance, the mission of Jiuxuan Zaizao Pills has been successfully completed.

Hearing charlie’s words, Smith burst into tears and cried, “Mr. Wade, I heard that Jiu Xuan Pharma is in Chaina, providing free intensive treatment for terminal cancer patients with family difficulties, I beg you, can you give me One place for my son, my little Jimmy is so pitiful, I can’t bear him to continue to suffer from cancer...”

charlie said with a serious expression: "You said it yourself, Jiuxuan Pharmaceutical's free medical treatment is for terminal cancer patients with family difficulties. The first condition is family difficulties. It seems that you and your son do not meet the standard. , what's more, this activity is strictly for Chinese patients, and countless Chinese patients can't wait for this opportunity. How can I give my precious quota to a foreigner who does not meet the standard at all? So no I'm sorry, but I can't help you."

Smith cried and said, "Mr. Wade, but if you don't help him, he will soon die. You can't just watch a twelve-year-old child die from cancer..."

charlie nodded and said seriously: "When it comes to the issue of death, countless people die of illness every day, and many of them are about the same age as your son, or younger than him, we can't, and we don't have the ability. Heal everyone."

"So Mr. Smith, this low-level strategy of moral kidnapping has no meaning to us!"

"Instead of morally kidnapping me here, why don't you ask pharmaceutical companies like Ruihui and Novartis that so many children die from leukemia in the world every year, why do they still set the price of medicines so high? Why? Don't distribute medicines to every child with leukemia?"

"There are so many children in Africa who are still unable to fill their stomachs. If a family of 100 million American families can help one, they can feed and clothe 100 million African children. If a family helps two, the hunger problem of African children will be completely solved. But why don't you do it?"

"Apple earns \$50 billion a year. Why don't you just give them one while watching those idiots sell kidneys in order to buy an iPhone?"

"Elon Musk's Tesla will sell more than 1 million cars globally this year, but so many people in third world countries can't afford a car, why doesn't Tesla give them the car?"

Seeing that Smith was speechless for a while, charlie said calmly: "Actually, you also know that the first goal of a company is to survive, and the second goal is to make profits. Whether it is a pharmaceutical company, a technology company, or a manufacturing company, it needs a lot of If they are required to take out the medicine for free, then no one will continue to develop new products, and the technology will lose the motivation to move forward. This is the law of the market."

After speaking, charlie said again: "So let's get back to the point, everyone is an adult, and the trick of moral kidnapping is avoided, it's too low."

Smith's expression suddenly fell into despair.

charlie remembered something at this time, and said again: "Oh, by the way, if you really want to do something to save your son's life, show enough sincerity first."

Smith blurted out: "I have enough, 100% sincerity!"

charlie said lightly: "Then I suggest you quit your job, take your son to chaina, do your best first, and do some charity work in chaina without asking for anything in return. If you really pay attention, maybe nine Xuan Pharmaceutical can give you a chance."

After speaking, charlie reminded again: "But you have to remember that when I say this, it does not mean that you will get what you want in return for your hard work, but in this society, if you want to repay, you must pay first. What's more, you have to pay the price for your own arrogance and prejudice towards Jiuxuan Pharmaceutical. If Manager Liam hadn't repaid his grievance with virtue and left you a box of Jiuxuan Remade Pills, your son would have been killed by you, so If the final result disappoints you, you should also find the reason from yourself first!"
