

## The Amazing Son In Law Chapter 5077

Hearing charlie's words, James Smith was a little overwhelmed.

He is the head of the entire FDA. He is not only a proper upper-class society in the United States, but also an absolute high-end group.

And charlie's understated remarks actually asked him to resign from his current job and give up everything he had worked so hard for. This is for him. Unexpected indeed.

Seeing that he was at a loss for a while, charlie said lightly: "This is just my personal suggestion. You can go back and think about it slowly. I still have something to do, so I won't talk to you any more."

After speaking, he looked at Fei Kexin beside him and said, "Miss Fei, let's go."

Fei Kexin nodded, made a gesture of invitation, and said respectfully, "Mr. Wade, please."

Smith watched charlie and Fei Kexin walk into the elevator with his own eyes, and watched the elevator door slowly close, but he kept kneeling on the spot without any other movement.

The companion beside him stepped forward to help him up, but he waved his hand and refused.

Then, as if he had figured out something, he took out his cell phone and called the Secretary of the U.S. Department of Health and Human Services, his immediate top leader.

In the administrative structure of the United States, the FDA, also known as the U.S. Food and Drug Administration, is subordinate to the Department of Health and Human Services.

The call was connected, and the Secretary of Health and Human Services asked, "Hey James, what's the matter with me?"

James Smith said earnestly: "Your Excellency Minister, I solemnly apply for your resignation, and hope that I will no longer hold any jobs and positions in the FDA from now on."

The minister asked in amazement: "James, what's the situation with you? If I remember correctly, you told me when you and I were in college that running the FDA was your biggest dream, but you just did it now. Resign in two years?!"

Smith said firmly: "Yes, I have decided to resign from the FDA and take Jimmy to China."

"Go to China?" The other party quickly asked: "Are you going to take Jimmy to find Jiuxuan Pharmaceutical?"

Smith hesitated for a moment and sighed: "Half half, I just met the person from Jiuxuan Pharmaceutical, but he doesn't seem to plan to give me more Jiuxuan reconstituted pills in any way, all I can do now is to bring Jimmy to China, do some charity over there, and see if you can give Jimmy a chance..."

The other party was silent for about ten seconds, and then said helplessly: "I heard the person in charge of Mayo talk about Jimmy's situation, and now it seems that there is no other good way except Jiu Xuan Zaizao Wan..."

After speaking, he sighed and said, "James, I know that Jimmy is more important to you than anyone and anything. Since your decision has been made, I will stop talking nonsense, and you can go back and write your resignation report. I will pass the application in the shortest possible time."

"Okay!" Smith said gratefully: "Thank you Xavier, I will send you the resignation report as soon as possible!"

.....

at the same time.

## **The Amazing Son In Law Chapter 5078**

Under the leadership of Fei Kexin, Charlie took the elevator to the first floor of the building, then passed the three defense center on the first floor, and transferred to the special elevator to the freezing center on the fifth underground floor.

Since this freezing center was prepared by Jian to preserve his body, and the designed service life reached 300 years, the security level here is no less than the defense facilities for the President to hide in the doomsday plan.

Although the freezing center is on the fifth underground floor, its location is nearly 100 meters underground. There is a complete strategic reserve here. Even if the United States is really hit by a nuclear attack, it can be safe here.

This freezing center, according to the design scale, can freeze at least 100 bodies, but at present in the entire freezing center, apart from the remains used for the experiment, only Li Yalin is the only one who is really frozen.

After charlie came to the freezing center, he was surprised to find that it was like a scene in a science fiction movie. The entire space was filled with various equipment, and a large number of them were specially used to transmit air, oxygen and liquid nitrogen. 's pipeline.

In addition, the biggest visual impact is the hundreds of huge stainless steel tanks standing regularly in the entire freezing center. Each tank is at least four or five meters high.

These tanks are “freezers” specially used to freeze the human body.

For the sake of confidentiality, Fei Kexin has already transferred all the scientific research experts and staff of the freezing center in advance. Therefore, at the moment, only charlie and the others in the entire freezing center are very deserted. Combined with this kind of place, the human body is stored at ultra-low temperature. The cold storage, so it feels a bit more gloomy.

At this time, Fei Kexin said to charlie, “Mr. Wade, according to the current standards of human freezing technology, after death, it will go through a 50-hour program to cool down, and then put it into the freezing tank after the temperature is gradually lowered. It is frozen in the middle to prevent the cells from producing ice crystals when the temperature is extremely rapid, which will damage the cells.”

After speaking, Fei Kexin said again: “However, the technology of freezing and thawing has only been overcome at present, and the safe freezing process is no longer a problem, but thawing is still a huge problem that cannot be solved. So far, the world has also There has not been a single case of a successful thawing...”

charlie nodded, pointed to the stainless steel tank with many rules in front of him, and asked, “Which tank is Li Yalin in?”

Fei Kexin said, “He’s in the No. 7 tank.”

“Okay.” charlie said, “Let someone drain the liquid nitrogen in the No. 7 tank and get him out. It’s time for him to thaw and go home.”

Fei Kexin said in horror: “Mr. Wade... If the liquid nitrogen is drained, the body cannot guarantee ultra-low temperature. Once the body starts to heat up, the cells are likely to be irreversibly damaged during the heating process. In that case, I am afraid that a person is like a thawed steak, with cells ruptured and blood flowing, and if it reaches that point, there will be no possibility of resurrection...”

Speaking, she couldn’t help but remind again: “The reason why this place is designed according to the service life of 300 years is that scientists estimate that in the next one or two hundred years, it may be difficult to solve the irreversible damage caused by the thawing of the human body in the ultra-low temperature state. damage, so people can

only be frozen for a long time, and left to the human beings who will make great progress in science in the next few hundred years to solve...”

charlie looked at the stainless steel tank with No.007 sprayed on it, smiled slightly, and said, “Don’t wait for science to progress, I will solve this problem today, and I have a way to bring him back to life!”

Fei Kexin was stunned. He just wanted to say something, but when he thought that charlie was not an ordinary person, he could find a magic medicine like Huichundan, which could be called a bug, and it might not be impossible to save Li Yalin. .

Moreover, if he had not had a certain degree of certainty at the beginning, charlie would not have let himself freeze Li Yalin.

Thinking of this, she hurriedly asked charlie: “Mr. Wade, if you really have a way to resurrect Li Yalin, will Li Yalin have doubts about your identity if he sees you when he wakes up? With his character and behavior, wake up After that, I will definitely continue to investigate to the end...”

charlie smiled slightly and said indifferently: “It’s alright, when he wakes up, I will have a frank chat with him, try my best to save his life, and always let him know who I really am!”
