

The Amazing Son In Law Chapter 5181 free

“Is the water salty?”

May 47 thought for a while, then frowned and said, “This... I really don’t remember it clearly, after all, it’s been too long, but in my impression, it seems that after that time, the ground and clothes were all lost. Could some of the white residue be the salt from the seawater?”

Li Yalin nodded and said, “It is likely to be the salt, if this is the case, then what you experienced at the time should be the Indonesian tsunami. The reason for the water penetration is that Because the earthquake at that time caused a tsunami, many surrounding countries were affected, including your residence.”

After speaking, Li Yalin circled two areas on the map and said, “It seems that your residence, It may be in the western part of South Asia, or it may be in the eastern part of Southeast Asia.”

Later, Li Yalin saw several entries and muttered, “The epicenter of the Indonesian tsunami has been earthquakes in recent years, but the magnitudes are not counted. Gao, did you feel the tremor?”

May 47 shook his head and said, “I can’t guarantee that I haven’t felt the tremor for so many years, but I can guarantee that I haven’t noticed any obvious tremor.”

Li Yalin nodded and said, “In this case, just It means that your station should be at the relatively edge of the 2004 Indonesian tsunami, and it is basically outside the influence of the subsequent earthquakes nearby. In this case, it is probably equivalent to locking on a huge target paper. The area between the ninth ring and the tenth ring is already a big breakthrough.”

He drew a few circles on the map, and finally marked the middle of the two outer circles with a red marker. After coming down, he said, “Although the area of these parts is also very large, fortunately most of them are oceans, and you said that your resident felt an earthquake in 2004, and water penetration occurred, which proves your resident. , it must be not far from the coastline, it should be in a certain coastal area or an island within this ring!”

Looking at the ring on the map, May 47 said with a complicated expression, “We have been so many years and so many years. People are trying to figure out where we are, but no one knows...”

Speaking of this, May 47 suddenly shed two lines of hot tears, letting the tears slide down his face, staring at the not-so-small ring area and choked, “Detective Li... Thank you...”

Li Yalin waved his hand. He said, "Don't rush to thank me now, even this ring area is very large. It is actually very difficult to conduct a carpet search here, and before I came, I also encountered this matter with Young Master Wade. I don't think it's appropriate to actually go to these areas to search for your station. We discuss these issues on paper, at least not revealing any clues, but once we want to find each other in this area, we will be prepared to be discovered by the other party."

After speaking, Li Yalin said again, "So, the best way at present is to find a breakthrough point on paper together. It is best to analyze the target through our cooperation and analysis. The scope is narrowed down enough, and then Young Master Wade will personally contact him."

May 47 nodded in understanding and sighed, "The strength of the organization is indeed very strong, and rash contact is likely to lead to disaster, and we have been together for so many years. They haven't been able to get rid of their domination at all, and they don't even know their true colors. They don't even know how much power they hide behind, which is likely to be much bigger than our imagination."

Li Yalin said, "You are so It's really embarrassing that you haven't escaped the control of this organization for so many years and so many generations."

After speaking, he looked at May 47 and said seriously, "I think, if you want to get rid of the shackles of this tree for centuries, then Young Master Wade It is definitely your only chance, only he can save you dead men and give you back your freedom."

"Yes!" May 47 nodded without thinking, and said with anticipation, "My biggest dream right now, It is to be able to reunite with my wife and children outside, I am afraid that only Mr. Wade can help me realize this dream..." After

that, he asked Li Yalin, "Inspector Li, what else can you do to make our location more detailed? Yes? If you need my clues, I will definitely know everything!"

Li Yalin looked at May 47 and asked, "Do you all fly out to perform missions every time?"

May 47 nodded and said, "Yes! Every time I take a plane."

Li Yalin asked, "What state are you in midway?"

"The drug for deep coma will be there when you wake up."

Li Yalin asked again, "Then how do you make sure you take a plane every time you go out?"

The Amazing Son In Law Chapter 5182 free

Wu Siqi explained, "Every time I go out on a mission, I will let my wife Help me calculate the time, although our time is not very accurate, but in the case of a relatively short time axis, the error is not too big;"

"Every time I perform a task, the time I can't grasp is the back and forth journey, and the person who performs the task in the middle is the time. I can accurately record the time myself, so every time I go back, I check the time with my wife, use the time she recorded, minus the time I recorded in the middle of the task, which is the time spent on the round trip. , No matter if we go to any place in the world for a mission, we will not spend more than six or seven days on the back and forth, and this speed can only be achieved by an airplane."

Li Yalin nodded lightly and said, " It will not exceed six or seven days. Seven days, which means that your turnover efficiency is very high, and even the airport you depart from is likely to be near your station." After

speaking, Li Yalin remembered something and blurted out, "Then we can take two steps, on the one hand. Find a more complete map, including satellite cloud images, find out all the islands and airports in the ring area, and then locate the 10-kilometer area of each airport to focus on the investigation;"

"As for the other hand, from you "

How about the transportation?"

Li Yalin said, "Although you are flying to perform your mission, you didn't go through customs when you entered the United States, right, because when you woke up , you have already arrived in the United States and completed your entry."

"Yes." May 47 nodded and said, "Every time we perform a mission, we have never passed through the customs, and we have already arrived at the place when we open our eyes." Li Yalin continued, "

I don't know about other countries, but the United States has attached great importance to aviation safety since 9/11, so it is impossible for the planes you take to enter the United States directly. When entering the United States, you must go through customs, so they must have chosen When a certain country is a springboard country, first fly the plane to the springboard country, and then immediately arrange for you to sneak across the border by land to complete your entry. After a pause, Li Yalin asked again, "

Have you been to the United States before?" "

May 47 nodded and said, " I went there once a few years ago, when I went to Los Angeles. "

Li Yalin continued to ask, "The time you went to Los Angeles was the same as the one you went to New York this time. You woke up and went there, and the round-trip journey did not exceed six or seven days, right? "

May Four Seven nodded." Yes. Li Yalin smiled slightly and said, "

You must smuggle to enter the United States, and there are only two ways to smuggle, either by sea or by land, but if it is by sea, it is impossible to achieve a round-trip time of no more than six or seven days, so I feel that you It must be that the plane flew to the springboard first, and then smuggled in by land. "

Then, Li Yalin added, "The United States has only two neighboring countries, Mexico and Canada. If you go by land, it must be one of these two countries, but Canada's aviation control is also very strict, so if your plane chooses Canada as a springboard. In other countries, the process of going through the customs cannot be avoided, but the situation in Mexico is different. Mexico is much more chaotic. The possibility of a plane avoiding customs and landing directly in Mexico should still be very large. "

I can basically confirm that your station is in the coastal areas or islands in western South Asia or eastern Southeast Asia, not far from the airport, and if you are going to the United States to perform a mission, the plane should first fly to Mexico, and then transfer you by land. to New York, and the group must have another group of people stationed there in Mexico. "

I think Mexico should have the clues I want. "
