

## The Amazing Son In Law Chapter 5183

“Mexico?”

After listening to Li Yalin’s analysis, May 47 quickly asked, “Inspector Li, what do you mean, when we go to the United States to perform a mission, the plane will land in Mexico first, and then enter the continental United States by land?”

“Yes. .” Li Yalin nodded and said, “This is the most reliable way to me. Other methods are too difficult. Since they are transporting you dead men by plane, they must have a landing site. The United States and It is impossible for Canada to let them bypass the customs and enter quietly, and only Mexico has this condition.”

May 47 asked in confusion, “Doesn’t the plane need to go through the customs when entering Mexico?”

Li Yalin explained, “The plane enters Mexico through the There are two customs, one is air traffic control and the other is customs. Air traffic control is to control the plane before the plane lands, and the customs is to control the passengers and cargo after the plane landed. In the world, no one can completely hide the whereabouts of the plane, unless he does not want to. Because the current density of civil aviation passenger planes is too high, the flight of the plane must be arranged and dispatched by air traffic control, otherwise it is very likely to have a collision, so I speculate that the plane that sent you at the beginning must be a normally registered plane, and I applied for a flight route in compliance with the regulations.”

After speaking, Li Yalin added, “But the advantage of choosing Mexico is that after the plane landed, it is definitely more expensive than the United States and Canada to clear customs in Mexico and transport your dead men out. It ‘s too simple.”

May 47 nodded lightly and asked Li Yalin, “Inspector Li, what should we do next? You said just now that the plane can’t hide its whereabouts, so should we start the investigation from the plane?”

“Yes. “Li Yalin said, “From the day you arrived in New York, push it forward for three to five days, and sort out all the planes that entered Mexico in the past few days. The one you took should be among them, and the rest Yes, it is how to screen, the workload should be huge.”

Abbas, who had not spoken, said at this time, “Inspector Li, from your position in the ring, flying to any place in Mexico, at least At more than 16,000 kilometers, most planes can’t fly that far, do you think they fly directly to Mexico, or do they have a stopover in the middle for supplies?”

Li Yalin said with a serious expression, “I tend to fly non-stop. For them, extra takeoffs and landings are required for stopovers, which is not only a waste of time, but also a

great risk. Think about it, even if you are a strong martial arts master, Once they are all packed into a plane, there is also the risk of being taken away by someone. Just imagine, if the plane is shot down during take-off and landing, what kind of expert can survive the crash?”

abbas only felt a chill on his back and said, “If the plane really crashes, with a speed of several hundred kilometers per hour, plus a weight of more than 100 tons and dozens of tons of fuel, I am afraid that no matter how strong the martial arts master is, it is impossible to survive. Come down.”

After speaking, Abbas said again, “The planes that can fly such a long distance are basically the ultra-long-range passenger planes among the large passenger planes. Under normal circumstances, the passenger planes that can fly more than 16,000 kilometers are Boeing 777s. And the ultra-long-range model of Airbus a350;”

“If Inspector Li thinks that they have a high probability of landing in Mexico first, then we will take out the planes that entered Mexico during that time, and focus on checking these ultra-long-range passenger planes, they should be able to Exclude most of the flight information.”

“If the eligible flight information takes off from or near the circle area you just drew, that is the key suspect.”

Li Yalin’s eyes lit up, and he said, “This clue It is very valuable and can save a lot of trouble.”

Abbas said, “Then I will let someone check the Mexican aircraft entry records during that time!”

Li Yalin said quickly, “Master Wan, it is not difficult to investigate the aircraft entry records. But can you make sure that the channels you are investigating are 100% secure?”

“Don’t worry.” Abbas nodded and said, “The information channels of Wanlong Palace are of a very high level of confidentiality. Besides, we have many firewalls, so Detective Li can rest assured.”

Li Yalin nodded lightly and instructed, “That’s right, Master Wan, and also sort out the information of all incoming cargo planes.”

“No problem.”

...

Soon, a dense document was sent to Abbas. hand.

This document records the information of all flights entering Mexico in the five days before the New York incident.

Since the vast majority of inbound flights are small and medium-sized aircraft, aircraft with a range of more than 15,000 kilometers are only a minority, so after sorting out, there are less than 100 sorties in total.

And among the flights with less than 100 sorties, passenger planes accounted for 80%, and cargo planes accounted for 20%.

## **The Amazing Son In Law Chapter 5184**

However, since the location of the circle drawn by Li Yalin is probably in South Asia and Southeast Asia, there are no direct passenger planes between these places and Mexico.

During these five days, there was only one cargo plane taking off from Colombo, the capital of Sri Lanka.

The model of this cargo plane is exactly the Boeing 777 ultra-long-range passenger plane mentioned by Abbas just now.

It can be seen from the entry information that the plane took off from Colombo on the fourth night before the incident in New York. After a 20-hour flight, it arrived at the border city of Monterrey in Mexico in the early morning two days before the incident. , landed at Monterrey International Airport.

The entry information also shows that in the entry application for this plane, the goods filled in are tea and coffee beans, which are specialty products of Sri Lanka.

After seeing this information, Li Yalin said excitedly, "There is a high probability that this is the plane!"

Abbas also agreed, "This plane is Boeing 777200lr, which is Boeing's longest-range aircraft. 20,000 kilometers is not impossible, and it is very common to convert passenger aircraft to cargo aircraft, but it stands to reason that ultra-long-range passenger aircraft should not be modified. Because ultra-long-range passenger aircraft adds more fuel reserve space, the available commercial load is not large. , using this kind of aircraft to convert it into a cargo plane doesn't care about the load, but only about the efficiency. This type of aircraft can basically fly directly to any two airports on the earth."

Speaking of this, he paused slightly and said, "Inspector Li, This plane seems to be prepared for global maneuvering, combined with the previous behavioral characteristics of that mysterious organization, I think your series of inferences, including this result, are correct! It is the target we are looking for!"

Li Yalin nodded, "I think it's it too!"

Abbas couldn't help but exclaimed, "Inspector Li, you are really amazing! You can lock the plane used by the other party in such a short period of time. This mysterious organization may never have dreamed of it. They It will be exposed so quickly!"

Li Yalin said seriously, "The main thing is that there is still May 47. With him, he can gradually help me find clues and help me to conduct cross-comparison."

"This organization definitely did not expect that their dead man Some people actually survived, and they wouldn't believe that the dead can reveal any useful key information, let alone that someone would find their plane. If there is no information on May 47, we would even think that these dead people came from American mainland."

"And, normally, even if someone were investigating dozens of dead people who suddenly appeared in the United States, they would never have thought that it was related to a regular cargo plane flying from Sri Lanka to Mexico. At this point, we can use the earthquake information from the past so many years to locate the approximate location of the dead and narrow down the scope a little bit. "

Abbas sighed, "Information is important, but your ability to extract information from limited information and keep narrowing the scope is the key to finding clues, so you are called a Chinese detective for no reason!" Li Yalin smiled humbly, then pointed to the

cargo plane's registration number and company, and said, "By the way, Master abbas, the plane's registration number starts with 9v. If I remember correctly, this is the registration of a Singapore aircraft." number, so this aircraft must be registered in Singapore, and the ownership shows that its company is ytairles. Please check where the company is registered and the company's public information. Since it is a normally registered company, then Public information should be relatively easy to find. "

"Good!" Abbas also had a feeling that he could see the moonlight through the fog, and he couldn't hide his excitement and said, "Inspector Li, wait a moment, I'll use the computer to check it!" Having

said that, Abbas opened his laptop and searched for the company registered as ytairles on Singapore's corporate information query website. The

information shows that this company is registered in Singapore and is a Chinese company. An aviation logistics company called Yuantai International Express.

This company has a total of three shareholders, all of whom are Chinese. There are six registered cargo aircraft under the company's name, and all of them are the ultra-long-range version of the Boeing 777. After

Abbas found out this information, he said to Li Yalin, "Inspector Li, if you find these three shareholders, will you be able to dig out clues about the mysterious organization?" Li Yalin said with a solemn expression, "

I think these three shareholders should be false identities. It is impossible for such a cautious organization to leave any substantive clues related to people in this link. The reason why a company must be registered and every It is their last resort to have a plane registered. After all, aviation safety is a major issue that most countries in the world attach great importance to. Without complete procedures, their planes would not be able to fly at all. "

Abbas asked him," what should we do next? "

Li Yalin thought for a while and said, "I met Young Master wade before I came, and he and I both felt that we should not have direct contact with each other during the investigation process, so as not to be exposed in advance, so I'd better report it to him and take a look at him. Any ideas!"
