

The Amazing Son In Law Chapter 5191 -

After nearly two hours of flight, the helicopter slowly landed at the palace of the Nordic royal family in Bergen, the second largest city in northern Europe.

The royal palace is located in the suburbs and occupies a large area. However, due to the decline of the Nordic royal family in recent years, and the Congress has been cutting the royal family's budget, the palace also seems to be a bit of a failure due to the lack of repairs.

The Nordic royal family's own financial situation is not optimistic. Although the assets have more than one billion euros, most of them are discounts of real estate, and these real estate, the Nordic royal family cannot be sold for a lifetime. For example, they are in the capital city of Oslo. The palace and the palace in Bergen are valuable, but once they sell their ancestral property, they will definitely be spurned by the Nordic people.

It's as if the English royal family turned their heads and sold their Buckingham Palace, which is bound to cause an uproar.

After the helicopter landed, Charlie could feel the shortage here.

There are only a few staff on duty in the huge palace, and in the square in the center of the palace, the stone paved floor has many damaged parts that have not been repaired. What is even more outrageous is that even the street lamps that illuminate the surrounding area have more than three. One part is not bright.

Helena did not expect that this palace is now so dilapidated.

Since she lost her support in the Nordic royal family, she has not been to this palace for many years. Seeing such a dilapidated scene, she was a little embarrassed for a while, and she could only say to Charlie a little ashamed, "I'm sorry, Mr. Wade, this place has been in disrepair for a long time. , the state of maintenance is not very good, please don't mind."

After Helena just finished the enthronement ceremony, the butler mentioned the situation of the palace to her, hoping that the royal family would allocate 10 million euros to carry out the work on the palace. Repair.

But Helena rejected the other party's proposal in order to reduce the expenses of the royal family.

At that time, she even hoped to take out the funds and do more activities and publicity to enhance the influence of the Nordic royal family.

But she never thought that one day this palace would have an intersection with Charlie.

If she knew there would be today, even if she broke a penny in half, she would have to squeeze some budget to repair the palace, at least not make it look so shabby.

charlie also saw that Helena was a little embarrassed, so he smiled and said, "I think this place is very good, it has Nordic local characteristics, and it looks like a real historical building, unlike those tourist attractions, which are all modern antiques. Although the building is magnificent, it feels a little nondescript."

Helena nodded lightly and introduced, "This place has a history of more than 300 years. Although it has undergone many repairs, the overall framework and large Part of the structure has not changed, and the last time it was repaired on a large scale should be back in 1980." After

speaking, Helena said with some emotion, "But I haven't been here for many years, since my father I haven't come back since I passed away."

charlie nodded, seeing that there were still two or three hours before the other party landed, he smiled and said to Helena, "It's still early, why don't you show me around?"

"Okay!" Helena agreed without hesitation and said with a smile, "Although I haven't been here for many years, my memory of this place is still very deep."

Just as charlie, accompanied by Helena, visited this ancient palace , The Boeing 777 of Yuantai International Express is crossing the sky over Finland, about 1,300 kilometers away from Bergen.

Abbas and the twenty Wanlong Palace soldiers he had carefully selected had already landed in Osu City at this time, and the first thing he did after landing was to send the trajectory of the plane of Yuantai Express to charlie.

charlie also kept his composure until the other party had only an hour's flight left, and temporarily said goodbye to Helena, dressed in black and drove to Bergen Airport alone.

According to Li Yalin's analysis, the last time they went to New York on May 47 to carry out the mission of this mysterious organization, they were first transported to Mexico by Far Tai International Express in the form of freight, and then smuggled into the United States from Mexico by land.

Therefore, charlie and Li Yalin both felt that the other party's real destination this time should not be Bergen, Bergen, and most likely it was just a springboard for their mission this time.

It is very likely that they will also transport the dead to Bergen by freight, and then switch to other channels to transport the dead to other cities, or directly out of Northern Europe.

Therefore, charlie's plan was to sneak into Bergen International Airport before the plane landed, keep an eye on the plane, the people and goods unloaded by the plane, and see where their destination is and what their goals are. who is it.

Although Bergen is the second largest city in Norway, after all, the population is only a few hundred thousand, so the scale of Bergen International Airport is not large.

The airport is built near the sea, the runway is in the north-south direction, the terminal building is located in the center of the airport, and the maintenance and logistics areas are on one side of the terminal building.

Since Northern Europe is one of the EU countries, and Bergen's international flights are almost all within the EU, the customs management is relatively loose, and international flights landing here, whether passenger or cargo planes, have almost no strict entry screening.

The airport has only three normal access paths, one is the terminal building for normal passengers, the other is the staff channel for internal employees, and the other is the professional entrance and exit for goods.

The security situation of the airport is also very streamlined. Most of the entire airport is surrounded by iron fences. The steel blade barbed wire and security monitoring equipment are the main security measures here.

As for the security personnel, the overall scale is not large, and the patrols are not very active. In most cases, cats are in the monitoring room staring at the monitoring and security equipment, and if there is a situation, they will immediately rush to deal with it.

However, because the security equipment is becoming more and more advanced, even if there are no personnel patrolling, basically no one can pass the monitoring of these equipment silently, so the airport has almost never had illegal intrusion.

Even if there are occasional people who try to enter the airport through the peripheral security measures, they are accurately identified by the security equipment. Often, the security personnel are alerted as soon as they approach, and when they arrive, the people are often still On the iron fence, find a way to break through the sharp-bladed barbed wire.

The Amazing Son In Law Chapter 5192 -

Therefore, even if there are ordinary people who want to sneak into the airport, there is no possibility of success at all.

Of course, this was before meeting charlie.

For charlie, this kind of iron fence more than three meters high is useless at all. He only needs to jump up gently to jump over the iron fence and avoid the security monitoring equipment on both sides.

So, 20 minutes before the plane landed, charlie easily blended into the airport, waiting for the arrival of the Boeing 777 on the side of the dark runway.

Since it was already more than two o'clock in the morning, the entire airport had fallen into silence.

charlie was wearing wireless headphones at this time, and the headphones were communicating in real time with Abbas and Li Yalin.

At this time, Abbas told charlie, "Mr. Wade, according to the entry and exit information of the airport, the entry and exit of passenger flights have ended tonight, and the rest are all cargo flights, and those that will enter the port within the next three hours. There are only seven cargo planes, and the time interval is very long. The next flight to land is the Boeing 777 of Yuantai International Express."

charlie replied in a low voice, "Before the plane lands, let's check the information again."

" Alright Mr. Wade."

Five minutes later, charlie could already see a slow-moving spot of light in the southern sky.

He cross-compared with Abbas, and according to the flight trajectory, it was undoubtedly the plane.

Then, the spot of light got closer and lower.

However, the plane adjusted its direction before landing, flew from the south side of the airport to the north side of the airport, and landed against the wind from the north side of the runway after fifteen minutes.

charlie's eyes kept staring at the plane. After seeing it landed, he turned on the reverse thruster, and then quickly reduced the speed to the taxiing speed. Then, under the guidance of the guide car, he got off the track and taxied all the way to the cargo yard on the south side of the airport.

At the same time, charlie followed the plane all the way, traversing quickly in the darkness.

A few minutes later, the plane came to a standstill on the open tarmac outside the cargo yard.

Several stevedores have been driving loading and unloading trucks and transport vehicles, waiting here in advance.

After the door of the cargo plane is opened, these stevedores lift to the side of the cabin through the lifting and unloading truck, and after opening the door, they begin to unload a group of goods that have been boarded with pallets one by one from the cabin. .

Since the transportation of the freighter adopts a modular method, all the goods are packed according to the board. Generally speaking, it is a special aluminum plate of three meters one by two meters four. Good, the whole board is transported to the cabin. The part is fixed, and the whole board is unloaded to improve the loading and unloading efficiency when unloading.

The plane quickly unloaded four pallets, and each pallet was nearly full, with no apparent abnormality.

charlie said in a low voice, "At the moment, the cargo unloaded from the plane is all serious, and I don't see anything extraordinary."

Abbas couldn't help asking, "Mr. Wade, will the other party Is the dead man hidden in the cargo?"

After charlie released some spiritual energy to investigate, he said with certainty, "There is no one in these cargoes, at least none of them have been unloaded yet." After

speaking, charlie's brows suddenly wrinkled. , couldn't help muttering, "It's a bit strange." What

made charlie surprised was that in order to unload these pallets, the following stevedores even took turns taking turns. Whenever a pallet was unloaded, they would To change someone up.

Generally speaking, skilled work should be a reasonable division of labor, special control equipment responsible for operating equipment, special handling responsible for handling, and special transportation responsible for transportation.

This kind of behavior of everyone taking turns and going to the cabin to transport the pallets one by one is very strange.

charlie immediately relied on the pervasive perception ability of aura and found the clue.

It turned out that there were eight people hidden in the cargo compartment of the plane at this time!

It's just that these eight people have been hiding at the end of the cabin of dozens of meters, and it is impossible for the outside world to see them.

Moreover, every staff member who goes up to carry the pallet will exchange with a person in the cabin after entering the cabin. He hides in the cabin himself, and the person who replaces him comes out and pushes out a new board of goods. .

charlie also immediately understood their routine, and replaced these staff with their own people.

The staff who were replaced were hidden in the plane, and those who were replaced could use their identities to leave the airport in a grand manner without leaving any record of entry.

What's even weirder is that after careful observation, charlie found that although people did exchange inside, the people who went in and the people who came out were dressed, dressed, and even looked exactly the same.

After more careful investigation, charlie discovered that the people who were swapped out had very realistic silicone masks stuck to their faces!

It is also through this realistic silicone mask that they have almost the same facial features as those of the staff, and the naked eye can hardly see any difference.

Seeing this, charlie thought to himself, "Could it be that these airport staff are also members of that mysterious organization?"

Soon, the last mysterious person who was replaced gave charlie an answer with practical actions.

Immediately after completing the swap with the last staff member, he pulled a dagger from his cuff.

Immediately afterwards, his right hand waved suddenly, and the eight staff members who were replaced were instantly blocked by him!

The Amazing Son In Law Chapter 5193 -

As the eight stevedores were killed, the killer who turned into a stevedore walked out of the cabin calmly.

After coming out, he skillfully locked the huge hatch and took the elevator down to the ground.

After rendezvous with his seven companions who had come down ahead of schedule, the eight of them turned into stevedores and drove away the transport truck that had just been filled with pallets in an orderly manner.

At this time, the pilot in the Boeing 777 had already started to apply to the tower for takeoff, requesting to take off immediately and return to Cyprus.

Since the original flight plan of the plane was to return immediately after unloading, the tower did not have any doubts and let it go directly, so the plane restarted the engine, carried eight corpses, and taxied towards the end of the runway, and soon rose into the air and disappeared. in the darkness.

At the same time, the eight fake stevedores skillfully drove the transport vehicle to the designated entry point after completing the stealing, and then struttingly walked towards the exit.

At this time, charlie, who was hiding in the dark, was very puzzled.

He didn't understand why each of the eight people sent by the mysterious organization to perform the mission was in a state of sobriety and freedom.

If according to what May 47 said, in order to prevent the dead from remembering the location of the station when entering and leaving the station, the mysterious organization will use drugs to make them completely unconscious before letting them go out to perform the task. .

However, this rule obviously does not apply to these eight people.

Could it be that these eight people are not dead men?

From the basic logic, since the mysterious organization is not worried about these people remembering the location, it proves that the status and importance of these people in this organization is higher than that of the dead.

And since this mysterious organization did not guard against these eight people on these issues, then they did not need to borrow Bergen as a springboard, which also meant that Bergen was the destination of their trip.

As for the eight stevedores who were just killed, they definitely did not die innocently, because they themselves were cooperating with these eight people to hide their identities.

In charlie's view, these eight people should have only temporarily helped the eight killers enter the country. After they return from their missions, they will be exchanged out, and then they will be able to complete all this without knowing it. , and leave no clues.

So, he immediately instructed Abbas to find a way to investigate the eight stevedores who were on duty at the airport tonight, check their details, and see where they came from.

After instructing Abbas, Charlie immediately followed the eight people and left the cargo yard of the airport.

Along the way, Charlie found that apart from these eight fake stevedores, no other workers could be seen at the airport, and no one checked or stopped these eight people from leaving.

The eight people successfully walked out of the freight yard. At this moment, a pure electric-driven van was parked outside the freight yard. One of them walked to the left front of the truck, reached out and touched the top of the tires. He took the car keys, and then he gave the other seven people a wink, and the other seven immediately understood.

The man who got the key directly opened the door of the cab and sat in, while the other sat in the co-pilot. As for the remaining six, he directly opened the rear cargo door of the van and jumped on them one by one.

Immediately afterwards, the man in the cab hung up the forward gear, stepped on the accelerator, and the body shook slightly as the wheels turned.

But none of these eight people knew that at the moment when the body shook slightly, Charlie, dressed in black, landed on the roof of the van like a fallen leaf.

No one noticed anything abnormal. The driver stepped on the accelerator, and the motor-driven truck only made a slight motor rotation sound and quickly drove out.

After the car left the airport, it did not drive in the direction of the city, but went all the way to the southwest and entered the suburbs south of Bergen.

Due to the long and narrow terrain of northern Europe, most of the land is within the Arctic Circle, so the agricultural strength is relatively weak.

However, Bergen is located in the southern part of Northern Europe, the weather is relatively mild and the terrain is relatively flat, so most of the suburbs here are farms of a certain size.

The degree of agricultural modernization in the West is relatively high, so there are few relatively concentrated communities in the suburbs of Bergen, and because the farms cover a relatively large area, all the households here are relatively scattered, only one household is only a few hundred kilometers away.

Charlie, who was lying on the roof of the car, looked at the surrounding environment and became more and more puzzled.

This mysterious organization sent eight killers from thousands of miles away, and even killed eight airport stevedores, but they drove their cars to such a large and sparsely populated countryside. What would their goal be?

At this time, the speed of charlie's truck suddenly slowed down a lot, and the lights of the vehicle suddenly turned off.

Since the pure electric car does not have the roar of the engine, the biggest noise when it is driving is the tire noise generated by the tires and the road, as well as the low-volume whistle when the motor rotates at high speed.

Once the speed of the vehicle is reduced, the tire noise and the whistle of the motor will also decrease rapidly, so the pure electric truck with the lights turned off at this time is almost silent as a ghost on this quiet night road.

charlie suddenly became tense, these people were suddenly so cautious, there was only one possibility, and that was getting closer and closer to the goal.

The Amazing Son In Law Chapter 5194 -

At this time, charlie heard the man in the cab, sitting on the co-pilot, say in Chinese, "There are still two kilometers to go, stop first and let the brothers start getting the equipment!" The

truck stopped immediately on the side of the road. Then the two got out of the cab at the same time and ran quickly to the rear of the car.

The driver tapped the tailgate lightly with his fingertips, and the tailgate immediately opened from the inside.

The six people in the cargo box had already changed into a full set of combat equipment at this time. Body armor, helmets, and firearms were almost the same as the equipment they carried when May 47 assassinated charlie's grandfather and grandmother's family.

After the two jumped into the cargo box, the others immediately handed the prepared equipment to them and quickly helped them put it on.

After the two were armed to the teeth, the man who was sitting in the co-pilot said in a very serious tone, "Everyone, two by two, check each other's equipment, and there must be no negligence!"

"Follow!"

Others The person responded immediately, and then there was a sound of clips being inserted and firearms being loaded in the cargo box.

After everyone's equipment inspection was completed, the man in the lead said, "I will finally repeat the mission requirements to everyone. The British Lord's requirement is that except for the target, which must be captured and taken away alive, no one else will be killed, and none of them will be left behind! I understand. Is it?" The

other seven said without hesitation, "Understood!"

The man said seriously, "Today is our great luck! This time we have to catch a living. It is said that the British Lord has been searching for the target for decades! The British Lord has been until today. We only got the exact news from the other party, and we assigned this important task to our cavalry guards. We must go all out and never let the hero down! This is an excellent way for our cavalry guards to revive their heroism in front of the hero. Opportunity!" The

other seven looked stunned, and each of them said with excitement, "Don't worry, Commander, we will do our best and never let the Lord down!"

"Okay!" The man known as the Commander smiled boldly "Brothers, make achievements tonight!"

After he finished speaking, he looked at the driver and said, "Little Four, according to the plan, the car will be parked here temporarily, you can sneak over with us, if the mission goes well, you will You can go back and drive." The driver said without hesitation

, "Okay commander! I understand!

"

Eight killers dressed in black, holding black guns and wearing black masks, jumped out of the car silently, and then quickly disappeared into the farmland by the roadside, moving towards the fast and silent movement.

charlie was lying on the top of the truck, staring at the figures of the eight people, ready to come with a mantis to catch cicadas, with a oriole behind.

At this time, Abbas's voice came from the earphone, "Mr. Wade, my subordinates have investigated the identity information of the eight stevedores on duty, and the information shows that these eight people are allHe is an out-and-out Nordic native citizen, and his historical files are very clean, unlike someone with a mysterious identity and unknown origin. "

Furthermore, their bank accounts suddenly received one million euros in cash from an American company this afternoon. The time for the payment was only earlier than the time when the plane applied for the Bergen route." After an hour, I suspected that they were temporarily bought by huge funds, so I cooperated with these people. With

that said, Abbas said again, "By the way, Mr. Wade, the American company that pays them money is a company controlled by your little aunt's family. When

charlie heard this, he was slightly taken aback, and he couldn't help sighing, "It seems that my little aunt's line, they are not afraid of being exposed at all. If they dare to remit money so blatantly, it is most likely that all risks have been isolated. I'm afraid I can't find any valuable information. "

Abbas" subordinates feel the same way. "

charlie said," According to the timeline, this mysterious organization should have temporarily bought these eight stevedores earlier today, and then within four hours before takeoff, based on the facial features of these eight people, they made a Inverted masks made of silicone, and then let the eight killers enter quietly in this way. "

And these eight stevedores originally wanted to cooperate with them to play a day and night, and then easily earn a huge amount of money, but I didn't expect that although this organization was willing to spend money, it would not leave any living holes at all. The huge sum of one million euros in it was only earned and spent. Having

said this, charlie couldn't help but sigh, "This organization is really meticulous in its work. The plane they came with had just taken off again, and the information it left at Bergen Airport was after the eight people unloaded the cargo. , it took off and returned normally, and it took off before the eight people disappeared, so on the surface, there would be no suspicion. Even if the eight people were finally found missing, no one would suspect the head of the plane. superior. At

this time, Li Yalin's voice came, and he said, "charlie, the cargo plane of Yuantai International Express in Nigeria has just applied for a flight that will take off in 20 minutes, from Lagos, Nigeria to Gothenburg, Sweden." . "

charlie frowned and asked, "Should Sweden be next to Northern Europe?"

"Yes!" Li Yalin said, "Gothenburg is about 600 kilometers away from your current location."

charlie asked again, "It probably takes a plane to fly from Nigeria to Sweden . How long?"

Li Yalin said, "It looks like more than seven hours."

charlie nodded, "It seems that after these eight people finish their missions, they will go all the way to Gothenburg, Sweden to meet another plane." After

that, charlie slightly With a smile, he said jokingly, "Looks like this plane is going to run for nothing!"
