

The Amazing Son In Law Chapter 5237 -

charlie's words stunned the seven Xiao cavalry guards and Wusiqi sitting on the other side!

They didn't know why charlie would suddenly ask such a question, but the expressions of these eight people were a little excited at this time.

Wu Siqi was the first to speak, clenched his fists and said sharply, "Mr. Wade, if it is true as you said, we dead soldiers will definitely organize to break out of the tight encirclement! Even if we die, we will die under the sun!" Among the

Xiaoqi guards The person at the head also subconsciously said, "That's right, Mr. Wade... If this happens, the Xiaoqiwei will definitely take the opportunity to fight to the death!"

Wu Siqi sighed, "For all dead soldiers, the shackles of the organization are mainly It is the poison in the body and his own family. Once the trouble of the poison is solved, the dead man will be able to use his own strength to desperately defend the safety of his relatives, and he will have the opportunity to lead his family to escape. The greatest dream of dozens of generations of dead warriors' ancestors, once given the opportunity, every dead warrior will go all out for this dream!"

Wu Siqi's words made several other Xiaoqi guards agree with them and empathize with them.

Like these dead men, they all longed for the day when they could completely break away from the control of this mysterious organization.

The reason why he never stood up against the organization was mainly because the poison in his body was powerless to resist.

It's not like they didn't have seniors who did this before, but whether they resisted or escaped, the maximum lifespan of each of them after escaping is only seven days.

Therefore, this kind of thing that has no chance of success at all, over time, no one is willing to do it.

But if the situation charlie said really happened, and the poison in the body was suddenly completely eliminated, they would stand up and resist to the end like dead soldiers.

Ye Chen nodded in satisfaction after seeing the attitudes of the few people, and asked, "Does the Jiedu envoy need to take antidote regularly?"

"I've never heard of it." Being mysterious and keeping a low profile, we have no way of knowing whether he will also take antidote like us."

Yechen asked again, "Then how is the antidote distributed to you and all the dead soldiers after it is delivered?"

The man explained, "Every time the antidote is delivered, Jiedushi personally and is responsible for transporting The postman of the antidote is docked. The antidote is packed in ten pieces, wrapped in waterproof wax paper, and then sealed with special wax and seal. Every time the antidote is delivered, the Jiedu envoy will personally check the authenticity of each antidote. Packaging situation, after confirming that there is no problem, give these antidotes to his bodyguards, and then his bodyguards will personally distribute them to us knight guards."

He continued, "When the antidotes are distributed , we will line up according to the organizational system to receive the antidote, and after receiving the antidote, we must take the antidote immediately, and we must not take the antidote away quietly."

"Wait until we take it under the supervision of Jiedushi's personal guards After finishing the antidote, we have to work with them to distribute the antidote to the dead man and his family members. The overall process is basically the same. The dead man and his relatives must also take the medicine under our supervision. The whole process is over."

Li Yalin on the side couldn't help asking, "I have a question to ask, since you can only live for 7 days without the antidote, why do they still supervise you? Do you want to take the antidote? Is there anyone who deliberately refuses to take the antidote they gave you?"

The man smiled bitterly and said, "Whether it is us or the dead, we have always wanted to resist, although we know that I don't have the ability to fight against the entire organization, but I still have some fluke mentality. Therefore, there have been many dead men who deliberately did not take the antidote, leaving the antidote for many people to one person, and then trying to help that person escape. When the situation happened in the station, I hoped to ask for help from the outside world and expose the inside story of the entire organization in exchange for help from the outside world, but all failed without exception. Someone supervises."

Hearing this, charlie said, "That is to say, the antidote given to you has a special anti-counterfeiting method, but the specific method of anti-counterfeiting is only known by the Jiedu Envoy, so after the antidote is delivered , he will carry out the docking and verify the authenticity, and after confirming that there is no problem, it will be distributed to Xiaoqiwei first, followed by the dead and their families."

"Yes." The man nodded and said, "The whole process is actually very strict."

charlie asked again, "In your impression, what are the anti-counterfeiting features of the antidote?"

"This brother..." The man hesitated for a moment, then spoke Said, "I'm not sure what anti-counterfeiting features are there. Although every medicine is opened in front of us and distributed to us, the sealing wax used to seal the wax paper is reheated every time. , you also know that once that kind of thing is heated, the original pattern printed on it will no longer exist, so I don't know what the sealant looks like on the original medicine seal."

charlie nodded lightly and said, " In this way, it should be impossible for me to cheat the Jiedu envoy without showing any signs of ostentation. If I find a link in the middle to change the medicine, it will definitely destroy the original situation to a certain extent. The anti-counterfeit marks on the seal, when the Jiedu envoy gets the medicine, he will realize that there is a problem immediately."

The Amazing Son In Law Chapter 5238 -

"Yes." The man agreed, "We don't know how many anti-counterfeit marks will be on the medicine seal, it is very likely It's not just a kind of wax seal, as long as there is a slight negligence, all previous efforts will be wasted."

Hearing this, Li Yalin couldn't help but said with a look of regret, "If it is really possible to relieve the more than a thousand dead soldiers and more than two hundred knight guards Even if you don't take them for your own use, once they escape, it will be enough for this organization to drink a pot, thousands of people escape, and they can't be caught, and then they will be in chaos."

charlie couldn't help but He laughed and said, "Actually, for the organization, even if all these thousand people run away, it doesn't matter. After all, this is just one of their many dead soldiers' camps. Even if they are all uprooted, it won't hurt. If one or two people ran away, in order to keep the station, they would definitely pursue it desperately, so as not to leak the secret, but once the entire station ran away, the station would be of no value to them. A worthless station should be given up directly. That's good, it's not a problem for them." After speaking,

charlie said again, "It's like the United States has so many military bases around the world, if any of them are taken over by others, for the United States, Apart from making the White House tense, angry and heartbroken, it will not bring any real harm to the overall national strength of the United States."

Li Yalin was slightly taken aback, then nodded and said, "Master Ye is right, the power of this organization is beyond imagination, and a mere resident may be nothing."

charlie smiled playfully, and said casually, "Since there is no other way If you don't hide it from Jiedushi, then simply turn him into one of your own, and in this way, you can truly hide from the world!" The

leader Xiaoqiwei asked puzzledly, "Mr. Wade, how do you plan to realize this idea? Jiedu Even the big officials in the frontier organization in the organization have the power of life and death over the entire resident, how can such a person become his own?"

charlie smiled and said lightly, "You don't have to worry about this, as long as I see you Once I get to him, I can make him obey me."

Using spiritual energy to brainwash a person is charlie's time-tested trick.

If I can brainwash the Jiedu Envoy of Cyprus and make him his own puppet, and then take advantage of the opportunity to detoxify the poison in the body of all the dead soldiers and the knight guards, then these dead soldiers and the brave knights will be able to let themThe cavalry guards joined him, but at the same time, they had to stay in the station in Cyprus, and the Jiedushi, who became puppet, continued to act as normal for the organization.

In this way, not only can they disintegrate one of their stations, but they can even place an eye under their noses. Once the organization has a mission to Cyprus, they can know it immediately.

Thinking of this, charlie asked them, "If the dead warriors and the knight guards are really eager to break the shackles as you said, I can give them this chance at that time, but the premise is that they must swear allegiance to me and join the ten thousand Longdian, if they agree to stay in the station after detoxification and prepare for the complete destruction of the organization, do you think they will agree?"

Wusiqi said without hesitation, "Don't worry, Mr. Wade, I believe that all the dead soldiers will die." I won't refuse!" The

leader of the Xiaoqiwei said with some concern, "Mr. Wade, to tell you the truth, in the team of Xiaoqiwei, there are already some people who have the idea of continuing to climb up. Their hearts and organizations are the same. Those who came very close, only want to make contributions to the organization, and then be able to reach a higher level, if these people are not eliminated, I am afraid that bad things will happen in the future."

charlie nodded, and said calmly, "These are easy to solve, when the time comes You only need to do a little trick to make these people come forward."

He said, "When will you deliver the medicine next time?"

“Four days later.” The leader Xiaoqiwei said, “Normal Under normal circumstances, we will take the next round of antidote five days later, and the medicine will usually arrive the night before taking the medicine, and after completing the verification, we will take the medicine intensively from 4:00 am to 8:00 am.”

charlie Asked, ” Medicines are shipped from Turkey like other supplies, right?

“

He smiled and said, “In four days, I will go there alone.”

As he said that, he looked at Abbas again, and said, “Abbas, you should prepare for the next few days and bring people to wait for my news on the high seas. Once I solve the problem, you will take people ashore and join me Take over that copper mine together.”

Abbas said without hesitation, “Okay, Mr. Wade, my subordinates must go all out!”

charlie nodded and said, “I need a few days to prepare the antidote for thousands of people. After a while, in four days, I will fly directly to Beirut, Lebanon, and Abbas will prepare a small boat for me in advance, and I will cross the sea alone to meet them!”

Hearing that charlie wanted to act on his own, Abbas quickly said, “Mr. Wade, there are still many uncertain factors in the other party’s situation, and they are numerous and heavily guarded, why don’t you ask your subordinates to choose a few elite soldiers to go with you?” Go!”

charlie waved his hand, and said seriously, “The success rate of this kind of thing is the highest when one person acts, and even if it fails, one person can retreat unscathed. Once there are more people, the chance of being exposed will increase greatly. Not only do I want to ensure that this matter is as successful as possible, but I also want to ensure that if this matter fails, there will be as few clues as possible.”

Li Yalin also agreed at this time and said, “I support Young Master Wade’s point of view. According to my years of experience as a police officer, most of the major cases that have never been solved in the true sense are cases involving a single suspect. As long as this person is professional enough and capable enough, he can take it easy Complete his goal without leaving any valuable clues for the police, and once this single-person action becomes a gang crime, the chances of leaving usable clues will increase exponentially.”

Speaking of this, Li Yalin said again “To use an inappropriate analogy, almost without exception, the murderer behind the double-digit serial killings of the victims is the same person.”

Hearing this, Abbas could only nod and said, "If that's the case, then The subordinates are making preparations in Beirut. If Mr. Wade needs the Wanlong Temple any time, the subordinates must bring people there as soon as possible!"

charlie nodded and said with a smile, "I really have something that needs to be done in Beirut in advance. Get ready."

As he said that, charlie said seriously, "Abbas, on the day of the operation, you bring Wusiqi and these seven knights to wait for me on the high seas. Once I succeed, you take them all to the copper mine, if you want those knight guards and dead soldiers to completely surrender, you need them to show up and speak."

Abbas said without hesitation, "Okay, Mr. Wade, my subordinates have arranged a cruise ship in advance and will wait for your news on the high seas."

charlie clicked He turned his head, looked at Wusiqi and the other seven Xiaoqi guards, and said, "When the time comes, I will have to work hard for you all. If this matter can be successful, I will need you to manage this station for me."

All eight agreed without thinking.

charlie's bold and radical plan made them all very excited. If the disappearance of the poison in their bodies broke the shackles that the organization had shrouded them for many years, then following charlie to take down the entire resident is the first step to launch a counterattack against the organization. step.

Afterwards, charlie asked several people, "Everyone, can you describe to me what the antidote that this organization usually takes for you looks like?"

Wu Siqi took the lead and said, "We are taking round pills with a diameter of about About one centimeter, the color is dark brown, and the surface has a certain luster."

Several other Xiaoqi guards also nodded, and the leader said, "We take the same."

charlie frowned, and took out a blood-scattering Jiuxin Pill came, and asked, "Does it look similar to this?"

Wu Siqi nodded, "Basically, it's very similar, but the color of your pill seems to be better."

charlie thoughtfully Said, "It seems that the antidote they gave you is also made using traditional Chinese medical techniques."

The Amazing Son In Law Chapter 5239 -

Hearing that Charlie wanted to act on his own, Abbas quickly said, "Mr. Wade, there are still many uncertain factors in the other party's situation, and they are numerous and heavily guarded, why don't you ask your subordinates to choose a few elite soldiers to go with you?" Go!"

Charlie waved his hand, and said seriously, "The success rate of this kind of thing is the highest when one person acts, and even if it fails, one person can retreat unscathed.
