

The Amazing Son In Law Chapter 5252 -

Every day when Wu Siqi was in the dead man's station, he was trying to find a way to confirm the information from the outside world, or trying to find a way to record the time, and he was always thinking about how to escape.

Therefore, Wusiqi will be very sensitive to any disturbance in the surrounding environment.

But Duan Liye joined the Huben Camp completely voluntarily, and he had no idea of escaping from birth at all. He even regretted that he could not stay in the Huben Camp for another ten years. Pays too much attention to the surroundings.

In desperation, Charlie asked him again, "How many warriors like you are there in the entire Huben Camp?"

Duan Liye thought for a while, and said, "During the 20 years I was there, there were more than 30 people one after another. About twenty people at most."

Charlie frowned and asked, "That is to say, Huben Camp has trained at least dozens of dark realm masters."

"Yes." Duan Liye nodded, "There are at least forty or fifty."

Charlie was surprised at the organization's strength. With a strong reserve, he asked in surprise, "Since there are so many masters in the dark realm, why did none of the people sent in these two missions reach the dark realm?"

Duan Liye explained, "Although the masters in the dark realm there are many, but at least half of the people have been incorporated into the Shenji Battalion. It is said that they will be arranged to serve at the core base of the organization. Some of the rest will be incorporated into the Jinyiwei, and some will be allocated to the Five Armies. In fact, there are only a few dark masters in each Dudu's mansion, and each Dudu's mansion will try to keep the dark masters by his side as personal bodyguards, and only designate one or two as special envoys. , go out to perform various tasks like me, so in general, the masters of the dark world are not enough."

Charlie was shocked when he heard this, knowing that this organization is very strong, but he didn't expect it to be stronger than he imagined.

Immediately, he regained his composure and asked Duan Liye, "Then what is the establishment of the Jinyiwei?"

Duan Liye said, "Although the Jinyiwei does not serve by the Lord's side, they are directly dispatched by the Lord. After they leave the Huben Camp, they will be arranged in other identities. " to all over the world, but I don't know more about it."

Duan Liye said, "As for the time in New York, it was mainly because of the assassination. The target has a great influence in the United States, and that mission is to destroy the other party. Once successful, this matter will inevitably cause a huge sensation in the world. Therefore, in order to avoid exposure, the organization will When things attract global attention, they never send martial arts masters, but always send dead soldiers

; They have the actual combat ability no less than that of martial arts masters, so if they are allowed to go out, once things are done, they can easily interfere with the public's sight and make the public spontaneously define the murderer as a killer, mercenary, or some extremists with weapons. In short, it will not be related to martial arts masters, so it will not expose the organization to risk. "

Speaking, Duan Liye said again, "As for the time in Northern Europe, it was indeed quite sudden. The information was obtained suddenly, and there was only a few hours of preparation time before departure. It happened that we had a plane in Cyprus at that time, so the organization sent The Xiaoguards there went there in disguise; "

"Moreover, the information obtained by the organization is also somewhat biased. The information was sent by a follower next to the target person. He said in the information that the most powerful of them is only the five-star warrior. Level, and there is only one person, the strength of the eight knights, even the eight five-star warriors cannot be their opponents, and the enemy is open and we are dark, it is impossible to fail, so I sent them there. Thinking of one death and seven disappearances..."

charlie thought of Lin Wan'er (Alani), and the ring Lin Wan'er (Alani) gave him, and asked Duan Liye, "How much do you know about the time in Northern Europe? What is the background of that Lin Wan'er (Alani), do you know? "

Duan Liye shook his head and said, "I don't know what Lin Wan'er (Alani) is. As for the time in Northern Europe, I only know that it was the person whom the Lord Ying called for. This is the first time I have encountered it in the many years since I joined the organization. I don't know..."

Duan Liye's explanation made charlie even more confused about Lin Wan'er (Alani) (Alani) identity.

He even regretted it a little.

He regretted letting Lin Wan'er (Alani) and her grandfather go directly.

Although in his opinion, he had already used psychological hints, and the grandfather and grandson must have nothing to hide from him, but at that time, time was short and he didn't have enough time and opportunity to ask more questions.

But it's too late to regret it now, so I can only ask as much valuable content as possible from Duan Liye.

So, Charlie looked at Duan Liye and continued to interrogate him, "Do you know why your hero wanted to arrest her? Is it for her, or for something on her body?"

Duan Liye shook his head, "This I don't know about this matter, even my superiors in Turkey don't know about it. We only know that it's a god-sent opportunity to assign that mission to the Governor's Mansion of the Right Army. Unfortunately, it failed in the end."

Charlie knew that Duan Liye couldn't lie, so he asked him, "Do you know where the headquarters of the Qing Dynasty is?"

"I don't know." Duan Liye shook his head and said, "I don't have any at all. I've been to the headquarters, but I've only been to the Huben Camp, but I don't know where the Huben Camp is." After

that, Duan Liye continued, "I don't even know the exact location of the Youjun Commander's Mansion in Italy. Strict, people of any level can only know what level can know, and it is impossible for us to know the secrets of a little bit higher."

Charlie couldn't help but feel a little dizzy, it seems that the internal organizational structure of this broken meeting is too clear, and the internal confidentiality system is too strict.

Duan Liye is already regarded as the middle and high level of the entire Qing Dynasty. He doesn't know where the headquarters is, and he doesn't know where the branch he belongs to.

After a moment of silence, Charlie continued to ask him, "What is your plan and deployment in Turkey?"

Duan Liye replied, "Turkey is a supply chain specially built for the Cyprus base. The purpose is to ensure the normal operation of the Cyprus base. By importing the copper ore produced by the Cyprus base, the concealment of the Cyprus base is ensured. At the same time, through reasonable and legal The import channel provides the funds needed for the operation of Cyprus. In addition, we will also use the shipping of copper ore to secretly provide the daily needs of the Cyprus base. There are 2,000 tons of materials on this ship, which will be sent secretly From the Cyprus base."

Charlie asked again, "What are the two thousand tons of supplies you mentioned?"

Duan Liye replied, "There are about 300 tons of various foods and medicines, and there are also a large number of weapons, ammunition, and clothing. Daily necessities, all kinds of daily necessities needed by the dead, consumables for air and water purification equipment, and nearly 500 tons of diesel."

charlie asked him, "Does the diesel still need to be transported so far from Turkey?"

Duan Liye explained, "The outside world thinks that there are only a few hundred people working and living in the copper mine, but in fact there are three to four thousand people inside. Not only is the material cost huge, but the energy consumption is also very large. It is very large. If all electricity is purchased from Cyprus' national grid, the energy consumption will be significantly higher than that of a copper mine of the same size. Do n't expose any clues."

As he said, Duan Liye said again, "Because we need to fill the energy consumption of these three or four thousand people, we sent them four large diesel generator sets from Turkey, and all their daily electricity is generated by diesel. However, if a copper mine consumes too much diesel, it will be suspicious, so all the diesel they need is provided by us. After the ship docks, there is a special pipeline connected to the copper mine, and the diesel is directly delivered through the pipeline. "

Hearing this, charlie couldn't help admiring the meticulousness of this organization.

Generally speaking, the larger the organization, the harder it is to keep in mind the details.

However, with such a huge scale, the Poqing Society can handle all kinds of details very well, which is really remarkable.

It is easy to see the clues of such things as energy consumption once they are targeted by interested people.

Often, the police analyze the electricity consumption data of residential buildings and find that the electricity consumption of a certain household is several times higher than that of other neighbors of the same type of household.

And that kind of three-bedroom house uses the water and natural gas of more than ten or twenty people a month. Once this abnormality is discovered, it is likely to be a den of an MLM organization. Thirty MLM people.

Therefore, if this copper mine does not want to expose any clues, then all its energy consumption, publicly purchased materials, and even the garbage it discharges must meet the scale of 300 people so that no one will find abnormalities.

Otherwise, once any indicator is abnormal, it may be noticed by potential enemies.

This also made charlie realize that many of his previous operations actually lacked similar details. Whether it was the Huichun Pill Auction or Jiuxuan Pharmaceutical, which is well-known around the world during this period, they were actually a bit high-profile. Now, once it is cleared, it will be followed, and it is only a matter of time before it is found out.

At this time, Duan Liye said again, "By the way, among the supplies I brought this time, there is also an antidote for them."

charlie asked him, "Is the antidote produced in Turkey?"

"No." Duan Liye shook his head and said, "The antidote was sent to Turkey by the organization, but I don't know where it came from."

charlie frowned and asked, "Is there a fixed delivery time for the antidote to Turkey?"

The Amazing Son In Law Chapter 5253 -

Duan Liye's explanation made charlie even more confused about Lin Wan'er (Alani) (Alani) identity.

He even regretted it a little.

He regretted letting Lin Wan'er (Alani) and her grandfather go directly.

Although in his opinion, he had already used psychological hints, and the grandfather and grandson must have nothing to hide from him, but at that time, time was short and he didn't have enough time and opportunity to ask more questions.

Now, once it is cleared, it will be followed, and it is only a matter of time before it is found out.

At this time, Duan Liye said again, "By the way, among the supplies I brought this time, there is also an antidote for them."

charlie asked him, "Is the antidote produced in Turkey?"

"No." Duan Liye shook his head and said, "The antidote was sent to Turkey by the organization, but I don't know where it came from."

charlie frowned and asked, "Is there a fixed delivery time for the antidote to Turkey?"

The Amazing Son In Law Chapter 5254 -

"No" Duan Liye explained, "The antidote is delivered randomly by the organization every time. Sometimes it is delivered the day before it is almost used up, but sometimes it is delivered suddenly one or two months in advance. It's unpredictable, and there is no pattern, they just suddenly informed us that the antidote has been sent to a certain place, and let us get it ourselves, probably to prevent us from catching the pattern."

After a pause, Duan Liye said again, "In addition, the quantity delivered is different each time, sometimes for one month, sometimes for three months, and these antidotes are

delivered with a special After the safe is in our hands, we have to apply to the organization to open the safe every time before delivering medicine to the base, and we can only open the safe after the organization authorizes it.”

Charlie asked in surprise, “Is the safe connected to the Internet?”

” That’s right.” Duan Liye nodded and said, “Not only is it connected to the Internet, but it also has a self-destruct device. Once we open a new safe, the previous safe will self-destruct. Once we encounter a violent crack, it will also trigger self-destruct. Therefore, only the organization authorizes Only then can we get the antidote from inside, and the safe has its own identification function, which can accurately record how many antidote we take out, and we can only take a fixed amount of antidote each time, one more is not enough, otherwise once When the organization realizes that things are out of control, it will immediately start to self-destruct.”

Duan Liye said, “Not only our safe, but also the safe in the hands of the Cyprus base Jiedushi. Although there is an emergency solution in his safe, Medicine storage, but you also need to apply for authorization from the organization to open it. Once something happens there, the organization will immediately stop the supply of antidote and destroy the antidote stored in the safe. Everyone will die.”

charlie asked with some doubts, “If such an important thing is moved to the Internet, if it is hacked, wouldn’t it be all over?”

“No.” Duan Liye shook his head and said, “The organization uses It’s not the Internet, it’s our own satellite communication network, and it’s not ordinary civilian communication, it’s a military communication satellite bought from senior Soviet officials through special channels when the Soviet Union disintegrated.”

“Military communication satellite?” charlie was shocked He asked endlessly, “Can this be bought?”

Duan Liye explained, “Normally, no matter how rich individuals and companies are, they couldn’t buy military satellites. But at that time, it was a special time period. The entire Soviet defense system was in chaos. The distribution of the Ukrainian government was also muddled, with a lot of bad debts. At that time, a large part of Ukraine’s heavy weapons were sold. Even the Tu-160 bomber and even the nuclear bomb were almost sold, let alone a large number of satellites in the sky. In that case, no one will notice that there are a few satellites missing, and as long as you do something a little bit, other people will not know that there are still a few satellites in the sky that belong to them.”

Duan Liye said again, “These satellites themselves are It has extremely high security, and the communication code has been reset, so even the person who designed it cannot crack the current communication content. The possibility of being cracked is almost non-existent, but it also has certain drawbacks, the biggest drawback That is, the satellite is a bit old, and it is still an old generation of narrow-band mobile

communication satellites . The transmission rate is relatively slow, so it can only transmit text and byte commands, such as monitoring the status of safes in various places. Just send a command of a few bytes to the satellite. If there is an exception, the command is only a few bytes. The same is true for activating the self-destruct device. There is no problem with this small data transmission. , it can satisfy very few users to use this system for voice calls at critical moments, but it cannot satisfy video signal transmission.”

charlie nodded and said, “That is to say, even if the base in Cyprus may have monitoring equipment installed, the organization I can’t check it in real time, right?”

“Yes.” Duan Liye said, “The monitoring equipment in Cyprus is stored locally. Every time I come here, I will bring back a copy of the surveillance video of the past week, but this data will not Connect to the Internet and only keep it in Turkey. Every once in a while, all the data will be handed over to the Youjun Dudufu. As for whether the Youjun Dudufu will hand over these data to the British Lord, I don’t know. “

charlie couldn’t help laughing and said, “Seeing how old you are, I didn’t expect to know a lot about this.”

Duan Liye said respectfully, “These were all systematically trained when I was in Huben Camp.”

charlie asked him with great interest, “Then let me ask you, as far as you know, has your self-destruct device ever been activated?”

“It has been activated.” Duan Liye said without thinking, “About twenty years ago, a base The self-destruct device was activated by the organization because of a major failure, and that time the organization was very cruel. It was not until the day before the normal delivery of the medicine that the special envoy was notified temporarily that there was no need to deliver the medicine. There was some accident, let him wait for another half a day, if the special envoy has not arrived in the early morning of the next day, the organization will authorize him to open the safe and activate the stored antidote.”

“And then?” charlie asked with a frown, “The organization Use lies to drag them until they are about to die from poison, and then start self-destructing?”

“Yes!” Duan Liye nodded heavily, and said with a shocked expression, “The organization didn’t send anyone to deliver the medicine, and it destroyed the last one again.” The spare antidote, more than 5,000 people in that base, including Jiedushi, Xiaoqiwei, dead men and their families, all died of poisoning, and none of them survived.”

charlie asked him, “How do you know so clearly? “

Duan Liye explained, "This is the information that the organization declassified internally. The reason why it was declassified at that time was to warn all bases of the consequences of a major failure."

charlie suddenly thought of something, and blurted out, "You just said, that major failure It was twenty years ago?!"

"Yes!" Duan Liye nodded and said, "It was twenty years ago, I remember it very clearly."

charlie's expression was filled with shock, his parents were killed in Jinling, exactly twenty years ago!

The timing is so coincident, it can't be just a coincidence, right?

Is there any connection between the death of the parents and what Duan Liye said? !
