

The Amazing Son In Law Chapter 5255 -

At this thought, Charlie, whose pupils constricted, immediately asked Duan Liye, "What happened twenty years ago that would have allowed your hero to execute thousands of people directly?!"

Duan Liye shook his head blankly, "What is the specific reason? I don't know... I only know that the British Lord was furious at their failure at that time, so he

killed him..." Charlie raised his eyebrows and asked coldly, "Then you know where they failed. Is it?"

Duan Liye shook his head and

said, "I don't know either..." Charlie thought of Duan Liye's mention of the Commander's Mansion of the Five Armies just now, and thought that the Commander's Mansion of the Chinese Army was in charge of Asian affairs in the Qing Dynasty, so he asked him "Which capital governor's mansion was it that experienced that failure? Is it the capital governor's mansion of the Chinese army?"

Duan Liye shook his head and said, "I don't know, but it is basically certain that it was not the capital governor's mansion of our right army..." As

he said, Duan Liye also said, "Actually, how many dead soldiers' bases similar to the Cyprus copper mine are there in the whole world. I don't even know. The information is completely isolated inside. I only know that there are the Governor's Mansion of the Left Army, the Governor's House of the Central Army, the Governor's House of the Former Army, and the Governor's House of the Rear Army. I don't even know..."

Hearing this, Charlie's heart sank again.

He was not sure whether the failure that Duan Liye said 20 years ago was related to the death of his parents.

It seems that if you want to find out more information, you can only hope to find a higher level of this broken society.

So, Charlie asked again, "What is the structure of the Qing Dynasty in Turkey?"

Duan Liye replied, "The highest officer of the Right Army Duan's Mansion is the Left and Right Duan, and there are four Duan Tongzhi under his command. A deputy governor is in charge of a closed-loop system, and the line between Turkey and Cyprus is one of the closed loops."

Charlie asked, "Then who is the deputy governor of your closed loop?"

Duan Liye said, "It's Arlo, deputy governor." Charlie

asked again, "Is this Arlo a warrior?"

"Asked, "In your closed loop, besides the copper smelter in Turkey and the copper mine in Cyprus, what other industries do you have?" "A lot." Duan Liye replied, "There are also natural gas companies, large farms and shipyards in Turkey. , in addition, there are also some garment processing factories and stone processing factories, which are basically involved in all walks of life, and the overall market value is about 80 billion U.S. dollars."

In Turkey, with a total market value of 80 billion U.S. dollars, it can already be called a super business empire, but this is only the industry in charge of a deputy governor under one of the five military governors' mansions under the command of the Qing Dynasty. If any deputy governor is assigned to the economically developed Western Europe, then the closed loop he is in charge of may have a market value of more than hundreds of billions of dollars.

In this way, the asset strength of a right army governor's mansion may have easily surpassed that of the Wade family. Charlie suddenly thought of his little aunt again, and quickly asked, "What is your public identity in society, your vice-captain?"

"Will you pretend to be a business tycoon?" "No." Duan Liye shook his head and said, "The vice-captain's official position is the governor and acquaintance, and there are also the governor and qian officer below, and then there are special envoys like me, and from the special envoy to the top, it is absolutely impossible to have a well-known status in the society."

Generally, it is very low-key. My public identity in Turkey, is the quality inspector of this copper smelter, responsible for inspecting the quality inspection of all copper mines entering the factory, so it is justifiable to come to Cyprus with the ship, and the public identity of our deputy governor is the accountant of the copper smelter." "Accountant?!" Charlie frowned, and said, "So, the person in charge of the copper smelter has a lower status in your closed loop?"

"Yes." Duan Liye nodded and said, "The chairman is just putting on a show. As for the people in charge of other industries, they are just spokespersons arranged internally by the Qing Dynasty, and many of them are the descendants of Xiao Qiwei."

Charlie asked him "The heir of Xiao Qiwei?"

"Yes." Duan Liye said again, "There are at least fifty companies under our closed loop."

Charlie asked curiously, "Since you pay so much attention to secrecy, how many of these fifty companies should you how to manage to ensure that the secrets are not leaked? You can't have all the employees of these more than 50 companies, right?"

Duan Liye shook his head and said, "Most companies don't have any apparent relationship with each other or with the deputy governor. , Moreover, not every company belongs to us, we don't have so many grassroots personnel, but the public leaders of every company are the descendants of Xiao Qiwei."

"The descendants of Xiao Qiwei?" charlie asked Duan Liye said, "Why are the descendants of the Xiao cavalry guards?"

The Amazing Son In Law Chapter 5256 -

Duan Liye replied, "Because the Xiao cavalry guards are all promoted from dead soldiers who performed well and even made meritorious deeds. The dead fighters have a sense of superiority, and they are specially allowed to let their third child out of the status of Xiaoqiguard after every three children."

"Being out of the status of Xiaoqiguard means that this offspring will not have to practice martial arts since childhood, but It is to receive formal education in the Qing Dynasty since childhood, and to receive basic education wherever a person is. For example, Turkey has four years of primary school, four years of middle school, and four years of high school. After studying in the club, after obtaining legal status in high school, study in a local public high school in Turkey, and then take the normal university entrance examination. After graduating from university, you can directly use social recruitment channels to work in our closed-loop companies, and gradually be trained into different companies. successor."

charlie asked him, "Why did you send him to study in high school?"

Duan Liye replied, "Children who are too young lack self-discipline. If they are sent to social schools, it is easy to say that there are too many mistakes. Therefore, the Poqing Society will first conduct internal education for them, while teaching them knowledge, while letting their parents Continue to strengthen their awareness of confidentiality, and when the children start going out to high school, they will start to take medicine to make them have a strong poison in their bodies, so as to ensure control."

Duan Liye said, "But their treatment is better than Xiaoqi's. Wei is much better, one is that they don't need to practice martial arts hard, and the other is that they don't need to take the antidote once a week, but like me, once every six months, and if they study hard and have real talents, they will be able to take over the company in the future. , you can live in the society as a white-collar elite or even a well-known entrepreneur, and your living conditions are much better than those of Xiao Qiwei."

charlie couldn't help but suddenly realized when he heard this.

From this point of view, my little aunt and her family members should not be regarded as high-end members in the Poqing Society. They are probably descendants of Xiaoqiwei, but they have the opportunity to live a normal life in the real society.

Thinking of this, Charlie asked Duan Liye, "During the years you have been in the Poqing Society, have you ever heard that the Poqing Society sends people to the society, and then deliberately makes this person get close to and marry a specific person, making them become Poqing will place undercover agents next to the opponent?"

"I've heard of it." Duan Liye nodded and said, "This kind of thing is normal. After these children of Xiaoqiwei are sent to society, Poqing will formulate a point system for them. Points can be increased as long as they make contributions to the Cracking Society, the greater the contribution, the more points; "

"If the points can reach a certain level, then they can use the points to bail out one of their family members from the Xiaoqiguard;"

"If you continue to make significant contributions, you can even bail out all your relatives. Once their family members are bailed out, their families don't have to do anything. Yes, they can recover their freedom to a certain extent, as long as they don't threaten the safety of the Po Qinghui, they can go and do whatever they want, but the poison in their bodies cannot be cured, so they can only upgrade from taking the antidote once a week to Serve once every six months. "

"If the contribution is large enough, they can even redeem themselves. After the redemption, the Chaqing Society will give them a generous sum of money to allow them and their families to live up to their old age. safe while taking the medicine regularly. "

Speaking of this, Duan Liye said again, "Because of this mechanism, each Xiaoqiwei will try his best to have three children, or even multiples of three, and every child who is sent to study will be educated by his parents and elder brothers since he was a child." My sister instilled a great sense of responsibility, making them realize that they are shouldering the mission of changing the fate of the whole family from an early age. Therefore, almost all of these children are academic masters, and they are elites as soon as they enter society. Don't be surprised, maybe the person next to a billionaire's pillow is the descendant of Xiaoqiwei. "

Speaking, Duan Liye continued, "However, the descendants of these Xiaoqiwei have a special term in the Poqing meeting, called scholars.

Charlie couldn't help laughing dumbfounded, and asked him, "Is that the scholar who took the imperial examination in ancient times? " "

"Yes. "Duan Liye said," the ancients said that if no one asks for ten years, they will become famous all over the world in one fell swoop. Whether they are scholars in ancient times or scholars in the Qinghui, they must desperately pass studies and exams to change their lives and achieve class leaps. "

charlie nodded lightly, thinking to himself, “I originally thought that my little aunt must be a descendant of ‘Jin Yiwei’, but according to what he said, my little aunt is most likely a ‘scholar’. There is a high probability that Han Chuang has studied hard for more than ten years, shouldering the mission of saving the whole family, and was arranged to enter a certain university to get close to my brother-in-law...”

“Besides, her success in marrying into An’s family is enough to prove that she is a ‘scholar’. In this group, it is definitely top-notch. “

Thinking of this, charlie couldn’t help feeling a little shivering down the spine.

Although the Poqing Society is not well-known, it has actually spread its influence all over the world, and has already infiltrated the upper class.

God knows, how many of the world’s richest people on the Forbes rich list have partners who are actually just “scholars” of this organization.

Moreover, even if a certain “scholar” married the richest man in the world, the Po Qing Society would still be able to exercise absolute control over her through the poison in her and her family’s body, as well as the antidote in his hand.

Moreover, this control chain has formed a closed loop, impeccable and impossible to crack...
