

The Amazing Son In Law Chapter 5259 -

The aura in the antidote is very small, although charlie can conclude that the person who refines the elixir must also be proficient in aura, but charlie cannot use the elixir to grasp the opponent's cultivation.

After all, the potency of this antidote is too low. charlie feels that its greatest use is not to suppress the poison in the body of the user, but it seems that it is only for the poison in the body to send an antidote. signal of.

Looking at these antidotes, he couldn't help guessing in his heart that if there were ten bases for dead soldiers in the whole world, there would be at least tens of thousands of dead soldiers, their families, and Xiaoqi guards.

In addition, there are "scholars", "guides", "special envoys", "supervisors", "hubenyng", "express companies" and various supporting personnel scattered all over the world.

Roughly estimated, there are at least 100,000 people under his command, or even more.

There are more than 100,000 horses, and most of them take one antidote every week, that is to say, the antidote produced by the Po Qing Association every day is 10,000 to 20,000 or even more.

Such a large demand cannot be assigned to the masters who master spiritual qi, otherwise, it would be tantamount to putting the strongest group of people in the sweatshops that make antidote, which is really overkill.

Therefore, charlie estimated that there should be a large-scale pill processing base in the Poqing Society. The hero, or the people under his command who master the aura, will refine the core pills and hand them over to the processing base to dilute them with specific formulas. .

At present, the clues that charlie can find are basically very independent. It is difficult to find an actual clue to connect the base of dead soldiers in Cyprus with the higher level of the organization.

But now it seems that the only thing that runs through all the links of the Poqing Society is the production and transportation of the antidote.

The antidote is a real link that actually exists. It will use the transportation route of the antidote to connect all external organizational structures with it. If you can find the output path for the antidote to be sent all the way down, you will be able to find this elixir processing base .

And this elixir processing base is by no means isolated from the headquarters or high-level independent existence of the Poqinghui, because in the antidote it produces, there must be elixir with spiritual energy as the core raw material, so its upstream must have a The input path of spiritual elixirs.

Once you find this input path, you may be able to follow the vines all the way to find the real core of the Poqing Society.

After making up his mind, Charlie asked Duan Liye, "You said just now that the time and place where the antidote arrives in Turkey are all random. Tell me about the process for you to receive the antidote."

"Okay." Duan Liye said respectfully, "General Without any warning, we will receive a coordinate sent via satellite communication and a six-digit receipt code, the coordinate may be anywhere in Turkey, and we will rush to receive it immediately after we receive the address.

", Duan Liye said again, "They usually choose a wilderness ridge to place the safe. Since the coordinates are accurate to meters, after we arrive at the designated coordinates, we only need to try digging on the flat ground, and we can quickly find the location of the safe."

"The wilderness?" Charlie couldn't help frowning.

It seems that the process of this group of people is indeed very meticulous. There is no monitoring equipment in places like the wilderness, and the other party randomly selects the location first, so it is impossible to deploy and control in advance.

And wait for the other party to calmly place the antidote, there is still enough time to clear up all the clues, and then inform the other party of this coordinate.

Even, the other party may bury multiple safes in Turkey at one time, but only announce the coordinates of one of the safes at regular intervals in the future.

As a result, it is even more difficult to trace this line.

Immediately, Charlie asked again, "Every time you went to receive the safe, did you find the traces they left when they placed the safe?"

"No." Duan Liye shook his head and said, "I have paid special attention to this, but every time I receive the antidote, I don't find any traces, no footprints, no wheel marks, or they have been specially treated when they left, or they have buried the safe for long enough, the wind and sun will naturally cover up the traces they left, or it may be both."

Charlie couldn't help but smack his lips and asked him, "What happens after you find it? Give them feedback?"

"Yes." Duan Liye said, "The safe has a password input area, but this area is not used to open the safe door, but to send a receipt to the organization, as long as you enter the correct receipt code, The organization can confirm that we have received it safely."

Hearing this, charlie didn't know for a while what method he should use to catch the clue of the other party's antidote.

At this time, the steamship whistled very piercingly, and the speed of the boat slowed down a lot, which made charlie realize that the boat was about to dock.

So, he immediately threw the antidote brought by Duan Liye back into the closet, wrapped it in one of the black robes, and then said to Duan Liye, "I pretended to be your deputy and went to the copper mine with you. What did you do before?" Those who handed over to them, how to hand over this time."

Duan Liye nodded without thinking, "Of order!"

After that, he also took a black robe, put it on his body skillfully, and used the huge hat to cover his entire head completely. covered in it.

charlie also followed suit, covering his head with the hood of the black robe.

He found that the hat of the black robe was very wide, and the fabric of the hat was light and sandy, even if the hat completely covered the face, it would not hinder the sight.

Afterwards, charlie and Duan Liye came to the door, looked at the martial artist standing still like a wooden board, and said coldly, "Listen, if anyone else dares to enter this room except the two of us, they will be killed without mercy." !" The

other party was immediately controlled by charlie's psychological suggestion, and immediately nodded respectfully and said, "This subordinate obeys!"

...

When the two stepped out of the room, the outside was already busy.

Most of the security guards returned to the bridge. After the ship stopped, they would take all the crew into the engine room to prevent the crew from spying on any clues.

At this time, the ship was only one or two kilometers away from the pier.

charlie and Duan Liye walked out of the bridge directly and came to the deck.

On the deck, two crew members and two guards were standing on the port side of the ship, waiting to throw the cable to complete the landing.

And charlie could already see that the small pier in front of him was brightly lit at this time, and many trucks and loading and unloading trucks were already waiting here.

The Amazing Son In Law Chapter 5260 -

In addition, charlie also saw a few cars, presumably they were waiting to meet Duan Liye's convoy.

The freighter started to reverse thrust when it was about to dock, and then the speed quickly dropped, and it leaned sideways towards the pier.

After the ship came to a complete stop, Duan Liye took the lead and went all the way down from the spiral ladder on the inside of the deck. At this time, the hatch below had also been opened by two crew members.

At the same time, the crane next to the freighter has begun to move slowly, and it seems that it is about to start unloading.

Since charlie asked Duan Liye to hand over normally according to the previous handover method, Duan Liye at this time has completely entered his usual rhythm of docking.

When he stepped out of the hatch, there were already many men waiting outside. Seeing Duan Liye and charlie coming down, the leader immediately said to Duan Liye respectfully, "Master Special Envoy, you...you have worked hard all the way." !"

charlie could hear that this man's tone was a little nervous and apprehensive.

Looking at the other people around him, everyone was also very nervous.

charlie speculated that he should be uneasy because of the defeat in Bergen a few days ago.

After all, Lin Wan'er (Alani) was the one whom the Lord of England personally called for, but in the end their people failed to complete this arduous task.

And now it's time to deliver the antidote. They are afraid that the British Lord will repeat the method of 20 years ago and put everyone in their base to death.

Facing the respect and apprehension of the several people, Duan Liye just let out a sigh of relief, and walked straight towards the three cars without even looking at the person.

The man in the lead quickly ran a few steps, rushed to the front of the Mercedes-Benz in the middle, helped Duan Liye open the door, and then helped charlie open the co-pilot's door.

Duan Liye, who was dressed in a black robe, took the lead in the back seat of the car, followed by Charlie in the passenger seat.

Afterwards, the people who greeted them quickly got into the front and back cars, and the convoy quickly left the pier and drove to the copper mine, which was only about a kilometer away from the pier.

The convoy circled out of the pier, and in the blink of an eye after driving to the main entrance of the copper mine, the automatic gate opened in advance, allowing the three vehicles to drive straight in without slowing down.

This copper mine looks somewhat similar to the base of Wanlongdian from the outside, but it is much smaller in scale.

Although there was nothing unusual inside it, Charlie still found many secret whistles and firepower points.

It can be seen that the security here is very strict.

The convoy drove directly to an office building and stopped. At this time, there were already many people waiting downstairs.

The leading middle-aged man is well-dressed and looks like a big entrepreneur.

Beside the middle-aged man, stood a young man wearing glasses. The young man was thin and tall, and looked very bookish. At first glance, the first impression was that he looked like the middle-aged man's assistant or secretary.

However, Charlie discovered that the middle-aged man actually had no cultivation, not even a martial artist, but this bookish young man was also a master of the dark realm, but his level was relatively low, and he was only a master of the dark realm. Heavy days.

Based on Duan Liye's previous confession, it is estimated that this middle-aged man should be the superficial manager of this copper mine, and the young man who is like an assistant next to him is likely to be the real controller here. Jiedushi in Xiaoqiwei's mouth.

Behind this young man, there are several martial arts masters, but among the remaining few, the strongest one is only an old man with great perfection.

However, the expressions of these people at the moment are full of panic. Thinking about it, they are all terrified by the last failure.

After the car stopped, the young man who looked like an assistant stepped forward first, and respectfully opened the door for Charlie and Duan Liye. As soon as Duan Liye

got out of the car, the well-dressed man stepped forward and said respectfully, "Master Special Envoy, you have worked hard!"

!"

The people in the back bowed together and shouted loudly, "Master Special Envoy, you have worked hard!"

Duan Liye just raised his hand, and said calmly, "Go in and talk."

"Okay! This way please!" The young man hastily made a gesture of invitation respectfully, and then walked a few steps to lead the way.

Duan Liye followed closely behind, and the middle-aged man followed him, and said, "Master Special Envoy, our recent operation report has been written, please spare some time to read it later."

Duan Liye He hummed, and didn't say much. This stern attitude made the middle-aged man even more nervous.

charlie followed behind Duan Liye, and had a panoramic view of the performance of these people. Seeing the terrified appearance of these people, he felt relieved instead.

Right now, this group of people is in extreme fear. The knight guards and dead soldiers who want to come here must be having trouble sleeping and eating these days. This is definitely an excellent time to instigate their rebellion!
