

The Amazing Son in Law Chapter (Charlie Wade)

Chapter 2588

Aurora curled her lips when she was wronged, and said angrily, "I know Dad..."

Charlie smiled at this time: "The dog will let the housekeeper look out of him first, then play with him after eating."

Mr. Moore hurriedly ordered the housekeeper to require the dog out first.

Everyone sat down one by one.

On Charlie's left is Mr. Moore, and on his right is Ito Yuhiko.

As for Emi Ito and Koichi Tanaka, they were originally beaten to death and didn't want to get on the table, but Charlie still kept them.

The relationship between master and servant in Japanese society is extremely clear. Sometimes the title of a predecessor can kill an individual, but Huaxia is comparatively less rigid, and Charlie isn't the type of one that cares about these details. Sat down.

Emi Ito and Koichi Tanaka are naturally flattered.

After everyone was seated, Mr. Moore asked everyone to pour the wine. At this point the wine remains the national liquor Moutai. Within the upper crust, this is often the foremost popular brand and therefore the only choice for foreign guests and envoys at the state banquet.

Moreover, the Maotai collected by Mr. Moore are most treasures that the rich can't buy on the market. Just remove a bottle, and it's a history of a minimum of 20 years.

After the servant poured wine for everybody, Ito Yuhiko couldn't help holding up a glass, sniffed it under his nose, and exclaimed: "It really is China's national wine! The fragrance alone is enough to be intoxicating."

Mr. Moore asked curiously: "Oh? Mr. Ito also has research on Chinese liquor?"

Yuhiko Ito nodded and said earnestly: "Let's tell you, in Japan, ordinary people love beer and sake, while children love whiskey and wine. Some older upper-class people and members of established families My favorite is really Huaxia's baijiu."

After speaking, he exclaimed: "After all, many cultures in Japan originated from China, and therefore the wine culture is that the same."

"The old Japanese families would require their children to find out Chinese culture from an early age, so we learned from the records in history books that ancient China had the old saying that 'the world's fine wine is that the only wine within the world'."

"A few decades ago, Japanese Prime Minister Kakuei Tanaka visited China, and he also expressed this sense."

In order to seek out the unruly feeling of ancient Chinese poets, we even visited to find a couple of cups of Chinese liquor and drank a couple of glasses. The hearty feeling is basically nostalgic..."

Father Moore nodded his head and smiled and said, "That's right, cash in on this chance today, and definitely drink a couple of more glasses! If you wish to drink, once you return to Japan, I will be able

to have someone prepare a batch for you to require back!"

Ito Yuihiko said, "Thank you Mr. Moore! If Mr. Moore has time, welcome to Japan for a couple of days, and that i will entertain you all the time!"

Father Moore smiled and said, "Okay, i need to re-evaluate and harass if I even have a chance!"

After all, he checked out Charlie and said respectfully: "Master Wade, why don't you've got a gap remark? Let's toast and meet one another ."

Charlie smiled and said: "You are the top of the family. If I were to mention the opening remarks, wouldn't it's a distraction?"

Mr. Moore firmly said: "You are the good benefactor of the Moore Family, you're here, this is often your basketball court , and everybody sitting here has been taken care of and favored by you all the time. The opening remarks from you're absolutely perfect. That's it!"

Charlie was silent for a flash , nodded and said: "Okay!"

After all, he stood up, holding a wine glass, and said seriously: "First of all, welcome Mr. Ito and his family to Aurous Hill. I even have an honest impression of most Japanese companies and entrepreneurs, but Mr. Ito still impresses me."

"So, I also hope that Mr. Ito can cooperate more with the Moore Family, And Quinton Family, and with Jiu Xuan Pharmaceutical within the future!"

"Everyone strives to realize resource exchange, resource exchange, and resource symbiosis. Together, we'll find more opportunities and incubate more projects."
