

The Amazing Son in Law Chapter (Charlie Wade)

CHAPTER 2612

"Yes." Charlie nodded and said, "I don't know how much you know about the Bnks family. Back then, the Banks family and my father didn't deal with it very well. The Banks family even set up an anti-leaf alliance and united many other families. Come to fight my father together, so the Banks family is also the enemy in my eyes. Now the Banks family's ocean transportation business is completely stranded. I think it is a good opportunity for me to take advantage of it. So I moved this idea. With

that, Charlie He added: "I originally wanted Doris Young to undertake this business, but he told me that doing this business requires a very in-depth understanding of international trade and the laws and regulations and tax policies of major trading countries in the world. She feels that she I can't do the job, so she recommended you

just right. We just met last night, so I came to visit today. I wanted to ask you to help. I didn't expect you to be my mother's former classmate. "

Hank silent for a moment, opening: " Charlie, now you choose ocean shipping as a starting point, this judgment is correct. "In the

future, the proportion of global trade will definitely become larger and larger. More and more large-scale manufacturing companies have begun to engage in global supply chains. Take the automobile industry as an example. A car will use Brazil and Steel made from iron ore in Australia, rubber originally produced in Southeast Asia, high-precision electronic equipment and control modules from Virtue and Japan, and then combined with China's other upstream and downstream industrial chains and labor. "

Among them, most of the transportation of raw materials, spare parts and complete vehicles rely on shipping.

Not to mention the automobile industry, even clothing, it is now a global supply chain. You can buy a coat for two or three hundred yuan. You may use cotton from the United States, fabrics from China, and Japan. Produced zippers, and then use labor from Vietnam, Bangladesh, Romania and other countries, and finally ship them from these producing countries to the country, and finally sell them to you.

With the increasing number of such globalized supply chains, the ocean shipping market will get better and better. Now the Bank's license has just been revoked, which is the key to speeding up the reshuffle of the domestic ocean shipping industry.

Charlie nodded and asked: 'Professor Hank, I don't know if you are willing to do this for me? You can raise the issue of treatment at will!

Hank suddenly felt melancholy, sighed, and said: "Charlie, let me tell you something, if I didn't give up my job, then I might now be the CEO of a Fortune 500 company, even like Like Tim Cook, Apple's CEO, he made more than 100 million U.S. dollars a year easily. The reason why I gave up my high income and chose to teach in college was because I vowed before my lover's grave that I would only teach in the second half of my life. People, no longer do business, and no longer run for money."

Charlie asked in surprise: "Professor Hank, your lover has passed away?"

"" Hank sighed: "Hey, back then, the so-called professionalism was too strong. All of my classmates have become executives and even partners of large groups. Many others have successfully started

their businesses and become billionaires worth billions of dollars. I am unwilling to be left behind, so I work very hard, staying at home all year round. The time is less than a month.

“At that time, I was flying around the world in first class every day, and I had no time to care about the lives of my wife and children.

‘Once, when I was on a business trip in Japan to talk about projects, my wife called and told me that she always had headaches recently, but I didn’t have time to take care of it. I just let her take some ibuprofen or go to the hospital by myself.

” Who would have thought that six months later, she left me because of a malignant brain tumor. So

far, Hank’s eyes were slightly red, and he reproached himself and said: “From the day she was diagnosed, I realized that I was so in the past. Fatal mistakes made over the years.

“Money is important, but money is by no means omnipotent. Money cannot replace love, family affection, or health.”

No matter how much money I earn, I can’t change my love’s life, nor can I change it. My daughter is true to me.

“So at that moment, I swear to her that from now on, Hank will only teach and educate people, and will never become a slave to money!”
