

The Amazing Son in Law Chapter (Charlie Wade)

Chapter 2616

Hank felt that Charlie should have an Emgrand Group and the 10 billion funds in his hands.

When these two things add up, it is just over 100 billion and nodded. If you want to compete with the Wade Family or the Banks Family, the possibility is almost zero.

Charlie smiled slightly at this time and said: "You said Professor Hank, I still have tens of billions of funds in my hands. Moreover, I have a pharmaceutical company with a good momentum and an annual profit of tens of billions. No, it may even exceed 100 billion next year, and it can definitely continue to supply blood for my other projects."

Hank said in surprise: "You still have a pharmaceutical company with an annual profit of over 10 billion? What's its name?"

Charlie said: "Oracle Pharmaceutical, I wonder if Professor Hank has heard of it?"

Hank was even more shocked, blurting out: "It's the company that produces Nova Dias?!"

Charlie nodded: "Wrong, the current core product is Oracle Nova Dias."

"My God!" Hank exclaimed, and said, "Nova Dias is now well-known worldwide! My gastrointestinal tract has always had minor problems.

I also took a box of Weisan some time ago. It's ready immediately. I used to not dare to eat raw, cold, or spicy food. Now I have Nova Dias. What Sichuan cuisine, Hunan cuisine, Yuzhou hot pot, and Japanese cuisine are totally beyond mention... .."

After that, Hank said again: "There are also many of my friends in the United States who have asked me to help them buy this medicine. Everyone has a reputation for this medicine, but I really didn't expect this company to be yours."

Charlie nodded and said: "Originally, I reached a cooperation with Nova Dias's Pharmaceuticals. I reorganized Nova Dias's Pharmaceuticals and gave certain shares to the person in charge of Nova Dias's Pharmaceuticals.

Then I integrated Japan's Kobayashi Pharmaceuticals, so the production capacity is also increasing rapidly. I believe that Oracle Nova Dias will soon cover the global market. By that time, hundreds of billions of dollars a year will be profitable.

"Indeed!" Hank said very seriously: "The biggest magic weapon of a pharmaceutical company is a good medicine! The world's top pharmaceutical companies have annual revenues of hundreds of billions of dollars, equivalent to several yuan.

Trillion, but their net profit is generally not too high, because the research and development costs are huge, and the research and development cost of a drug can easily cost billions or even tens of billions of dollars. Is the research and development cost of your Nova Dias high?"

Charlie shook his head: "The research and development cost of Oracle Wei San is not high, so my Oracle Pharmaceutical, in terms of profit margin, will be larger than other pharmaceutical companies."

Hank couldn't help giving a thumbs up and sighed: "This is really amazing! Look at it this way, you can build your own business map in a few years! The future is limitless!"

As he said, he sighed helplessly, and said: "To be honest, now is really a good opportunity for you to cut into ocean transportation.

The market has released such a large share, and you do not lack cash flow. Quickly build up a huge transportation fleet, and then quickly advance related businesses..."

"Unfortunately, I really have no way to go against my oath to help you, and Aurous Hill University of Finance and Economics also has high hopes for me. I look forward to my being able to bring the economic management major of Aurous Hill University of Finance and Economics to the highest level in the country. I really want to The hometown elders make some long-term contributions and hope to train more outstanding talents for the motherland..."

Charlie nodded quickly and said, "Professor Hank, I understand what you said. In contrast, your current job has more social value and social significance. I personally understand it!"

Hank was silent for a moment, and suddenly remembered something, and said excitedly, "Charlie! If you don't dislike it, let my daughter help you!"
