

The Amazing Son in Law Chapter (Charlie Wade)

CHAPTER 2631

"Everything is not good? When

Hank heard these four words, he subconsciously asked: "Excuse me, what does this mean?! The

old man asked with a look of disgust: "Have you ever fortunated out? What do you mean by these words? Don't you know? It's not good for anything!

He said, he continued very seriously: "That is to say, if you get this lottery, what do you ask, what is unlucky! If you ask about the relationship between husband and wife, it indicates If you ask about career money, it means that you will surely fight; if you ask about your fortune, then it indicates that you will surely fall apart; if you ask about the safety of your loved ones, it indicates that the other party will definitely encounter major disasters , Even in a catastrophe!

"What?!" Hank was anxious after hearing these words, and asked nervously:

"Old gentleman, do you have any way to resolve my daughter's disaster?! "This" the old man sighed with emotion.

Said : "If you draw another sign, I might be able to think of something, but if you draw this one, it means that this matter is too difficult! With that, he changed the front and again Said: "But if I go all out and break the game, there may still be a ray of life!

Hank has been completely disrupted by the other party at this time. All he cares about is the safety of his daughter. As for the books he has read for so many years. , The knowledge he has learned, has no effect at all.

His face is full of nervousness and eagerness to ask: "

Old sir, I beg you to help!" The old man saw him. He took the bait and chuckled lightly. "Since you are so sincere, then I will give it a try, but breaking this predicament will cost me too much, so you have to rejoice at five thousand yuan this time, so I can see you. Sincere and not sincere.

Hank doesn't care about five thousand yuan at all. If spending five thousand yuan can increase the probability of his daughter's safe return by one ten thousandth, then he is willing to do his best to make up ten thousand five thousand yuan to exchange for his daughter's safety.

As a result, he would continue to scan the QR code to pay almost without thinking.

Charlie suddenly said at this moment: "Old sir, it doesn't matter if money is not money, but before you collect the money, should you tell us about the specific situation first, or what kind of method are you going to use to help crack? , So that we know how to spend money. The

old man didn't expect Charlie to come out halfway to disturb his good deeds at this time, so he sneered and said: "A young poster, dare to doubt my skills?

Charlie waved his hand: "I don't dare not, I don't doubt you, I just want to make it clear. This is the same as repairing a car. Although we don't know how to repair it, but where is it broken, what parts need to be replaced? Tell us first.

" The old man sneered, "Hmph! I have a way to get rid of this predicament. I can use the Five Emperors' money to divination, find out the specific crisis his daughter is facing, and use magic charms to break the ban. , You can even use Taishang Laojun to rescue her in a hurry like a law. Each solution consumes different energy, and the corresponding price is also different.

Charlie smiled and nodded.

He remembered that there were also records about divination in the Nine Profound Heavenly Scriptures, which did use ancient coins for divination, but the records did not say that the five emperors money should be used, but that the real ancient coins should be used. And the older the effect, the better.

As for the theory of the Five Emperors Money, it only emerged in modern times. They often refer to the coins of the Qin, Han, Tang, Song and Ming Dynasties as the Five Emperors Money. Although the author of the Jiu Xuan Tian Jing is nowhere to be tested, it is judged based on the age of the porcelain vase at that time. This book was also written by the Tang Dynasty at the latest, and the earliest version of the Five Emperors' Money had to come from him, so the ancient coin divination method recorded in it should be much earlier than the Five Emperors' method, and it can even be said. It is the ancestor of the five emperor money theory.

Therefore, Charlie deliberately asked him: "What can you divination with the five emperor's money? Or else, you divination first, if your divination is good, I will give you ten thousand! The

old man immediately said: "Okay! Then I Just let you see and see! After all

, he took out a string of copper coins from his pocket, on which were hanging five coins of different dynasties.
