

# The Amazing Son in Law Chapter (Charlie Wade)

## Chapter 2653 / 1

The height of seven or eight floors is almost a deadly height for most ordinary people.

But for Charlie, it really wasn't a big deal.

The only thing he worried about was that when he got lower and lower, he would first descend to a height that was level with the top of the mountain. The most important thing was whether he would be discovered by the opponent at this height.

In order to be sure, he put his hand into his pocket and grasped the thunder warning in his pocket.

This thundering order used the Wannian Lightning Strike Wood sent by Jasmine Moore, which was called the best of the lightning strike woods, and Charlie's best weapon.

Although he had used this shocking thunder for many times, and there were already many cracks on its surface, but at present, it can be used at least a few times.

Charlie didn't really like to use the Thunderbolt, because every time this thing made a lot of noise, but this time, he still planned to use the Thunderbolt to increase his success rate.

At this time, the entire mountain area was quiet. There were few people and there were almost no vehicles on the road. People below could hear the wind and the not-so-big rain, but there was no other sound.

But at this moment, in the western sky, a lightning flashed like God's whip!

This lightning slammed on the top of the western mountain with a click, smashing several soldiers in the fortification into coke on the spot. !

Followed by a deafening thunder! The

rumbling of thunder resounded like a missile exploding, and it reverberated throughout the valley.

On the plane, Anthony was taken aback by the explosion. He blurted out: "Damn it! In places like the Middle East, how can there be thunderstorms in winter?!"

Skydiving expert Isaac Cameron, because of professional requirements, is also a meteorological expert. Even he looked dumbfounded and murmured: "This is unscientific. I specially retrieved today's satellite weather map before. Today's weather conditions do not exist for the formation of thunderclouds!"

The crew also didn't understand.

The crew of this aircraft are extremely experienced pilots, but all experienced pilots must be most of the meteorologists and well-informed meteorologists.

They have a good understanding of the formation of various climates and weather, and they can basically know what the situation is at a glance.

But no one thought that this kind of winter rain cloud, even a moderate rain could not fall, how could a sudden thunderstorm occur.

Only Isaac Cameron heard this loud noise and felt a lot more at ease. He knew that this thunder must be caused by Charlie!

At this moment, all the native soldiers of the opposition, as well as the local villagers, even including The eight hostages, including Ziva Hank, were also shocked by the sudden explosion of thunder!

For these people, the movement of the thunder just now was so great that they had hardly encountered it in their entire lives. of.

## CHAPTER 2653 / 2

Many people have tinnitus in their ears because of this explosion.

If the eardrum is slightly fragile, you will feel severe pain from deep in your ears.

Except for the imprisoned people, almost everyone else walked out the door at the first time, or turned their heads, and focused their attention on the West Mountain where the thunder and lightning occurred. The few soldiers who survived on the top of the West Mountain were also in panic and reported via the intercom. The specific loss situation.

After hearing the news that a lightning bolt killed five soldiers, the whole opposition was shocked from top to bottom.

They have never encountered such a terrible thing. A single lightning can kill five people. How powerful is this lightning?

Most soldiers think this is the anger of the gods, and many people do not hesitate. Kneeling on the ground, bowed towards Xishan and prayed for the forgiveness of the gods.

Unlike most soldiers with no educational level, the leader of this opposition armed forces was an intellectual who had studied at a military academy. When he heard the news, he immediately realized that the fortifications on the top of the West Mountain were struck by lightning. It is because they are in a higher terrain, so the lightning rod effect is produced.

Therefore, he immediately ordered all the soldiers in the Dongshanding Fortification to hide in the fortification to avoid another lightning strike.

This further helped Charlie. After receiving the news, the native soldiers at the top of the eastern mountain retreated into the bunkers inside the fortifications, not daring to rise up for fear of being struck by lightning again.

The soldiers on the top of the eastern mountain hid while others were staring at the west and were horrified. In the gray sky, an unremarkable figure fell from the eastern sky of the base at an extremely fast speed.

However, at this time everyone, including the soldiers on the eastern mountaintop, focused their attention on the west, so no one noticed the passing of this figure.

And this figure is Charlie who jumped down from an altitude of more than 5,000 meters!
