

The Amazing Son in Law Chapter (Charlie Wade)

CHAPTER 2654 Part 1

At this time, Charlie's descending speed was extremely fast, and his descending speed exceeded fifty meters in one second.

Isaac Cameron on the plane stared at the data uploaded by the computer, and said palely: "Master Wade's descent speed is too fast and his remaining altitude to the ground is less than 300 meters, which is far below the safe opening of the umbrella. At the very least, I

'm afraid it will be more fierce! Anthony-Hearing this, he trembled in shock, and blurted out: "Let the young master open the umbrella!"

Isaac Cameron recovered and yelled: " Master Wade, open the umbrella quickly!

Open the umbrella quickly! While speaking, Charlie had already passed the top of the mountain at high speed, and fell towards the mountainside.

He was not in a hurry to open the umbrella, because he knew that when he didn't open the umbrella, the goal was so small that it was difficult to see clearly.

But once the parachute is opened, a huge parachute will be released in an instant. In that case, the target will be magnified ten times or even dozens of times.

Therefore, he must make sure that the time he opens the umbrella is as short as possible!

This means that he hopes to open the umbrella at the lowest height, and then use the fastest time to reduce the speed of his fall to a height that is safe enough for him. , Immediately complete the landing, and immediately put the parachute away after landing, so as to avoid being detected to the greatest extent.

Seeing that there was only two hundred meters away from the ground, Isaac Cameron realized that Charlie was still descending rapidly, and realized that he had not

opened the umbrella, and couldn't help but blurt out: "After this height, Anthony will be crushed by him.

CHAPTER 2654 Part 2

He was so scared. He had already prepared to inform the old man to prepare for the ransom and save Charlie back, but he never expected that Charlie would actually fall to death because of parachuting. If

this really fell to death, he absolutely It's hard to blame!

Just when the two of them were panicking, Charlie suddenly opened the parachute. The

huge parachute was released from the umbrella bag, and Charlie's body that fell rapidly was suddenly pulled back by a strong force. A handful.

Suddenly opening the umbrella at such a fast speed slows down, even if the average person does not faint, at least they will break a few ribs because of the huge inertia.

But Charlie filled the bones of his whole body with spiritual energy, his shoulders suddenly exerted force, abruptly holding the huge reaction force.

Immediately afterwards, his descent speed from more than 50 meters per second, in a very short period of time, reduced to about 20 meters per second.

However, this speed is far from the safe speed for skydiving.

Normal people parachuting, the descending speed when landing is lower than six meters per second.

But at this time, Charlie was still less than fifty meters away from the ground.

Falling at this speed is almost the same as falling.

Fortunately, in the remaining 50 meters, the descending speed is still decreasing due to the effect of the parachute.

Immediately afterwards, Charlie gathered all his true energy into his legs, and his whole person slammed into the ground at a speed of more than ten meters per second.

Isaac Cameron on the plane no longer dared to look at the data returned on the computer, because he knew very well that after a second or two, Charlie's heart rate would drop rapidly until it dropped to zero.

However, he never dreamed that when Charlie had completely stopped falling, his heart rate would only be faster than just a dozen times per second.

With a look of disbelief, he blurted out and asked, "Master Wade, are you still alive?!"

At this time, Charlie has already begun to quickly put away the parachute. While he stuffed all the parachutes into the parachute bag, he said lightly: "Don't worry, I have landed safely!"
