

# The Amazing Son In Law (Charlie Wade)

## CHAPTER 2892

“Furthermore, I also require that I am solely responsible for the operation and finances, and the equity belongs to me alone, and I must not have any affiliation with the Banks Family!”

Lord Banks did not expect Zara’s appetite to be so great.

He secretly thought in his heart:

“Zara girl, want the entire ocean transportation business of the Banks Family?”

“Banks’s transport total assets in this business exceed 300 billion! At least 20% of banks Jiaguang’s assets!”

“I want to walk so much in one breath, this girl really has a lot of appetite!”

Lord Banks is addicted to power, and for him, he is 10,000 people who are unwilling to let others decentralize power from his own hands.

Therefore, at his age, he still has to firmly control the position of Banks Family Patriarch, and control every sector of Banks Family’s business, as well as the overall financial power.

His seven children hadn’t mentioned the idea of separating the family before, but he was resolutely rejected every time.

Later, the seven children changed their way of thinking, regardless of the family. At least the business should be divided up and given to different people to take full responsibility.

**But Lord Banks still disagreed.**

**He is like an ancient emperor, not only disagreeing to distribute the world to the princes, but also disagreeing to let his children become vassals in charge of one party.**

**In short, the Banks Family belongs to him, so no part of it can be separated.**

**Because of this, when he heard Zara's request, his first thought was very angry.**

**If it were in the past, let alone Zara, even his own children, anyone who dares to speak so arrogantly to himself would definitely slap him in the face, and then directly drive him overseas.**

**But now, various crises forced him to carefully consider Zara's request.**

**He thought to himself: "If I don't agree, if she holds a press conference tonight, my reputation will never stand up;"**

**"Moreover, what if her benefactor stood up for her and then hit me?"**

**"Before Master Felix killed her benefactor, I could only promise her first."**

**"What's more, the Banks Family's ocean shipping industry has basically been shut down, even if it is temporarily given to her, she will not be able to make any storms, nor will she get any benefits!"**

**"When I resolve the threats behind her, I can naturally get these businesses back easily."**

**Thinking of this, Lord Banks gritted his teeth and said, "Okay! Grandpa promises you! banks's ocean transportation business**

will be yours in the future. If it is convenient, you come to Southaven to find grandpa, and grandpa will do all the relevant documents and contracts. Okay, put it in your hands!”

Zara said: “Grandpa, it is true that I still complain to you now, so I may not be able to face you for the time being. As for the contract, I will ask a lawyer to help.”

Lord Banks hesitated for only three seconds, and said straightforwardly: “No problem! In this case, I will let Bank’s Butler go to Southaven. You can find a lawyer to connect with him. After the connection is completed, the Banks Family ocean shipping group is yours. Up!”
