

The Amazing Son In Law (Charlie Wade)

Chapter 2943-2944

Mai said earnestly: "There is no principle, it's just a kind of fierce metaphysical mystery, Gu worms, a lower level thing, is to raise a bunch of poisonous insects so that they can kill each other, and the one who survives in the end is Gu worms. However, that kind of Gu technique is relatively low-end, similar to raising a poisonous snake or raising a wolf dog to bite people. It doesn't have much technical content."

At this point, Mai changed the conversation and said: "But the really powerful masters use Gu worms that normal people have never heard of and have never seen. Those gu worms may not even be known to top biologists!"

"Many have long been extinct in nature, only secretly passed down in the cultivating Gu school."

"The kind of gu worms can fly to the sky and escape from omnipotence, and can still be controlled by the mind of the cultivator!"

"I think this security guard was killed by a master. He came to greet us to enter, and he must follow the master's meaning."

Mike asked palely: "Gu people can control Gu worms with their own thoughts, and then use Gu worms to control other people's corpses? This... is this too outrageous?!"

"Is it outrageous?" Mai said, "Doesn't the West also have telepathy between twins and mother and child? Mind is considered a feudal superstition in the people, but it is famous in the field of science. There is a certain scientific basis for quantum entanglement."

Mike nodded lightly, and said, "If you say that, it's like a quantum entanglement effect between the person who raises Gu and the Gu worm he raises?"

Mai said: "You can also understand that. As far as I know, this kind of Gu worms are usually hatched in the blood of the Gu cultivator when they were still eggs, so it is incompatible with the Gu cultivator's blood. From the very beginning, a bloodline connection was established between the two."

"Furthermore, this kind of Gu worm only feeds on the blood of the Gu cultivator in the year before it hatches. This is also to continuously strengthen its connection with the Gu cultivator, just like a baby is born with breast milk. "

"What then?!" Mike's curiosity has gradually overcome his fear, and he can't wait to learn more.

Mai continued: "During the period of feeding Gu worms, Gu cultivators have already started training Gu worms. As for how to train, these are the secrets that are not passed on in each faction. I have no way of knowing. Knowing that after they wait for the gu worms to reach adulthood, they will take the gu worms to do evil everywhere. The way to do evil is to let the

gu worms kill for them, and once the gu worms start to kill people, they will almost never stop until the gu worms naturally age and die.”

Mike widened his eyes and blurted out and asked, “Killing constantly? What if there is no enemy? Is it possible to kill the innocent if you want to kill?”

“Correct.”

“why?!”

Mai said: “Because Gu worms no longer feed on the blood of the Gu cultivator after they reach adulthood. If you want Gu worms to survive, you must keep killing them.”

“Huh?” Mike asked, “Does Gu worms eat human flesh when they grow up?”

Mai shook his head and spit out three words: “Eat people’s brains!”

When Mike heard the three words, he felt a retching, and he blurted out: “Eating human brains?! This...vomit...this is too disgusting...”

Mai nodded and said, “Look at the security guard just now, how do you think Gu can control his corpse?”

Mike shook his head and said: “I...I don’t know...I feel this is incredible, or it can be said that this is not scientific, nor is it like the Eastcliff gossip. Although everything seems mysterious, after mastering the essence, you will find everything. In fact, there are all traces to follow...”
