

The Amazing Son In Law (Charlie Wade)

Chapter 2983-2984

Felix sneered at this time.

He knew that the ignorant young man in front of him was about to pay the price of his life.

Because no one can stop one's own natal Gu worm!

Don't look at this big bug is white and fat, but in fact its body is harder than steel, it can be called invulnerable!

And its bite ability is much more fierce than an adult tiger!

Felix once used his own zombies to kill Japanese ninjas. The Japanese ninja's ninja knife cut the zombies on the zombies, and immediately shattered into a pile of irregular iron pieces.

Some people tried to use fire to defend against his natal Gu worms, but even thousands of degrees of flames could not harm the natal Gu worms.

Therefore, Felix had already foreseen the fate of Charlie in his heart.

It must be his own natal Gu worm jumped directly on top of his head, and then bit out a big hole in his Sky Spirit Cap, and then went straight into it, swallowing everything in his cranial cavity.

And in the process of devouring, this arrogant and ignorant young man will also experience the most extreme pain in the world!

Because his natal Gu worm has a unique skill, that is, when it devours the brain of others, it releases a toxin that prevents blood clotting into the brain of the other party at the same time!

This toxin will pass through the opponent's brain, quickly spread throughout the opponent's nervous system, and at the same time increase the sensitivity of the opponent's nervous system dozens of times.

It is precisely because of this that the natal Gu worm can continue to manipulate the opponent's corpse through the opponent's nervous system after killing. It can be said that this toxin is also a kind of nerve conduction medium.

What's more terrible is that this toxin has increased the sensitivity of the opponent's nervous system before death, and the opponent's perception of pain has also increased dozens of times.

In this case, even if it is just a slap in the face, it will hurt to the point where you almost want to die, not to mention the pain of being swallowed up by the brain a little bit. It is more cruel than any known torture in the world. many!

Felix also wanted to take advantage of this arrogant young man in front of him to give Mai a disarm.

So, he looked at Mai and sneered: "Old man Mai, you should take a good look at the fate of this kid. If you still fight against me, your fate will be the same as him!"

Mai was also extremely nervous, and he thought to himself: "What I am most worried about right now is that Charlie was directly killed by Felix's natal Gu worm. If that is the case, I will be dead..."

"If I tell Felix that the dead taxi driver is the mysterious person he was looking for, then he won't believe me even if he dies... He will definitely think I treat him as a mentally retarded..."

At this point in time, Mai's heart was also discouraged, and he sighed in his heart: "I don't know how to say this old bone of mine, this time I will throw it here..."

As he was talking, the Gu worm had already flown to the top of Charlie's head, only 20 centimeters away from Charlie.

At the same time, it had already opened its mouthparts, ready to gnaw directly at the top of Charlie's head.

And Charlie was like a fool, he didn't even know how to hide.

Mai's nervous heart all mentioned to his throat, for fear that the Gu worm would go down with one bite, and Charlie would belch directly.

And Felix even sneered, and said, "I didn't expect that there are so many stupid people in this world."

At this moment, Felix's natal Gu worm directly bite Charlie.

Just at the moment of the flash of lightning, Charlie suddenly stretched out a hand, and slapped it like a basketball player's cap, directly knocking that life Gu worm to the ground!

Felix and Mai were stunned by the sudden change in front of them!

No one thought that the natal Gu worm that was ready to go and was sure to win would be overwhelmed by the slap of the opponent.

Felix even thought he was dazzled and didn't see clearly.

But after letting him rub his eyes, he realized that his own natal Gu worm was twisting and rolling on the ground with pain.
