

The Amazing Son In Law (Charlie Wade)

Chapter 2997-2998

“Huh?! Isn’t this Felix even being cut out of the relic by thunder?”

After listening to Charlie, he subconsciously looked at the place where Felix was split into powder by lightning, and he saw a gray-brown thing the size of a duck egg on the ground.

He couldn’t help frowning, and said, “Why is there such a big relic? I think it might be a kidney stone, right?”

“It’s not right...” Mai said, walking over involuntarily and picking up the gray-brown thing.

He looked carefully for a moment, and couldn’t help but exclaimed: “My God! This...this turned out to be Ambergris!”

“Ambergris?” Charlie frowned. He had dragged Mr. Quinton to help find Ambergris a few days ago, but he didn’t expect that Felix had a piece on his body.

However, Charlie didn’t care too much.

Because, Ambergris is actually not uncommon.

Rich people can buy it at any time as long as they are willing to spend money.

I think the first time I met Jack Yalman at the Treasure Pavilion auction, there was a Songhe back-flow incense burner in the Jumbo Pavilion. At that time, in order to sell this Songhe back-flow incense burner at a high price, the auctioneer also specially matched it with it. Two boxes of ambergris.

What Charlie needed for alchemy was ambergris that was at least ten thousand years old, and ordinary goods had no meaning at all.

So, he said to Mai: “This thing should be nothing unusual, I don’t know what Felix did with such a piece of thing.”

Mai hurriedly said: “You don’t know Master Wade. If it is ordinary ambergris, the whole is waxy, and this thing is relatively flammable. As long as it is dry ambergris, it can be burned directly by the fire. Yes, but this one is a bit special.”

As he said, he continued: “After being struck by your sky thunder, even the flesh and blood of Felix turned into powder, but this ambergris can still be preserved intact. This shows that this ambergris can be preserved intact. The incense has become a fossil!”

“It has become a fossil?!”

Charlie exclaimed, stepped forward, and asked, “Can you be sure this thing is really a fossil?”

Mai handed the piece of ambergris to Charlie, and explained: "You see, Master Wade, this thing is now extremely hard and dense, and it is no longer waxy, more like a stone. It's not that the texture is relatively special, and I don't necessarily recognize it as ambergris."

Charlie asked curiously: "Have you ever found a fossil of Ambergris before?"

Mai hurriedly said: "There are some, but they are abroad, and they were bought by mysterious people at a very high price as soon as they came out."

Charlie asked him: "Do you have any research on Ambergris?"

Mai nodded and explained: "Ambergris has a strong medicinal effect, and it can let people get rid of distractions and relax completely. It is very suitable for entering a state of meditation. When deducing the gossip of the Book of Changes, it is very useful. Great help, so most feng shui masters are very fond of ambergris. Even if you have no money, you must buy some incense containing ambergris. I usually prepare some, so I just did some research. ."

After speaking, Mai said again: "Most of the ambergris on the market are obtained by killing sperm whales in the deep sea, but the ambergris obtained by these two methods will not take too long."

After a pause, Mai continued: "It is said that some masters in the past need Ambergris for millennia or even more than ten thousand years as medicine."

"But this kind of thing is too rare. The only way to find it is to go to the bottom of the deep sea."

"This is because humans tens of thousands of years ago did not have the ability to kill sperm whales. At that time, the sperm whales sank to the bottom of the sea and formed a whale fall. After the bones were eaten by the creatures on the bottom, the ambergris would sleep on the bottom of the sea. Buried in the sand."

"However, finding a piece of ambergris that has been buried for more than 10,000 years in the sea is not much different from finding a needle in the sea, so almost no one can do it. The ambergris fossil found before is said to be due to geological movement. It was melted into the rock layer tens of thousands of years ago, and the sky did not reappear until a few years ago."

Charlie was overjoyed. If this piece of Ambergris can really reach the level of a fossil, it must have a history of more than tens of thousands of years. In this way, this thing may really meet the needs of refining the pill of cultivation!
