

# The Amazing Son In Law ( Charlie Wade)

## Chapter 3003-3004

Ziva Hank was a little embarrassed when he heard Charlie's questioning. She didn't want Charlie to know that she was asking Doris Young about how he was getting along well.

Doris Young also belongs to the kind of woman with extremely high emotional intelligence, so she smiled slightly and said to Charlie: "The two of us were talking about future work. After all, we will be working together in your company in the future. Many things can still be communicated. Is there any."

After that, she looked at Ziva Hank and said, "Master, Miss Ziva has just returned to China, and she is ready to accept a new business from scratch, so you must give her more guidance and help her enter the state earlier. ."

Charlie didn't think much, nodded lightly, and said seriously: "This is for sure. I personally attach great importance to this business, so once this business starts, I will definitely put more energy into it."

Ziva Hank felt a little sweet again in his heart.

"According to Charlie's words, there will still be a lot of opportunities to meet him in the future."

At this time, Doris Young asked again: "Master, do you have any specific ideas about the ocean shipping business? For example, where do we start first?"

Charlie said: "I hope that we can directly start the core business as soon as possible, instead of focusing too much energy on familiarizing the industry and integrating resources. When we start this business now, the first goal is to let our own freighter set sail as soon as possible. ."

Ziva Hank hurriedly said: "MR. Wade, I have carefully considered this aspect. The first preparation is to register an ocean shipping company as soon as possible, and then obtain the relevant operating qualifications and shipping permits. As long as these are resolved, our ship theoretically It can pass reasonably and legally."

She said, "But because we started everything from scratch, and now we don't have any ships dedicated to port resources, so we have to simultaneously integrate some ship and port related resources when we make preparations. It's easy to say that when the time comes, I will go to clear the relationship, but you must pay attention to the ship as soon as possible, because the orders of major shipyards are very large, whether it is a container ship, a bulk carrier, crude oil or LNG. It takes at least one year for the ship from placing an order to delivering the ship."

Charlie nodded and said: "In this regard, I plan to make two-handed preparations. The first is to hurry up to place orders with major domestic and foreign shipyards so that they can start scheduling production for us; the second preparation is to dock some ships. With the

resources of the leasing company, we will build a preliminary shipping fleet for us by means of leasing.”

Ziva Hank hurriedly said: “I have already begun to prepare for this. I have already begun to understand the largest boat rental companies in China, and I can touch them at any time about the related leasing plans. I think I will prepare for the first five. A freighter, based on these five freighters, runs through the world’s major routes and ports.”

Charlie agreed and said: “No problem, you can start leasing now, and you must solve the problem of five freighters within one month. We can start the business as soon as the freighters arrive.”

Then, he said: “jasmin and Nanako will also come over in a while, just to talk to them about the transportation business, and many port resources of the Ito family can also connect with us.”

“Great.” Ziva Hank hurriedly said: “In this way, our company has not registered yet, and we have already negotiated the business in advance. As long as the qualifications are released and the ship is resolved, we can immediately start operating the actual business.”

Having said that, Ziva Hank asked again: “By the way, MR. Wade, I would take the liberty to ask, how much start-up capital have you actually prepared for the ocean shipping business?”

Ziva Hank is very clear about the basic logic of most businessmen.

As long as they come out to do business, they have several common characteristics.

The first is that almost everyone will exaggerate their investment and capital reserves.
