

The Amazing Son In Law (Charlie Wade)

Chapter 3108-3109

Helpless Zuri had to open the box at Stefanie's request, and took out the things Stefanie was thinking of.

Stefanie watched the video for a long time, and after she was sure that there were no problems, she breathed a sigh of relief, and said: "Zuri, you must help me put the baby away, don't make any mistakes."

"Don't worry." Zuri said with a curl of his lips, "I would rather not let it out if I make a mistake, are you satisfied?"

"Hehe!" Stefanie happily put her chin in her hands and smiled like a flower: "Zuri is the best! Love you!"

"Don't, don't love me!" Zuri snorted with a look of disgust: "You still love your Charlie!"

Stefanie said seriously: "That's right! How can I say those two words to you, obviously only Charlie deserves it!"

Zuri said angrily: "Stefanie! You little white-eyed wolf who has forgotten his friends! Fortunately, I have always been so good to you!"

Stefanie sticks out her tongue and grimacing: "Slightly...I have to get up, ignore you, goodbye!"

After speaking, he hung up the call.

Zuri shook his head helplessly and put Stefanie's baby in a safe place. Then he hurried out of the room, gathered with other team members, and headed to the venue for acceptance.

Fitz was naturally very diligent and accompanied along the way.

The motorcade carried Stefanie's team to the Olympic Center venue. At this time, the entire performance site had been completely set up.

The van arranged by Fitz had already transported the equipment brought by the group from Eastcliff to the venue.

As soon as he entered the venue, Zuri immediately instructed the people around him: "Everyone hurry up and perform their duties, and the stage part is responsible for quickly checking and accepting all the hardware equipment, focusing on the inspection of the elevators, and be sure to make sure that there is nothing wrong;"

“In addition, the lighting engineer hurriedly connected the computer, tried the on-site lighting effects, and checked one by one to see if the equipment was damaged or there were hidden dangers;”

“The sound engineer can troubleshoot the audio equipment, and check the status of the equipment one by one. By the way, check the sound field at the scene, and make sure that the listening experience of every audience in the venue is in the best condition.”

Fitz, who was next to him, heard Zuri’s words and hurriedly said to Zuri: for this concert, I specially asked a friend to get a group of very good lighting and sound equipment from the United States, because these equipment are really good. It’s rare, so I made my own claim and asked the executive company to replace the full set of plans. I didn’t notify you. Please forgive me.”

As soon as Zuri changed his equipment, he suddenly pulled down his face, a little nervous and annoyed, and said, “Master banks, if I remember correctly, our cooperation with you is limited to your naming this concert, and we and You donate to charities together, how can you change our lighting and sound equipment program without authorization? For such a big performance, all the lighting and sound systems follow our entire performance program, even every light on this stage, every How bright every second of a song should be is preset in our performance program. If you change it so arbitrarily, if it fails to match our original program plan, the stage effect will be greatly reduced!”

Fitz hurriedly explained: “Don’t get excited, I know I don’t have the right to make any changes to the execution plan of your performance, but I am completely out of good intentions. After all, this is the first time for Miss sun’s concert tour this year. For one, I wanted to make this performance more perfect, so I just decided to call the shots without notifying you in advance and adjusted the overall plan.”

Speaking of this, Fitz promised: “Don’t worry too much, I have specially invited the best lighting sound engineer from the United States this time, and they will connect with your original executive team.
