

The Amazing Son In Law (Charlie Wade)

Chapter 3144-3145

“Oh? Really?!” Doris Young immediately showed strong interest and asked with excitement: “I don’t know what kind of cooperation Master Banks wants to do?”

Fitz Banks smiled slightly, raised his hand and pointed to the high-rise buildings outside, and said with a smile: “Real estate, hotels, energy, automobiles, the fields you can think of. Basically, our Banks Family is involved in fields, so we can cooperate in fields. It’s too much.”

After that, Fitz Banks said: “Isn’t new energy vehicles very popular recently? There are R&D and production bases for new energy batteries and vehicles in several cities across the country, but Aurous Hill doesn’t seem to have it yet? I think we can establish a joint venture in Aurous Hill. A new energy battery manufacturer specializes in the production of supporting power batteries for new energy vehicles. It happens that we also have two traditional car brands in the hands of Sujia. Recently, we are also preparing to transform and develop new energy models. We will cooperate in depth at that time. Maybe we can build a brand of new energy vehicles together.”

Anyway, it’s just babbling, so Fitz Banks brags about it, and he doesn’t say anything about it. The Banks Family does have two traditional car brands, and they are indeed engaged in the transformation of new energy. However, this kind of thing, from Business logic says that even if they find people to cooperate, they will only find professional companies in related fields to cooperate, and it is impossible to come to cooperate with an innocent company like the Emgrand Group.

However, Fitz Banks thinks that now new energy is a big outlet, and all companies want to come in and get a share of the pie, and it must be the same for companies of the size of the Emgrand Group.

Many companies see that the new energy industry is becoming more and more popular, but they can’t find an entry point. Now they are giving Emgrand Group a free opportunity to enter the new energy field. It is impossible to refuse to come to Emgrand Group.

Of course, he is not a wealthy boy who is here to give opportunities. The reason for drawing such a big cake is to take the opportunity to attract the chairman of the Emgrand Group.

really.

As soon as he said this, Doris Young’s eyes flashed brightly. She couldn’t hide her excitement and said, “Oh, let’s talk about Master Banks, our boss has always wanted to dabble in the field of new energy vehicles, but our Emgrand Group We have always focused on real estate development and commercial real estate management. The development of real estate, shopping malls and hotels is our specialty. However, we are unable to develop new energy vehicles. The boss is worried that there is no good opportunity. If the Banks Family is really interested Cooperating with us, that’s really a gift in the snow!”

Fitz Banks was very satisfied with Doris Young's performance, smiled slightly, and said seriously: "Vice Doris Young, Fitz Banks always speaks for words. Since I have come here on my own initiative, I naturally hope to cooperate with your Emgrand Group."

Speaking of this, Fitz Banks paused for a moment, and then continued: "As you know, although our Banks Family has a strong overall strength, our main business is concentrated in and around Eastcliff . There is no business foundation in Aurous Hill. There is no network."

"If you want to build a new energy battery and automobile production base in Aurous Hill, you must have in-depth cooperation with Aurous Hill local companies."

"In this way, it will be easier to approve, obtain land, build factories, and apply for government subsidies."

"Your Emgrand Group is the largest enterprise in Aurous Hill. Cooperating with you is to join forces for mutual benefit!"

"That's great!" Doris Young said excitedly: "Since Young Master Banks can value us, then we will definitely go all out in cooperation!"

"Yeah!" Fitz Banks nodded in satisfaction, then changed the conversation, and suddenly said: "Oh, right, Deputy Doris Young, I estimate that the total investment of this cooperation project will be at least 60 to 70 billion, and it may even be worth it. Hundreds of billions, such a big cooperation, I still want to meet your boss and have a chat in person. I wonder if you can ask him for me?"

"This..." Doris Young hesitated for a moment, and then said: "Mr. Banks, let's tell you that, our chairman, this person, has always been not very concerned about the Emgrand Group..."
