

The Amazing Son In Law (Charlie Wade)

Chapter 3204-3205

Angie picked up the water glass and drank all the water in it without hesitation.

Immediately after, she experienced the magical feeling that could not be described in words.

It is a feeling beyond the cognitive range of adults, and a wonderful experience that subverts the worldview of adults.

The pure water that I drank is like a spring that moisturizes the dry soil under the quick-release lens. Under its action,

life grows rapidly as if the acceleration button is pressed, allowing the originally dry soil to be in a very short time.

The inside becomes lush.

Angie has seen such scenes in many documentaries.

Place a camera on a fixed position, starting from the withering of everything in winter, and shooting until spring flowers bloom.

Obviously it took a few months, but was accelerated by the director to fully present it in a few seconds.

In a few seconds, the severe winter will warm the spring, and everything has changed from inanimate to vitality in an instant.

Whenever Angie saw that kind of lens, she could feel the greatness of life more clearly, so that every time she saw it,

she would lament the miracle of life in her heart.

But this time, she experienced that wonderful feeling in herself, it seemed that her life had become alive again!

The most direct feeling that Rejuvenation Pill brought to her was the rapid improvement of her physical and mental state.

She always felt a little tired at first, but now, all her tiredness was wiped out at this moment.

Immediately afterwards, she felt that even her breathing became smoother, as if a patient with a cold and blocked her breathing suddenly became smoother.

She realized that this was probably due to increased lung capacity and rapid repair of cardiorespiratory capacity.

The physical function of the average person begins to decline gradually from the age of 20, especially for professional athletes. The peak state of 16 or 7 is the best, and this peak state is maintained for five years at most, and then it begins to slowly decline.

The main reason for this is the overall decline of physical functions. Although this decline is slow for ordinary people,

if you take five years as a node, you can still feel the huge difference.

At the age of twenty-five, he could run five kilometers in one breath, but at thirty, he might not be able to run three kilometers.

And she is now recovering to the state she was in a few years ago at an extremely fast speed.

This feeling shocked her heart.

Orrin Sun, Stefanie Sun and his daughter were also watching Angie's state closely.

They will not know what kind of huge changes Angie's body has for a while, but what they can see is that Angie's

complexion will soon become radiant.

The most amazing thing is that the small crow's feet at the corners of her eyes began to disappear quickly, and the nasolabial lines

continued to fade, suddenly it seemed that she was several

younger.

With excitement, Stefanie Sun stepped forward to hug her mother, choked up and said: "Mom...you become so young!"

Orrin Sun couldn't help but exclaimed: "you really are a lot younger!"

Angie raised her head to look at the coated privacy glass in the box, through the light refracted by the coating,

looking at herself in it, she was shocked to speak for a while, and then her eyes were filled with tears unknowingly.

So that the self reflected on the glass became blurred.

Orrin Sun hurried forward and gently embraced her, while she fell directly on Orrin Sun's shoulder and sobbed silently.
