

# The Amazing Son In Law ( Charlie Wade )

## Chapter 3350-3351

When Charlie heard this, his whole body was agitated, he hurried to the side and stopped, and blurted out: "Brother, don't panic, let me ask you, how is the overall level of the government army?"

"Not very good." Hunter (Hamid) said: "But the mercenaries they hired this time are very powerful. They are the world's top five Wanlongdian. It is said that Wanlongdian sent 10,000 soldiers to help the government at a time. "

Charlie frowned and asked, "Ten Thousand Dragons Palace, what is it?"

"I'm not very clear." Hunter (Hamid) replied: "It is said that it is a mercenary organization established by Chinese. It has developed rapidly in recent years, and its scale and strength are very strong!

Their individual quality is higher than that of government troops. Much! They are basically at the level of special forces in developed countries!"

Charlie said in surprise: "I haven't heard of this organization. I know about the American Blackwater,

the Russian Cossacks, and this Wanlong Temple. This is the first time I have heard of this organization."

Hunter (Hamid) sighed: "You don't usually have the opportunity to deal with mercenaries, and you certainly don't know about these people.

They are just commercialized professional soldiers. They collect money and do things. They are most active in places like ours where there is a lot of war. , This Wanlong Temple is said to have tens of thousands of people. Among them, there are nearly 100 top masters. They are very powerful. The God of War sent one of the four strongest kings under his command to Syria..."

Charlie asked him: "Don't be nervous. The level of special forces will die if you get shot.

Although your individual quality is not as good as him, you have the right time and place.

As long as you can give full play to your advantages, you may not be able to fight lose."

After speaking, Charlie asked again: "How are your

fortifications and the reverse slope tunnel repaired?"

Hunter (Hamid) hurriedly said: "I have been asking them to work overtime recently! But the workload is really too large, and it is really difficult to implement the entire plan in such a short period of time..."

Charlie said calmly: "I understand, just tell me, can you put into use the permanent fortifications and reverse slope tunnels you are currently defending?"

"Yes." Hunter (Hamid) said: "My frontal fortifications at the entrance of the base have almost been built. After all, this is the top priority of my entire defense. As for the reverse slope tunnel, I have excavated all sides, but At present, the inside has not been opened up, and there is no internal tunnel network extending in all directions, but I have stored a large amount of materials in it according to what you said. It is not a problem to stick to the materials for a year or two."

"Okay!" Charlie blurted out: "Then I ask you, do you know what the firepower of the opponent's 8,000 troops is?"

Hunter (Hamid) said: "10 armored vehicles, more than 30 towed artillery pieces, and fifty or sixty trucks, should be pulling materials and ammunition."

Charlie thought for a while, and then asked, "Do you know the specifications and models of more than 30 towed guns?"

Hunter (Hamid) said: "The investigators visually said that it should be a Russian-made 152mm artillery."

Charlie's father, Bruce, is a standard military fan. In the past, there was a whole room in the house full of models of various weapons and equipment, and there were countless books, magazines and materials for various weapons and equipment.

Charlie knew a lot about various weapons and equipment under the influence of her ears and eyes when she was young.
