

The Amazing Son In Law (Charlie Wade)

Chapter 3422-3423

Abbas is not exaggerating. Since the establishment of Wanlong Palace, it has never experienced such a tragic failure and blow.

More than 1,500 people died in one war. What is this concept?

A lot of mercenary organizations, from top to bottom, even fight wars and messengers, and the total number of them is not so large.

The Blackwater Company led a large number of inadequately trained miscellaneous troops. Following the United States in the Middle East for so many years, there has never been a single war, when the casualties exceeded 100.

Of course, this has a lot to do with the powerful firepower of the US military.

This time, the Wanlong Palace lost so many people in one breath, in the field of mercenaries, it was indeed shocking.

Just now, Abbas, who was full of confidence and boasted about going to Haikou in front of Lord Banks, was suddenly beaten in the face by such a tragic failure, and he was naturally angry deep in his heart.

He could not wait to pull Chen in front of him and beat him to death with his own hands.

But at this time, Chen was in Syria, and he was beyond reach.

He could even think that after today, the Wanlong Palace will quickly become the biggest laughing stock in the entire mercenary field, and I don't know how many people will poke his Abbas's backbone behind his back.

Moreover, for the deaths of more than 1,500 people, in addition to the loss of numbers and reputation, there is a huge amount of pensions that need to be paid by them.

Except for a small number of retired soldiers, most of the people recruited by the Blackwater Company are gangsters on the streets of the United States. If they are in the country, they can also work as co-management. They simply train such people and put them on the battlefield. Training costs and salary costs are not high, and the pension standard is not high.

But Wanlong Temple is different.

Wanlongdian places great importance on the recruitment standards of soldiers, and the threshold is very high. Every soldier in the Wanlongdian is not weaker than the active US troops, and many of them are even stronger than the soldiers of elite troops such as the Marines. .

Therefore, Wanlongdian's salary is higher and the pension is higher.

Everyone tied their heads to their trouser belts and came out to do this kind of blood-licking work, so they attach great importance to pensions, because once they die in battle, they can leave their families with generous funds for them to live well.

In order to strengthen internal unity and the loyalty of soldiers, Wanlongdian's pension level is sixty times the individual's monthly salary.

That is the salary for a full five years.

If a person has a monthly salary of 30,000 U.S. dollars, his pension is 1.8 million U.S. dollars.

As for Gorka, his monthly salary exceeds 150,000, and his pension alone will cost 10 million U.S. dollars.

Therefore, for these more than 1,500 people, their pensions alone cost more than 2 billion U.S. dollars.

Moreover, there is a special standard in Wanlongdian's pension system.

This 60 times the monthly salary of the pension standard refers to the case where a person died in a normal battle, leaving the whole body to his family.

If the whole body cannot be kept, the pension will have to pay extra for mental damage.

After all, the funeral tradition in any country is the same. The burial tradition naturally requires the whole body to be buried, and even cremation is the best for whole body cremation. Therefore, if there is no whole body, another 20 months' worth of payment is required. Monthly salary.
