

The Amazing Son In Law (Charlie Wade)

Chapter 3440-3441)

Twenty minutes later, the soldiers of the first echelon were assembled, and at the same time, the soldiers of the second echelon had also completed parachuting and began to gather.

After the soldiers of the second echelon were almost assembled, the commander of the first echelon ordered an attack!

They intend to directly attack the tunnels on the front slope, while disintegrating the enemy's defenses, while attracting the enemies on the reverse slope, and at the same time attracting enemies hidden in several other directions.

By then, the second echelon will touch it from behind and directly make dumplings for the opponent.

At the same time, as long as the defensive force on the front slope disintegrates, the thousands of government soldiers will immediately rush up. At that time, Hunter (Hamid)'s armed forces will have nowhere to escape.

In the intercom system of Wanlongdian, the commander of the first echelon said: "Our department is ready for battle, please confirm the assembly situation of the second echelon."

The voice of the commander of the second echelon came from the intercom system: "Our department has basically completed the assembly and is confirming the equipment before the war."

The commander of the first echelon immediately opened his mouth and said: "Our department is requesting an offensive, Commander Chen for approval!"

Chen said vigorously: "Approve! Attack immediately! Within ten minutes, get rid of all the soldiers on their slopes! Take revenge for our dead Brother Paoze!"

"Yes!" The commander of the first echelon said with enthusiasm: "Commander Chen, please rest assured, we will never live up to the name of the Wanlong Palace! We must avenge the dead brothers!"

"Okay!" Chen laughed and blurted out: "Attack now!"

The commander of the first echelon immediately ordered the soldiers around him: "Everyone! Start the attack!"

As soon as the voice fell, Hunter (Hamid) in the tunnel also gritted his teeth and shouted: "B area 03, 05, 06, 08, 09, 11 explode, detonate!"

The two engineers in charge of area B immediately used the fastest speed to detonate the designated explosive point on the detonator.

Just as the 500 soldiers of the first echelon of Wanlong Temple were about to rush to the front slope fortifications, huge explosions suddenly sounded around them!

Three of the explosion points were at the feet of the five hundred people, and the other three were located at the edge of the five hundred people. At the moment of the explosion, at least one hundred people were lifted by the explosion waves.

The strong blast wave caused these five hundred people to be injured in varying degrees, and many people were even killed directly.

What's even more tragic is that the fragments of the explosion wave that will kill you all over the sky are like the rainstorm pear needles in the martial arts novels, covering these five hundred people in all directions!

The power of the explosion is great, and the metal fragments are driven by the explosion wave, and each piece has a strong potential energy.

Although these five hundred soldiers were wearing bulletproof vests and bulletproof helmets, their limbs, faces, and necks were all exposed to this kind of intensive fragmentation attack!

In just a moment, the five hundred Ten Thousand Dragons Palace soldiers were without exception, and there were a lot of metal fragments in all of them!

Some people who are unlucky have their trachea or arteries cut directly by the fragments. Before they can be rescued, they have already died.

Those who were lucky, although not fatally wounded, were hit by fragments on their face and instantly blinded both eyes.

And more often, it is a large-scale injury to the limbs.

Especially the hands and arms were almost bloody and bloody, even if they were well-trained before, they still can't even hold a gun.

Chen heard explosions in wireless communication and the painful sound of his soldiers crying and howling. His scalp became numb for an instant, and he blurted out and asked, "What's going on?! What happened?!"

The commander of the first echelon was blind at this time, and his eyes were pierced by at least seven or eight metal fragments. At this time, he was covering his eyes and crying helplessly: "Commander Chen! We...we are in ambush! !"
