

The Amazing Son In Law (Charlie Wade)

Chapter 3447)

The adjutant said hurriedly: "Commander, it's not appropriate to call so late? Will it affect Mr. Charlie's rest?"

Hunter (Hamid) scolded: "Let you read more books when you are okay, you just don't do it! Huaxia and us are not in the same time zone at all. We are now at 3:30 in the morning, and it is already 8:30 in the morning on his side.!"

...

Charlie was thinking when he first got up, Hunter (Hamid) must have experienced another big battle last night.

However, he did not worry about Hunter (Hamid).

Because he knew that Hunter (Hamid) had arranged more than one hundred explosion points throughout the base, which was already a devil-level defense.

With this level of defense, it is impossible for the enemy to defeat him.

Sure enough, as soon as he finished his breakfast, Hunter (Hamid) called.

As soon as the phone was connected, Hunter (Hamid) said with excitement, "Brother, you are so amazing! They sent a large number of paratroopers at night. If you hadn't reminded me and gave me a solution, I'm afraid it would be too early. died!"

Having said that, he reported to Charlie in detail the result of the battle just now.

Charlie couldn't help being surprised after hearing this.

He wasn't surprised that Hunter (Hamid) would win, but he didn't expect Hunter (Hamid) to win so thoroughly.

Annihilating a thousand elites in the Wanlong Palace, there were no casualties on his side, which is indeed very incredible.

Hunter (Hamid) said excitedly: "The main reason is that your idea is great! After the explosion point is detonated, the opponent loses all combat power almost instantly. In addition, our soldiers have been keeping a distance from them, finishing with grenades and even mortars, so They didn't even give them a chance to fight back!"

Charlie smiled and said, "I just made suggestions, mainly because you can implement them perfectly."

After speaking, Charlie asked again: "You should have added a lot of weapons and equipment for the two battles yesterday?"

Hunter (Hamid) blurted out: "Brother, I'm about to report to you! The bastards in Wanlongdian are too rich. Their individual equipment is inferior to the U.S. Marine Corps or even the Navy SEALs. This time I have harvested a full set of equipment for one or two thousand special forces! I am going to quickly buy a batch of NATO-standard ammunition. In the future, all my direct troops will use the NATO-standard weapons seized this time. These weapons are more advanced. The power and shooting accuracy far exceed those of Russian-made weapons"

Charlie couldn't help but exclaimed: "That's great! With good equipment, you have to solve the problem of soldier training. You must choose the most combatant and the most powerful from your direct line of troops.

Powerful people, train them into basic-level and middle-level officers, respectively! The larger the team, the more you have to focus on the building of the management. It is best to simply start an officer training class to train outstanding talents in batches."

Hunter (Hamid) said immediately: "Don't worry, I must train direct officers!"

He said, "By the way, my brother, after these two battles, I now have so many weapons and equipment that I can't use them up. The only collection of weapons is 6,000 or 7,000!"

Charlie smiled and said: "That's right! After dawn, your popularity in Syria will probably be unknown to everyone. At that time, you won't know how many people will take refuge in you. With so many weapons and equipment, it will be enough for you to form a larger team. ."

Hunter (Hamid) said immediately: "I am planning to do that now. In these two battles, I have people filming video materials. I will advertise it early tomorrow morning. Anyway, I have become a mortal enemy with Wanlong Palace. I don't care about stimulating them. When the time comes, I will become famous, and I will definitely be able to recruit a lot of stragglers to take advantage of the trend, and it may even be possible for other armed forces to come and take refuge in the establishment!"

As he said, Hunter (Hamid) said again: "I also plan to reorganize an engineering unit with a size of 1,000 to 1,500 immediately if it can attract two to three thousand people to come and take refuge, and seize the time to continue to expand the mountain. Fortifications, this is my top priority now..."
