

# The Amazing Son In Law ( Charlie Wade )

## Chapter 3472 )

Hunter (Hamid) never knew the way the Wanlong Temple cooperated with the government forces.

Originally, he thought that it was the government army that paid for the hiring of the Wanlong Temple, but after thinking about it carefully, he always felt that something was not quite right, because the biggest problem of the government army was the shortage of funds. With fewer guns, how can there be enough funds to hire the mercenaries of the Wanlong Temple.

It was not until yesterday that he received the news that it turned out that the conditions for cooperation between Wanlong Temple and the government forces were that Wanlong Temple helped the government forces to clear out the opposition, and the government forces allocated a piece of land with an area of 100 square kilometers in Syria to Wanlong Temple, for Wanlong Temple to build its first mercenary base in the Middle East.

But Hunter (Hamid) didn't expect that Charlie would even know about this in China, so he was shocked by Charlie's information channels.

Charlie didn't expect that Hunter (Hamid) had already fought with Wanlong Temple for two rounds, and he didn't know the news until yesterday.

This also means that the news is relatively confidential.

Lord Banks would know this kind of confidential information. This further confirmed his guess that Lord Banks must have some connection with Wanlong Temple.

So Charlie said to Hunter (Hamid): "I suspect that this Wanlong Temple is related to an enemy of mine in China. The specific details of the cooperation between Wanlong Temple and the government army were leaked from that enemy in my country. "

Hunter (Hamid) blurted out: "Brother, if you say that, then this Wanlong Temple is also a certain threat to you!"

"Yes." Charlie nodded and said: "The main reason is that I don't know much about this Wanlong Temple, and I don't know their specific situation, so the Wanlong Temple is so dangerous to me. Now Not sure yet."

Hunter (Hamid) waved his hand and said: "Brother, I don't think you need to worry about this. Huaxia has always had the nickname of the grave of mercenaries, because the law and order of China is so good. In this case, overseas mercenaries can't even bring guns in. , Is definitely not your opponent, my brother."

Charlie said indifferently: "Know yourself and the enemy, so you can be undefeated in a hundred battles. What I am most passive now is my lack of understanding of the Wanlong Temple, and I don't know how close my enemy is to the Wanlong Temple."

Hunter (Hamid) said: "My brother, let me tell you what I know. Wanlong Temple was established in South America in the early years, and now it focuses on the Middle East and Africa. Among them, the Middle East market is the largest. You can think of it. Almost no country in the Middle East, including

Israel, does not cooperate with mercenaries, so this Panlong Temple wants to take root in the Middle East.”

After speaking, Hunter (Hamid) said again: “The biggest problem with most mercenary organizations is that they do not have heavy weapons. Even the American Blackwater Company can only arm mercenaries with ordinary light weapons. They went to the Middle East to cooperate with the U.S. Army. At that time, almost all of the armored vehicles and helicopter gunships they drove were owned by the U.S. military. If they left the U.S. military, the best equipment they could get in the Middle East was a Toyota pickup with a machine gun on the body.”

“At this point, the Wanlong Palace is the same;”

“Although they have some heavy equipment in South America, they are said to have only a small number of armored personnel carriers and old Russian-made helicopters. If they want to dispatch these equipment globally, they can only use shipping;”

“But there is another problem with shipping. Shipping companies all over the world must abide by a basic convention. They cannot carry any non-government armed weapons and equipment, and the ports of any country must not allow any non-governmental armed weapons and equipment to be loaded or unloaded from the port;”

“So, it is basically impossible for them to get their equipment from South America to the Middle East.”
