

The Amazing Son In Law (Charlie Wade)

Chapter 3477)

The adjutant said helplessly: "Commander, although they are here to fight, you must know that they themselves don't like to fight hard fights!"

As he said, the adjutant said: "The grassroots soldiers in the Wanlong Temple are the purest mercenaries. They train and fight for their lives in order to make more money and enjoy life. Otherwise, who would you say is willing to risk? Running out of such a big risk to do this kind of work?"

Chen had nothing to say for a while.

He is very clear about the current situation in the Wanlong Temple.

Although the Wanlong Palace does have four kings and hundreds of star warriors, almost all of the tens of thousands of ordinary officers and soldiers in the Wanlong Temple have joined the Wanlong Temple for profit.

These mercenaries don't have any loyalty to the Pantheon. Everyone just thinks that the income, scale, and popularity of the organization are good, so they chose to work in the Pantheon.

Therefore, this group of talents will not endure the humiliation and forge ahead for the future of Wanlong Palace.

They only care about themselves.

At this time, his adjutant said: "In addition, the accommodation is actually understandable. Think about it, we don't know how long this kind of siege will take, three to five days, or ten and a half months, everyone should still be able to do so. Accept it, gritted your teeth in the tent, it's okay, even if the power supply problem can't be solved, but if this kind of life lasts for two or three months or even longer, then you definitely don't want these months They all live in tents..."

Speaking of this, the adjutant reminded: "Commander, the summer in Syria is coming soon. By that time, the temperature during the day will be 37, octave, or even 40 degrees, and everyone can't resist living in a tent..."

The adjutant's words made Chen feel extremely pressured.

It is not too difficult to solve the food problem. He can purchase food from Israel. Whether it is steak or vegetable milk, Israel can provide a stable supply. It is nothing more than a problem of spending one million dollars a day.

However, this modular prefabricated house is really difficult to solve.

Modular prefabricated houses are the same as those used on domestic construction sites, but they are not a thing at all. Not only are the construction techniques more complicated and the supporting functions are more numerous, but also the manufacturing cost has increased exponentially.

If you want 15,000 people to live in this kind of house and have a stable power supply, the cost will be at least tens of millions of dollars.

Thinking of this, Chen had no choice but to bite the bullet and tell the adjutant: "Go back and tell them, let them be patient. After April 5th, maybe the Lord will come to Syria to solve these problems himself. In that case, everyone At most, you only need to hold on for more than a week!"

When Chen moved out of abbas, he temporarily blocked the request of this group of people, but he has been entangled in his heart.

For him, he didn't want this matter to be resolved by abbas, because in that case, it meant that he had failed extremely thoroughly in Syria.

Therefore, he still hopes in his heart that he can find a way to solve the Syrian problem by himself.

In this way, he can also keep his position as the king of war.

When the adjutant heard this, he couldn't help but said with some worry: "Commander, should the Lord handle this matter personally? That would be really unfavorable to us!"

Chen said boredly: "If we don't have a good way to solve Hunter (Hamid), then even if I don't want the Lord to come over, the Lord will not pay attention to me!"
