

The Amazing Son In Law (Charlie Wade)

Chapter 3522)

Since Charlie planned to go to Eastcliff on April 3rd, he said hello to his family, saying only that there is a big family in Eastcliff, so please go to see the Fengshui of the ancestral tomb on Ching Ming Festival, so he had to leave two days in advance.

Charlie greeted Claire in advance on this matter, so the family was not surprised either.

Anyway, it was common for Charlie to go out to see Feng Shui, Claire only told him to take good care of himself, go early and return early.

Stefanie Sun, who was far away in Eastcliff, and the family of Sun, had long been thinking about Charlie's coming .

At lunch, Orrin opened his mouth and said to his wife and daughter: "Today is already on the 2nd, I guess charlie should come to Eastcliff tomorrow."

After that, he asked Stefanie Sun: did you ask when charlie will arrive? How will the accommodation arrangements be made after I arrive?"

Stefanie Sun subconsciously said: "Dad, I think that Charlie will not come tomorrow. He and the Wade Family are not very good at dealing with each other. I think he came here on the 4th at the earliest, so that after attending the ancestor worship ceremony on the 5th, he I'm probably going back in a hurry."

Orrin shook his head and said seriously: "The Wade Family's ancestor worship ceremony is very grand, and there are so many red tapes in the middle. Therefore, the day before the ancestor worship ceremony begins, that is, on the fourth day, the Wade Family must sit together. It takes a whole day to sort out and confirm all the processes. Based on this time node to speculate, Charlie will definitely come tomorrow!"

When Stefanie Sun heard this, she said with joy: "Really? That's great. I will call Charlie and ask him now! Let him live in our house for what I said this time! "

Having said that, Stefanie Sun immediately took out his mobile phone and called Charlie.

At this time, Charlie had just eaten and was about to drive out.

Claire was busy with company affairs and did not come back at noon. Charlie was worried that his spiritual energy was consumed severely, and Eastcliff had a group of people waiting for him in the Wanlong Palace, so he planned to practise the pill of cultivation before going to Eastcliff. come out.

Refining Peiyuan Dan requires three main medicines.

At the top of the list is Ambergris that is more than ten thousand years old.

This is the most difficult thing to make, but Charlie already has it.

This is also thanks to the murderous Master Felix invited by Lord Banks, this thing is his treasure with him.

In addition, a thousand years of snow ginseng and a thousand years of ganoderma are also needed.

Among them, the thousand-year-old snow ginseng is the most precious.

Because snow ginseng only grows in cold areas, it is also produced in Changbai Mountain in China. Moreover, snow ginseng for a hundred years cannot be seen on weekdays. Thousand-year snow ginseng is almost invaluable.

But a long time ago, Liam gave Charlie the Thousand-Year Snow Ginseng that had been handed down from his mother's family, and he had always treasured it and never used it.

As for the Millennium Ganoderma, this thing is not difficult to get.

Although Ganoderma lucidum is also a rare treasure in Chinese medicine, Ganoderma lucidum and ginseng are completely different species.

Ganoderma lucidum is a kind of fungus in plain terms. It is related to mushrooms and fungus. It is widely distributed in nature, and it is basically everywhere in deep mountains and old forests.

Moreover, the Ganoderma lucidum in the mountains is not worried about. Many people go into the mountains to dig ginseng, but they are rare. This is mainly because Ganoderma lucidum is not difficult to cultivate artificially and grows quickly.

Because Ganoderma lucidum is easy to breed and has a high yield, there are many Chinese medicinal products of Ganoderma lucidum on the market. Both medicinal materials and so-called spore powder are already rotten, and the market demand is huge every year.

If the same routine is used to pack snow ginseng, I am afraid that all snow ginseng from the three provinces of the East will be dug out, and it may not be enough for the market's demand for a year.

Charlie just with Mr. Quinton before, and Mr. Quinton directly found him several thousand-year-old Ganoderma lucidum, each of which was bigger than a washbasin.
