

The Amazing Son In Law (Charlie Wade)

Chapter 3558)

After eating the closed door, Cynthia Wade, the first thing he did when he returned to the Wade Family was to file a complaint with Mr. Wade.

When Mr. Wade saw her, he asked in surprise, "Cynthia, why did you come back so soon? Have you finished the medical examination for Helena?"

Cynthia Wade said in an uncomfortable tone: "The Nordic princess did not give me a chance at all. I said that I would give her a good health check. She said that I violated his human rights and gave me this pass on the line. I think she means very much. Resolutely, if I insist on giving her a physical examination, then she will go back to her Northern Europe."

Upon hearing this, Lord Wade couldn't help furrowing his brows and muttering coldly: "This Helena is so resistant to the medical examination, but it makes me more convinced of Charlie's judgment that there must be something wrong with her body, and she knows it herself."

Cynthia Wade immediately said angrily: "Dad! The Nordic royal family is too bullying, right? Sending a sick child to marry us, what are they going to do? What kind of illness do you think Helena will suddenly die in the future? Wade Family, how do we Wade Family explain to the public?"

Lord Wade nodded in agreement, and said seriously: "What you said is really tricky! If Helena is really sick to marry our Wade Family, then there will be endless troubles in the future!"

Cynthia Wade said immediately: "Dad! Why don't you call Big Brother and Jon over now, let's make it clear to them, if Helena insists on not having a physical examination, then let's retire!"

Lord Wade waved his hand immediately and said: "Forget it, don't say anything about it in advance. The day after tomorrow is the ceremony of ancestor worship. At this time, whether it is forcing Helena to undergo a medical examination or we are directly retiring from marriage, it is an outlier. Everything is waiting for the sacrifice. Let's talk about it after the grand ceremony of ancestors is over!"

Cynthia Wade hurriedly nodded and said, "It's still your dad that you are thoughtful! As soon as I came up with this impatient, I wished to immediately talk to the Helena and the Nordic royal family in front of the gongs and drums to make these things clear, and suddenly ignored the overall situation. In order to emphasize these four words, it seems that in the future, we will still need to learn more with your father."

Lord Wade nodded slightly, and said: "Okay, you have worked hard, go to rest and rest. Don't tell your elder brother and Jon about this matter."

"Okay." Cynthia Wade responded and said respectfully: "Dad, then I'm leaving first."

...

At this time, Helena was still in fear because of her chance of escape.

She knew that the Wade Family had already suspected herself now. If the Wade Family insisted on seeing the results of their physical examination, then she would only be able to pass the first year of the middle school but could not escape the fifteenth.

What Helena worries about is what will happen to her mother in the future if she is divorced by the Wade Family.

Once they have no use value to the royal family, the royal family cannot afford its own medical expenses in the future, let alone the mother's pension expenses.

If he died, his mother would definitely be expelled from the royal family.

However, if you want to stay in the Wade Family and complete the marriage contract with Jon, you must pass the medical examination. Otherwise, the Wade Family will never let yourself pass the door in a daze.

Thinking of this, Helena complained a little bit about Charlie.

Because of Charlie's words, the future of herself and her mother is likely to be ruined.

However, she was also very clear in her heart that Charlie was not malicious when she said that her problem was not malicious.

Helena, who was in a dilemma, was extremely depressed.

She has even prepared for the worst. If she is really divorced, she can only return to Northern Europe, and then go to her cousin Olivia, and beg her to see it for herself. A life with mother.

However, in a daze, an idea that seemed ridiculous to her also sprouted in her heart.

She thought to herself: "Is that Charlie really a master of medical skills? He can see my illness at a glance, maybe he has the ability to cure my illness..."
