

The Amazing Son In Law (Charlie Wade)

Chapter 3568)

Although it was only a few minutes in a coma, to Helena, it seemed as long as a century had been spent in the dark!

So, when she woke up, she seemed to be diving under the sea and exhausted all the oxygen, and finally came up at the last minute, breathing heavily.

Immediately afterwards, her vision recovered, and other senses gradually recovered.

Seeing the two people in front of her, she immediately realized that it was her two attendants who rescued her. They both received very good first aid training. This time, they followed her to ensure her safety.

After that, she felt the sharp pain from her heart again, and when she looked down, she saw that the Chinese girl was still holding an adrenaline syringe in her hand.

She asked nervously: "You... you injected me with adrenaline?"

The Chinese girl said with ashamed expression: "I'm sorry, Princess Helena, your situation just now is too critical, I can only choose to inject adrenaline to wake you up."

While speaking, she pointed to the mobile phone in another girl's hand and said: "This mobile phone is recording video. If you have any last words, please hurry up and speak to the camera..."

Helena gave a wry smile and said: "If I guessed correctly, you were also sent by Olivia to monitor me, right?"

The Chinese girl didn't speak, because she knew that she was videotaping now. Once Helena died, the video would be handed over to Princess Olivia intact, so she must not make any mistakes.

Seeing that she didn't speak, Helena shook her head weakly, and said weakly: "Actually, I don't blame you. If I don't give me an adrenaline injection, I might be dead and I have no chance to leave a last word. After all, I Thank you too."

The Chinese girl lowered her head in shame, afraid to look at Helena.

At this time, Helena also turned to look at the camera, saying word by word: "Olivia, I don't know what made you the way you are now, but I beg you to see that I am about to die. For the sake of this, let my mother make a living, otherwise, I will turn into a ghost, and I will crawl out of hell and kill you!"

As soon as the voice fell, she felt the beating speed of her heart suddenly increase.

The side effects of epinephrine are already beginning to appear.

She pressed her heart tightly, and could feel the violent beating of her heart. Not only did her heart tremble, but her palms were also numb.

At this moment, the first responders in the ambulance arrived.

Jon Wade hurriedly slammed the door at the door and shouted: "The ambulance personnel are here, open the door quickly!"

The Chinese girl hurriedly found a bathrobe and wrapped Helena. At the same time, another Nordic girl stopped the video recording.

Helena said weakly at this time: "Please do me a favor, please don't let these people in. After my body is injected with adrenaline, I will definitely have acute heart failure, which cannot be saved. It is better to let me stay here. At this last moment, I want to spend it quietly by myself."

The Chinese girl hurriedly said: "His Royal Highness, you have gone to the hospital to cooperate with the treatment, maybe the doctor still has a way to extend your lifespan..."

Helena smiled bitterly: "The extension is only one day or ten hours, which is meaningless. In order to live ten hours more, all kinds of tubes must be inserted all over the body, and all kinds of instruments must be surrounded by me. I can't accept it, it's better to be decent."

The two girls looked at each other, and the Chinese girl blurted out: "Your Royal Highness, even if there is a glimmer of hope, please don't give up!"

After speaking, she immediately stood up and opened the door of the room.

The paramedics rushed in immediately with a stretcher.

Seeing that there was a defibrillator and adrenaline injected at the scene, I was obviously a little surprised.

The Chinese girl hurriedly said to one of the emergency personnel: "We gave the patient cardiopulmonary resuscitation and defibrillation, and injected one milligram of epinephrine into the ventricle. Please send the patient to the most authoritative cardiovascular hospital as soon as possible!"
