

The Amazing Son In Law (The Charismatic Charlie Wade Chapter 3939)

In order to maintain his own image in the minds of his men and his position in the Gulf of Aden, Badr immediately gathered his men and held a mobilization meeting.

Originally, the gang of shrimp soldiers and crabs under him seemed a little uneasy after hearing that the boss had declared war with the Wanlong Temple.

They also know that they have a lot of money and really want to fight Wanlong Palace. People like them don't even have a slight chance of winning.

The opponent is a top mercenary who has been battle-tested, but he is just a hanging silk pirate who hasn't even practiced his marksmanship very well and can only use the AK47 to bludgeon the target. This is really an enemy with the Wanlong Temple. I'm afraid I don't know how he died.

However, if Badr was able to secure his position as the leader of the pirate organization, he still had two brushes. He talked about these pirate members who didn't know a single big word, and talked about them impassionedly from the evening until dark.

In order to arouse the anger in their hearts, he even took the initiative to use his own movie projection device to play the video uploaded by Wanlong Temple to all his subordinates in a loop, finally successfully igniting the anger of all his subordinates.

So he immediately incited: "If we don't drive the Wanlong Temple out of the Gulf of Aden, then our brothers, and even ourselves, may experience the same fate. At that time, our Gulf of Aden will no longer exist. Our living space! Are you willing to give up such a good deal of pirates and go fishing in the sea in a canoe?"

All the subordinates immediately yelled unwillingly.

Because they have long been accustomed to pirates, which is a profession where money comes quickly and there is no risk, they are naturally unwilling to make a living.

After all, in a place like Somalia, making money is much more difficult than going to sea to rob.

Once they are transformed back into farmers or fishermen, they would rather fight to the death with guns.

Seeing that the fighting spirit of his men was mobilized by himself, Badr immediately issued an order and said loudly: "Tonight everyone prepares the ship and weapons, and tomorrow morning, we will attack with the whole army! Search for the freighter of Yisu Shipping in the Gulf of Aden. In any case, we must grab the next one!"

His second master couldn't help saying: "Boss, the soldiers of the Wanlong Palace are extremely strong in individual combat. We want to lay down the freighter they escort, I am afraid it will be difficult to achieve!"

Badr said coldly: "I know that the soldiers of the Wanlong Temple are very strong, but there are certainly not too many people they can allocate to each freighter. So our people are discovering the freighter of Yisu Shipping. After that, don't act rashly, but report the coordinates and address immediately. After the other speedboats go for reinforcements, work together to hijack this freighter!"

As he said, Badr continued: "If we don't suppress the Wanlong Temple and Yisu Shipping this time, then the reputation of the Wanlong Temple in the Gulf of Aden will continue to increase, and we will only get more and more difficult. So, no matter what we must first successfully hijack a freighter of Yisu Shipping and make the Wanlong Temple discredited, and at the same time make Yisu Shipping pay a huge price."

The second master hurriedly asked him: "Boss, what do you plan to do with the freighter of Yisu Shipping?"

Badr said with a gloomy face: "After snatching the ship, all the crew on the ship and the soldiers of the Wanlong Temple will be killed and thrown into the sea! At that time, we will also shoot the whole video and post it on the Internet. The world knows what anxious our fate will be!"

Having said that, Badr said again: "As for the hijacked ship, Isu will offer Ys 100 million US dollars to redeem it at that time. If they don't pay, they will unload the valuable things on the ship and sink the ship. NS!"

Immediately, Badr continued: "If Yisu Shipping honestly handed over 100 million U.S. dollars, I would give my brothers 30,000 each at that time! If any ship wins the first prize, it will cost one hundred thousand per person!"

Thirty thousand US dollars is definitely an astronomical figure for Somali pirates.

They lick blood every day, but they can't actually make much money. Most of the money is taken away by the leaders of the pirate organization and given to them, which is several times higher than the local average.
