

The Amazing Son In Law (The Charismatic Charlie Wade Chapter 4007)

When Fei Kexin mentioned his wife Claire, Charlie didn't feel anything wrong.

After all, my old husband had already told others about the situation last night.

However, seeing that Fei Kexin's house was going to be renovated, Charlie immediately said to her: "My wife has a lot of projects on hand recently. It's too big. I guess she won't be able to pick it up even if she wants to. Then Miss Zhan can take a look at other decoration companies."

Fei Kexin nodded lightly and smiled: "If I have a chance, I'll go to your spouse's company to check it out. If she can pick it up, it's best. It doesn't matter if she can't."

With that, Fei Kexin was afraid that Charlie would be disgusted, and added: "Vice President said hello to me yesterday. If I go directly to other people on this matter, I will be afraid that Vice President will feel in his heart. Have a complaint against me."

Fei Kexin put the reason on Jacob's body in one sentence, and it was very natural and reasonable.

After all, yesterday it was Jacob who very actively recommended Claire's decoration company to Fei Kexin. Fei Kexin looked at Jacob's face, went to meet Claire, and gave priority to Claire for cooperation with this project. It also makes sense.

Charlie felt a little worried when he heard this.

What he worries about is the energy problem of his wife Claire.

He knew that Claire couldn't be free, so he suggested that Claire start a business, but he didn't expect that after Claire started his business, he became a workaholic, working almost all year round.

It was because he saw that Claire was too busy with work, Charlie didn't want her to continue taking on new projects.

But as Fei Kexin said, Fei Kexin also wanted to give Jacob a face, so he still had to talk to Claire.

Charlie knew in his heart that if Claire really wanted to take on this project at that time, he could not object to it.

So, he said helplessly: "Miss Zhan, let's take a look at the villa first."

Fei Kexin nodded and said cheerfully: "Okay MR. Wade, please come in."

Entering the villa, Charlie found that most of the furniture in the Qin family was still here, but the more personal items had completely disappeared.

Fei Kexin brought Charlie in while introducing Charlie: "These furniture and appliances are basically left by the original homeowner before, but I plan to send them directly to the recycling company so that they will be emptied. All the original decorations were torn down and refurbished."

In fact, Fei Kexin didn't care about this villa.

The reason why I bought this villa is because I guessed that Charlie might be a Feng Shui master, so I bought the villa first and kept a guise that was convenient for getting close to Charlie.

So she didn't plan to renovate, or even plan to live in.

However, after knowing that Charlie's wife Claire had opened a decoration company, she moved the decoration plan, but not to live, but to take the opportunity to get to know Claire.

After hearing this, Charlie said seriously: "Since Ms. Zhan intends to redecorate everything, the feng shui inside is not so important now. There is no problem with the overall feng shui of the house. As for the future internal feng shui issues, you need your help. After finalizing the design plan, make specific adjustments according to the specific arrangements in the design plan."

Speaking of this, Charlie said again: "However, since Ms. Zhan hopes that the elderly living here can be healthy, heal illnesses and eliminate disasters, then I can give you some directions and suggestions."

Fei Kexin hurriedly said, "MR. Wade, please tell me."

Charlie said earnestly: "It is best to choose the old man's room in an extended year position in a house, and arrange it on the first floor as much as possible, so that it is more grounded; the room should be as close to the east as possible, and it must have windows. Purple qi comes from the east, which is beneficial to health; besides, the room must not be too big, because in Feng Shui, smaller rooms can gather qi, otherwise, if the room is too big, it will deplete the energy of the occupants. And in the decoration of the room, natural stone must be used sparingly."
